Additionally, it explores user roles, collaboration, data import, and out-of-the-box integrations, providing a detailed understanding of LeanIX's functionality.
Topic 4	• LeanIX Use Case: This topic describes the methodologies employed and initiates applications, such as portfolio assessment and rationalization, showcasing LeanIX's real-world utility.

SAP Certified Associate - Enterprise Architecture Consultant - SAP LeanIX Sample Questions (Q11-Q16):

NEW QUESTION # 11
What are the layers the displays to represent different aspects of the enterprise architecture?

- A. Strategy & Transformation | Business Analysis | Enterprise Architecture | Business Strategy
- B. OKRs & KPIs | Business Architecture | Technical Architecture | Data Metrics
- C. Strategy & Transformation | Business Architecture | Application & Data Architecture | Technical Architecture

Answer: C

Explanation:
SAP LeanIX uses a layered approach to represent different aspects of enterprise architecture. These layers help in organizing and visualizing the components and their interactions within the IT landscape:
* Strategy & Transformation: Covers the strategic goals, initiatives, and transformations planned for the enterprise.
* Business Architecture: Represents the business processes, functions, and organizational structures.
* Application & Data Architecture: Includes the applications used by the business and how data flows between them.
* Technical Architecture: Focuses on the underlying technical infrastructure and platforms supporting the applications.
References:
* LeanIX Documentation on Layers
* SAP Community on Enterprise Architecture

NEW QUESTION # 12
What characterizes an Application in SAP LeanIX?

- A. It adheres to the TBM taxonomy
- B. It processes business data
- C. It only serves IT tasks
- D. It only relies on hardware components

Answer: B

Explanation:
SAP LeanIX Meta Model

NEW QUESTION # 13
Which approach does SAP LeanIX recommend you follow when modeling applications?

- A. Focus on detailed information from the start
- B. Start with high-level information before delving intdetail

- C. Capture all assets regardless of business relevance
- D. Prioritize technical components over business capabilities

Answer: B

Explanation:
Initial High-Level Overview: SAP LeanIX recommends beginning with a high-level overview of the application landscape to understand the broader context and relationships between applications.
Incremental Detailing: Once the high-level information is established, you can progressively add more detailed information to the model, ensuring a structured and manageable approach.
Relevance and Context: This approach ensures that the most relevant and critical aspects are captured first, aligning with business needs and priorities.
Reference: SAP LeanIX Best Practices

NEW QUESTION # 14
Which of the following are relation types in the? Note: There are 2 correct answers to this question.

- A. Generic relations (versatile connections)
- B. Dynamic relations (real-time links)
