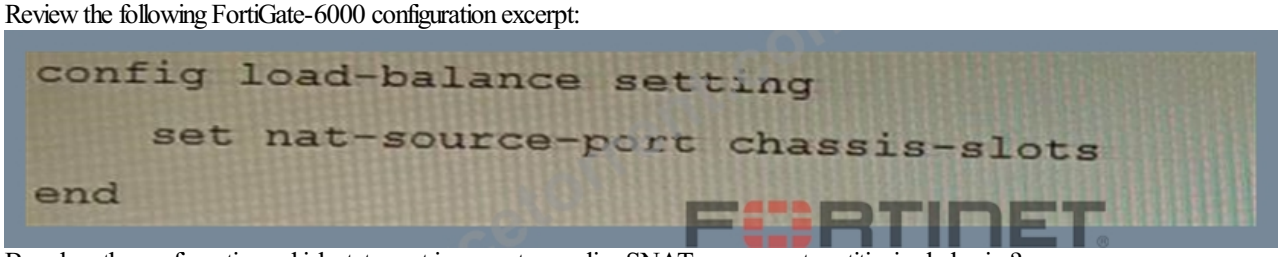
Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q56-Q61):

NEW QUESTION # 56
Review the following FortiGate-6000 configuration excerpt:



Based on the configuration, which statement is correct regarding SNAT source port partitioning behavior?

- A. It statically distributes SNAT source ports to operating FPCs or FPMs
- B. It equally distributes SNAT source ports across chassis slots.
- C. It is the default SNAT configuration and preserves active sessions when an FPC or FPM goes down.
- D. It dynamically distributes SNAT source ports to operating FPCs or FPMs.

Answer: A

Explanation:
Based on the configuration, the statement that is correct regarding SNAT source port partitioning behavior is that it statically distributes SNAT source ports to operating FPCs or FPMs. This is because the nat-source-port option is set to chassis-slots, which means that the FortiGate-6000 will allocate SNAT source ports to all FPCs or FPMs that are enabled when the command is entered. If an FPC or FPM is disabled from the CLI, the SNAT source ports assigned to that FPC or FPM will not be re-allocated to the remaining FPCs or FPMs. This option preserves active sessions when an FPC or FPM goes down, but does not dynamically re-distribute SNAT source ports if an FPC or FPM is powered off. NEW QUESTION # 57
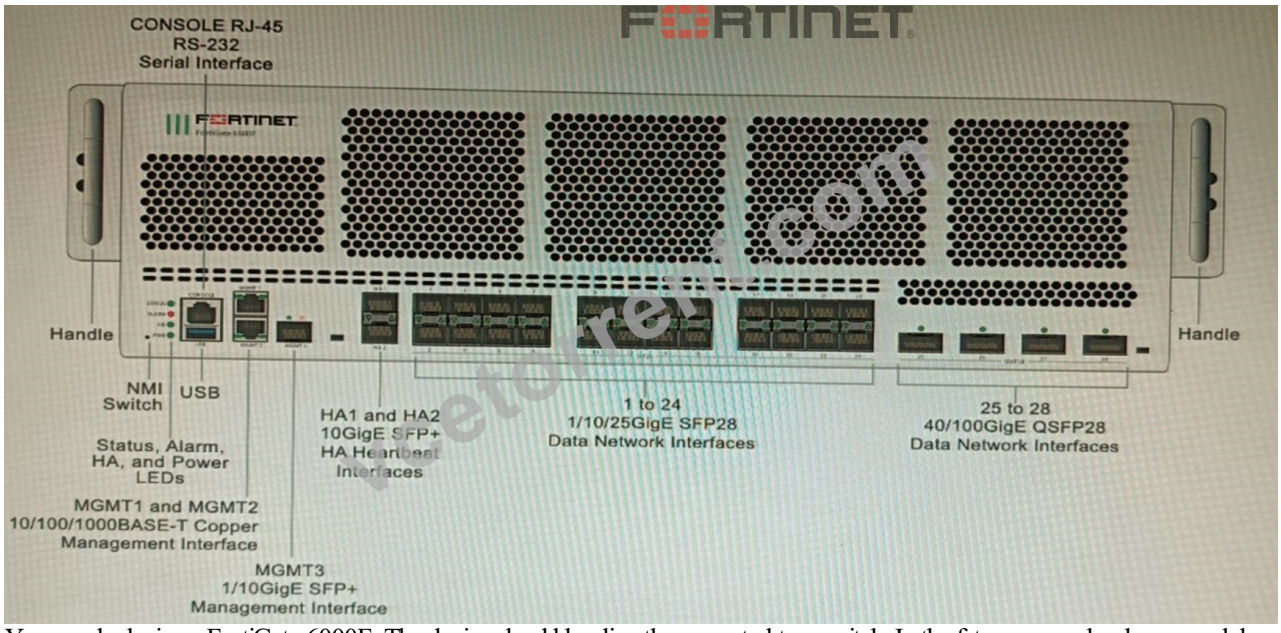
Refer to the exhibit.



You are deploying a FortiGate 6000F. The device should be directly connected to a switch. In the future, a new hardware module providing higher speed will be installed in the switch, and the connection to the FortiGate must be moved to this higher-speed port. You must ensure that the initial FortiGate interface connected to the switch does not affect any other port when the new module is installed and the new port speed is defined.
How should the initial connection be made?

- A. Connect the switch on any interface between ports 21 to 24
- B. Connect the switch on any interface between ports 5 to 8.
- C. Connect the switch on any interface between ports 1 to 4
- D. Connect the switch on any interface between ports 25 to 28
