

# Excellent New CIC Dumps Free by PassTorrent

BTW, DOWNLOAD part of PassTorrent CIC dumps from Cloud Storage: <https://drive.google.com/open?id=13a3c5IppTPu1NOL65w10qilJX-mok604>

PassTorrent aims to assist its clients in making them capable of passing the CBIC CIC certification exam with flying colors. It fulfills its mission by giving them an entirely free CBIC Certified Infection Control Exam (CIC) demo of the dumps. Thus, this demonstration will enable them to scrutinize the quality of the CBIC Certified Infection Control Exam (CIC) study material.

We will not only ensure you to pass the exam, but also provide for you a year free update service. If you are not careful to fail to pass the CIC examination, we will full refund to you. However, this possibility is almost not going to happen. We can 100% help you pass the CIC Exam, you can download part of practice questions from PassTorrent as a free try.

>> New CIC Dumps Free <<

## CIC Latest Braindumps Files - CIC Download

If you doubt the high pass rate of our customers is as 98% to 100% with the help of our CIC exam questions, you can free download the demos to check it out. You have to believe that the quality content and scientific design of CIC learning guide can really do this. You can easily find out that there are many people who have benefited from CIC Actual Exam. In this field, let me tell

you our excellent CIC study materials are in the position that can't be ignored.

## CBIC Certified Infection Control Exam Sample Questions (Q158-Q163):

### NEW QUESTION # 158

The infection preventionist observed a caregiver entering a room without performing hand hygiene. The BEST response would be to

- A. design a unit-based education program
- B. install hand hygiene dispensers in more convenient areas.
- C. provide immediate feedback and education to the caregiver.
- D. post additional signage to remind caregivers to wash before entry.

**Answer: C**

Explanation:

Immediate feedback is a best practice in behavior correction and performance improvement. In hand hygiene non-compliance, real-time intervention allows for immediate correction, education, and reinforcement of infection prevention policies.

\* The APIC/JCR Workbook recommends:

"Provide simulation training... that provides immediate feedback-for example, how to properly insert a urinary catheter or perform hand hygiene." This supports behavior change and staff learning.

\* The APIC Text emphasizes that real-time, direct feedback is more effective than passive measures like signage or delayed education campaigns.

APIC/JCR Infection Prevention and Control Workbook, 4th Edition, Chapter 6 - Clinical Strategies

### NEW QUESTION # 159

Which of the following BEST reduces the risk of infection in patients undergoing peritoneal dialysis?

- A. Irrigation of catheter with antimicrobials between dialysis treatments
- B. Weekly surveillance cultures of catheter exit sites
- C. Daily dressing change of the catheter exit site
- D. Catheter insertion in the operating room

**Answer: D**

Explanation:

The CBIC Certified Infection Control Exam Study Guide (6th edition) emphasizes that the most effective strategy for reducing infection risk in peritoneal dialysis (PD) patients is ensuring optimal conditions at the time of catheter insertion. Placement of the peritoneal dialysis catheter in the operating room provides a controlled, sterile environment that minimizes microbial contamination and significantly reduces the risk of early peritonitis and exit-site infections.

Peritoneal dialysis-associated infections are most often linked to contamination during catheter insertion or manipulation. Performing catheter insertion in the operating room allows for strict adherence to aseptic technique, appropriate airflow controls, surgical hand antisepsis, and use of sterile instruments-all of which are essential infection prevention measures highlighted in the Study Guide.

The other options are less effective or not recommended. Daily dressing changes (Option A) may actually increase manipulation of the exit site and raise infection risk if not clinically indicated. Weekly surveillance cultures (Option B) are not recommended, as they do not prevent infection and may lead to unnecessary antimicrobial use. Irrigating catheters with antimicrobials (Option D) is discouraged because it has not been shown to reduce infection rates and may contribute to antimicrobial resistance.

For the CIC exam, it is important to recognize that prevention of peritoneal dialysis-associated infection begins with proper catheter placement under optimal sterile conditions, making operating room insertion the best answer.

### NEW QUESTION # 160

A change in the disinfection protocol is indicated for which of the following scenarios?

- A. A high-level disinfectant being used for diaphragm fitting rings
- B. 2% glutaraldehyde being used for cryosurgical probes
- C. An enzymatic solution being used for rectal probes
- D. Sodium hypochlorite being used for blood pressure cuffs

**Answer: C**

Explanation:

The CBIC Certified Infection Control Exam Study Guide (6th edition) emphasizes the importance of applying Spaulding's classification to determine appropriate cleaning, disinfection, and sterilization levels for medical devices based on their intended use. According to this framework, rectal probes are classified as semi-critical devices because they come into contact with mucous membranes. Semi-critical devices require at least high-level disinfection after thorough cleaning.

An enzymatic solution, as listed in option C, is not a disinfectant. Enzymatic detergents are designed solely for cleaning, meaning they help remove organic material such as blood, mucus, and feces, but they do not kill microorganisms. Using an enzymatic solution alone for rectal probes is therefore inadequate and represents an improper disinfection practice, making this the scenario that clearly requires a protocol change.

Option A is acceptable because diaphragm fitting rings are noncritical devices that contact intact skin and may be safely processed using high-level disinfection. Option B is appropriate because blood pressure cuffs are noncritical items and can be disinfected using low- to intermediate-level disinfectants such as sodium hypochlorite. Option D is also appropriate, as cryosurgical probes are semi-critical devices and 2% glutaraldehyde is an accepted high-level disinfectant.

Recognizing the distinction between cleaning versus disinfection and applying the correct level of processing is a core competency for infection preventionists and a frequently tested concept on the CIC exam.

### NEW QUESTION # 161

Which of the following control measures is MOST effective in preventing transmission of Legionella in healthcare water systems?

- A. Installing carbon filters on all hospital water outlets.
- **B. Maintaining hot water storage temperatures above 140°F (60°C).**
- C. Flushing all faucets with hot water for 5 minutes daily.
- D. Routine testing for Legionella in hospital water.

**Answer: B**

Explanation:

\* Maintaining hot water at 140°F (60°C) prevents Legionella growth and is the most effective control strategy.

\* Flushing water (A) alone is not sufficient.

\* Carbon filters (C) do not remove Legionella.

\* Routine testing (D) is not always necessary unless an outbreak occurs.

\* APIC Text, "Waterborne Pathogens and Infection Control," Chapter 9.

### NEW QUESTION # 162

A facility's goal is to increase hand-hygiene compliance from the current 52% to 75% within 12 months. A gap analysis identifies several different issues. Which of the following is BEST suited for summarizing these issues?

- A. Flow chart
- **B. Ishikawa diagram**
- C. Affinity diagram
- D. Gantt chart

**Answer: B**

Explanation:

An Ishikawa diagram (fishbone diagram) is used to visually represent cause-and-effect relationships in problem analysis. It is best for summarizing and categorizing issues found in a gap analysis related to infection prevention.

\* The APIC Text confirms:

"A fishbone diagram (also called a tree diagram or Ishikawa) allows a team to identify, explore, and graphically display all of the possible causes related to a problem to discover the root cause".

\* It's particularly useful in quality improvement and infection prevention project analysis.

### NEW QUESTION # 163

.....

With rapid development of IT industry, more and more requirements have been taken on those who are working in IT industry. So if you don't want to be eliminated in the competition, to pass CIC exam is a necessary for you. If you worry that you will not get the satisfied results after you have taken too much time and energy to prepare the CIC Exam. Now let our PassTorrent help you! Countless CIC exam software users of our PassTorrent let us have the confidence to tell you that using our test software, you will have the most reliable guarantee to pass CIC exam.

**CIC Latest Braindumps Files:** <https://www.passtorrent.com/CIC-latest-torrent.html>

Old ways of teaching are not effective for CIC exam preparation, No matter you are a student, a office staff or even a housewife, you can always find your most suitable way to study our CIC exam Q&A, In addition, CIC exam dumps are high- quality, and you can pass your exam just one time if you choose us, For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study CIC exam questions in a concise and undisturbed environment.

In this article, I'll look at some of the challenges that the CIC iPhone brings and consider the options for handling those issues, Customize your project by adding a build phase.

Old ways of teaching are not effective for CIC Exam Preparation, No matter you are a student, a office staff or even a housewife, you can always find your most suitable way to study our CIC exam Q&A.

## One of the Best Ways to Prepare For the CIC

In addition, CIC exam dumps are high- quality, and you can pass your exam just one time if you choose us, For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study CIC exam questions in a concise and undisturbed environment.

Besides, when conceive and design our CIC exam questions at the first beginning, we target the aim customers like you, a group of exam candidates preparing for the exam.
