NEW 2025 ZDTA EXAM QUESTIONS AND ANSWERS

ZCC - ANSWER Lightweight app that sits on users, endpoint, and enforces security policies and access controls, regardless of device location or application

- Creates tunnel to Zero trust Exchange for protection of SaaS and internet-bound traffic
- persistent control plane
- dynamic, micro-segmented data plane tunnels to the ZTE for internal app protection
- traffic delivered to application via corresponding outbound only data plane tunnel from Zscaler app connector

Time to check for software updates - ANSWER Every 2 hours

Time when ZCC will connect and download any policy updates for the app profiles and forwarding profiles - ANSWER Every hour

Time when ZCC will download the PAC file of the app profiles and forwarding profiles - ANSWER Every 15 minutes

Forwarding Profile PAC - ANSWER

Authenticated tunnels options - ANSWER ZTunnel - Packet Filter Based
ZTunnel - Route-Based
ZTunnel with local proxy

ZTunnel 1.0 - ANSWER HTTP CONNECT tunnel
doesn't encapsulate traffic
adds some information header, ZTE to understand user information and data passed to it

- ANSWER DTLS tunnel with fall back to TLS

If you buy the ZDTA training files from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the ZDTA learning materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our ZDTA study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your ZDTA exam.

Before buying our ZDTA exam torrents some clients may be very cautious to buy our ZDTA test prep because they worry that we will disclose their privacy information to the third party and thus cause serious consequences. Our privacy protection is very strict and we won't disclose the information of our clients to any person or any organization. The purpose of our product is to let the clients master the ZDTA Quiz torrent and not for other illegal purposes. Our system is well designed and any person or any organization has no access to the information of the clients. So please believe that we not only provide the best ZDTA test prep but also provide the best privacy protection. Take it easy.

Testking ZDTA Learning Materials | Valid ZDTA Exam Dumps

In today's technological world, more and more students are taking the ZDTA exam online. While this can be a convenient way to take an Zscaler ZDTA exam dumps, it can also be stressful. Luckily, DumpsKing's best Zscaler ZDTA exam questions can help you prepare for your Zscaler ZDTA Certification Exam and reduce your stress. If you are preparing for the Zscaler Digital Transformation Administrator (ZDTA) exam dumps our ZDTA Questions help you to get high scores in your ZDTA exam

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	<ul style="list-style-type: none"> • Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
Topic 3	<ul style="list-style-type: none"> • Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. Data Protection Services
Topic 4	<ul style="list-style-type: none"> • Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.

Zscaler Digital Transformation Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

Which of the following are types of device posture?

- A. Domain Joined, Process Check, Deception Check
- B. Detect Crowdstrike, Crowdstrike ZTA score, First name
- C. Certificate Trust, File Path, Full Disk Encryption
- D. Unauthorized Modification, OS Version, License Key

Answer: D

Explanation:

Types of device posture typically include attributes that reflect the security and compliance status of a device.

This includes Unauthorized Modification, which checks if the device has unauthorized changes; OS Version, verifying if the operating system is up-to-date; and License Key, confirming the validity of software licenses on the device. These attributes help in assessing device trustworthiness for access control.

Other options include some irrelevant attributes such as "First name" or product-specific detections not generally categorized as device posture in Zscaler's framework.

NEW QUESTION # 108

What does the user risk score enable a user to do?

- A. Configure stronger user-specific policies to monitor & control user-level risk exposure.
- B. Compare the user risk score with other companies to evaluate users vs other companies.
- C. Determine if a user has been compromised
- D. Determine whether or not a user is authorized to view unencrypted data.

Answer: A

Explanation:

The user risk score enables organizations to configure stronger user-specific policies to monitor and control user-level risk exposure. This score reflects a user's risk posture based on behaviors and detected anomalies and helps in tailoring security policies to address individual risk levels.

While the score gives insight into user risk, it is primarily designed for adaptive policy enforcement rather than direct compromise detection or cross-company comparison. The study guide highlights that user risk scores drive policy adjustments to better secure user activity.

NEW QUESTION # 109

Can Notifications, based on Alert Rules, be sent with methods other than email?

- A. Leading ITSM systems can be connected to the Zero Trust Exchange using a NSS server, which will then connect to ITSM tools and forwards the alert.
- B. In addition to email, notifications, based on Alert Rules, can be shared with leading ITSM or UCAAS tools over Webhooks.
- C. Email is the only method for notifications as that is universally applicable and no other way of sending them makes sense.
- **D. In addition to email, text messages can be sent directly to one cell phone to alert the CISO who is then coordinating the work on the incident.**

Answer: D

Explanation:

Beyond email, Alert Rule notifications can be pushed via Webhooks to integrate with ITSM platforms or UCaaS tools, enabling real-time incident management and collaboration in your existing service desks or messaging systems.

NEW QUESTION # 110

An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take to avoid having this menu appear?

- **A. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.**
- B. Create only one SAML integration with the desired ZIA instance.
- C. Federate the login domain between two different IDP instances.
- D. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.

Answer: A

Explanation:

To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.

This is outlined under Zscaler's deployment and configuration instructions for ZCC.

NEW QUESTION # 111

Zscaler Platform Services works upon unencrypted data from encrypted communications due to which of the following?

- A. Web Filtering
- **B. TLS Inspection**
- C. Antivirus
- D. Tenant Restrictions

Answer: B

Explanation:
