

Latest NSE5_FNC_AD-7.6 Test Voucher - NSE5_FNC_AD-7.6 Reliable Dumps

The Fortinet NSE5_FNC_AD-7.6 certificate stands out among the numerous certificates because its practicability and role to improve the clients stocks of knowledge and practical ability. Owning a test Fortinet NSE 5 - FortiNAC-F 7.6 Administrator NSE5_FNC_AD-7.6 certificate equals owning a weighty calling card when the clients find jobs and the proof that the clients are the competent people.

Remember that this is a crucial part of your career, and you must keep pace with the changing time to achieve something substantial in terms of a certification or a degree. So do avail yourself of this chance to get help from our exceptional Fortinet NSE5_FNC_AD-7.6 Dumps to grab the most competitive Fortinet NSE5_FNC_AD-7.6 certificate. GuideTorrent has formulated the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) product in three versions. You will find their specifications below to understand them better.

NSE5_FNC_AD-7.6 Reliable Dumps - Valid NSE5_FNC_AD-7.6 Exam Camp

Our NSE5_FNC_AD-7.6 exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as early as possible. Furthermore, NSE5_FNC_AD-7.6 exam dump are high-quality, since we have experienced professionals to edit and verify them. We offer you free demo for you to have a try before buying NSE5_FNC_AD-7.6 Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can enjoy free update for one year for NSE5_FNC_AD-7.6 exam dumps, and the update version for NSE5_FNC_AD-7.6 exam dumps will be sent to your email automatically.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q70-Q75):

NEW QUESTION # 70

When configuring isolation networks in the configuration wizard, why does a layer 3 network type allow for more than one DHCP

scope for each isolation network type?

- A. Configuring more than one DHCP scope allows for DHCP server redundancy
- B. Any scopes beyond the first scope are used if the initial scope runs out of IP addresses.
- C. The layer 3 network type allows for one scope for each possible host status.
- **D. There can be more than one isolation network of each type**

Answer: D

Explanation:

With a layer 3 isolation network type, FortiNAC-F supports multiple isolation networks of the same type, each with its own routed subnet. This design allows administrators to define more than one DHCP scope per isolation network type to accommodate multiple layer 3 isolation segments.

NEW QUESTION # 71

Which two agents can validate endpoint compliance transparently to the end user? (Choose two.)

- **A. Persistent**
- B. Passive
- C. Dissolvable
- **D. Mobile**

Answer: A,D

NEW QUESTION # 72

Refer to the exhibit.

Guest/Contractor template

The screenshot shows the 'Add Guest/Contractor Template' dialog box. The 'Required Fields' tab is selected. The 'Template Name' is 'Engineer-Contractor'. The 'Visitor Type' is 'Contractor'. The 'Role' is set to 'Use a unique Role based on this template name'. The 'Security & Access Value' is 'Eng-Contractor'. The 'Username Format' is 'Email'. The 'Password Length' is '6'. The 'Password Exclusions' are '!@#\$%^&*()_~`-+=~[]{}|;:~<?=>~'. The 'Authentication Method' is 'Local'. The 'Login Availability' is 'Always'. The 'URL for Acceptable Use Policy (optional)' and 'IP Address of URL' fields are empty. The 'Portal Version 1 Settings' link is visible at the bottom left. The Fortinet logo is at the bottom center.

When a contractor account is created using this template, which value is set in the accounts Role field?

- A. Accounting Contractor
- B. Contractor
- C. Eng-Contractor
- **D. Engineer-Contractor**

Answer: D

Explanation:

The template is configured to use a unique role based on the template name. Therefore, when the account is created, the Role field is automatically set to the template name, which is Engineer-Contractor.

NEW QUESTION # 73

Which two statements are true about integrating a third-party device using SNMP traps from that device as input to generate an event? (Choose two.)

- A. set allowaccess snmp must be configured using the CLI on the FortiNAC-F receiving interface.
- **B. The IP address OID and MAC address OID must be configured in the trap MIB file.**
- C. The sending device must support SNMPv3.
- **D. The sending device must be modeled in the inventory topology.**

Answer: B,D

Explanation:

The sending device must be modeled so FortiNAC-F can associate the incoming trap source with a known managed element and process it correctly. The trap definition must include the OIDs that carry the endpoint identifiers (IP and MAC) so FortiNAC-F can extract that data from the trap payload and generate the intended event.

NEW QUESTION # 74

An administrator has created several device profiling rules and evaluated all existing devices in the database. Some of the devices appear in the profiled devices view because they matched a rule, but they remain unknown and the registration column in the profiled devices view shows

"No".

What is the most likely cause?

- A. The device profiling rule has registration set to manual.
- B. The devices match more than one device profiling rule.
- C. The devices have persistent agents installed, and the point of connection has PA optimization enabled.
- **D. The confirm device profiling rule option is not enabled.**

Answer: D

Explanation:

In FortiNAC-F, Device Profiling Rules are used to automatically identify and categorize devices (such as IP cameras, printers, or IoT devices) based on fingerprints like DHCP fingerprints, OIDs, or MAC prefixes. When a device matches a rule, it appears in the Profiled Devices view.

However, matching a rule does not automatically register the device in the database unless the rule is configured to do so. If the devices appear in the view but remain "Unknown" and show

"No" in the registration column, it indicates that the "Confirm" (or "Auto-register") action has not been triggered. In the Device Profiling Rule configuration, there is a setting called "Allow Auto- Approval" or "Confirm". If this is not enabled, the system identifies the device but waits for an administrator to manually approve the match before changing the host status from "Unknown" to "Registered".

This is a common "safety" configuration used during the initial deployment phase to ensure that the profiling rules are accurate before the system begins automatically granting network access based on those matches.

"If a device matches a rule but is not registered, check the rule configuration. The Confirm option (within the Method or Rule settings) determines if the system automatically registers the device upon a match. If Confirm is not enabled, the device will remain in the 'Profiled' state with a registration status of 'No' until an administrator manually promotes the device."

NEW QUESTION # 75

.....

It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good NSE5_FNC_AD-7.6 quiz prep. Because we only pass NSE5_FNC_AD-7.6 exam and get a certificate, we can have the chance to get a decent job and make more money. But there are question is that how you can pass the NSE5_FNC_AD-7.6 Exam and get a certificate. The best answer is to download and learn our NSE5_FNC_AD-7.6 quiz torrent. Our products will help you get what you want in a short time.

NSE5_FNC_AD-7.6 Reliable Dumps: https://www.guidetorrent.com/NSE5_FNC_AD-7.6-pdf-free-download.html

Our website is able to speed up your passing test with our NSE5_FNC_AD-7.6 prep4sure vce and NSE5_FNC_AD-7.6 free dumps, Here, I think it is a good choice to pass the exam at the first time with help of the NSE5_FNC_AD-7.6 Reliable Dumps -

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator actual questions & answer rather than to take the test twice and spend more money, because the money spent on the NSE5_FNC_AD-7.6 Reliable Dumps - Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam dumps must be less than the actual exam fees, We offer you free demo for NSE5_FNC_AD-7.6 free download torrent.

Joe can view, send, receive, organize, and delete email from NSE5_FNC_AD-7.6 his account, Therefore the management techniques from distributed computing are rapidly being adopted in the enterprise.

Our website is able to speed up your passing test with our NSE5_FNC_AD-7.6 prep4sure vce and NSE5_FNC_AD-7.6 free dumps, Here, I think it is a good choice to pass the exam at the first time with help of the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator actual questions & answer rather than to take the NSE5_FNC_AD-7.6 Official Cert Guide test twice and spend more money, because the money spent on the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam dumps must be less than the actual exam fees.

NSE5_FNC_AD-7.6 Exam Latest Test Voucher & Useful NSE5_FNC_AD-7.6 Reliable Dumps Pass Success

We offer you free demo for NSE5_FNC_AD-7.6 free download torrent, With their lower price, the advantage of GuideTorrent NSE5_FNC_AD-7.6 Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Practice Questions is enormous and unmatched!

By taking our Fortinet NSE5_FNC_AD-7.6 practice exam, which is customizable, you can find and strengthen your weak areas.
