Zscaler Digital Transformation Administrator Exam Sheets - ZDTA Free Training & ZDTA Study Review

The Zscaler Digital Transformation Administrator certification exam is one of the top-rated career advancement ZDTA certifications in the market. This Zscaler Digital Transformation Administrator certification exam has been inspiring candidates since its beginning.

Over this long period, thousands of Zscaler Digital Transformation Administrator exam candidates have passed their ZDTA Certification Exam and now they are doing jobs in the world's top brands.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.
Topic 2	<ul style="list-style-type: none">Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLSSSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 3	<ul style="list-style-type: none">Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response.] Data Protection Services
Topic 4	<ul style="list-style-type: none">This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 5	<ul style="list-style-type: none">Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.
Topic 6	<ul style="list-style-type: none">Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 7	<ul style="list-style-type: none">Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.

Zscaler Digital Transformation Administrator Sample Questions (Q92-Q97):

NEW QUESTION # 92

In support of data privacy about TLS/SSL inspection, when you subscribe to ZIA, you enter into what kind of agreement?

- A. Acceptable Use Policy
- B. Zscaler Compliance Policy
- C. Zscaler Privacy Policy
- D. Zscaler Data Processing Agreement

Answer: D

Explanation:

When you sign up for Zscaler Internet Access - and enable TLS/SSL inspection - you enter into Zscaler's Data Processing Agreement, which governs how customer data (including decrypted TLS traffic) is handled in compliance with privacy laws.

NEW QUESTION # 93

Which type of malware is specifically used to deliver other malware?

- A. Maldocs
- **B. Downloaders**
- C. Exploitation tool
- D. RAT

Answer: B

Explanation:

Downloaders are a specific type of malware whose primary purpose is to download and install other malicious software onto a victim's machine. Unlike standalone threats, downloaders typically establish initial access and then retrieve payloads like ransomware, trojans, or spyware from a command and control server.

Their role in the malware chain is fundamental for multi-stage attacks.

NEW QUESTION # 94

When a SAML IDP returns an assertion containing device attributes, which Zscaler component consumes the attributes first, for policy creation?

- A. Enforcement node
- B. Zscaler SAML SP
- **C. Zero Trust Exchange**
- D. Mobile Admin Portal

Answer: C

Explanation:

When a SAML Identity Provider (IdP) returns an assertion containing device attributes, these attributes are first consumed by the Zero Trust Exchange component. This component uses the device attributes for policy creation and enforcement decisions, integrating identity and device posture information to make dynamic access decisions.

NEW QUESTION # 95

How would an administrator retrieve the access token to use the Zscaler One API?

- A. The administrator needs to send a GET request along with the required parameters to ZIdentity's token endpoint.
- B. The administrator needs to logon to the ZIA portal to generate the access token with Super Admin role.
- C. The administrator needs to logon to the ZIA portal to generate the access token with API Admin role.
- **D. The administrator needs to send a POST request along with the required parameters to ZIdentity's token endpoint.**

Answer: D

Explanation:

You obtain the Zscaler One API access token by sending a POST request with your client_id, client_secret (and any other required parameters) to ZIdentity's OAuth2 token endpoint, which then returns a JWT you use for subsequent API calls.

NEW QUESTION # 96

Layered defense throughout an organization security platform is valuable because of which of the following?

- A. Layered defense with multiple endpoint agents protects from attackers.
- B. Layered defense ensures attackers are prevented eventually.
- C. Layered defense from multiple vendor solutions easily share attacker data.
- **D. Layered defense increases costs to attackers to operate.**

Answer: D

Explanation:

By deploying multiple, overlapping security controls at different layers, you force adversaries to overcome each barrier, significantly raising the cost, complexity, and time required for a successful attack.

NEW QUESTION # 97

.....

Zscaler exam guide have to admit that the exam of gaining the Zscaler certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the ZDTA latest questions are a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the ZDTA Exam, do not worry, we are glad to help you. Because the ZDTA cram simulator from our company are very useful for you to pass the exam and get the certification.
