NCP-CN-6.10 Real Test Practice Materials - NCP-CN-6.10 Study Guide - Pass4suresVCE

Pass4suresVCE have the obligation to ensure your comfortable learning if you have spent money on our NCP-CN-6.10 study materials. We do not have hot lines. The pass rate of our NCP-CN-6.10 is as high as more then 98%. And you can enjoy our considerable service on NCP-CN-6.10 exam questions. So you are advised to send your emails to our email address. In case you send it to others' email inbox, please check the address carefully before. The after-sales service of website can stand the test of practice. Once you trust our NCP-CN-6.10 Exam Torrent, you also can enjoy such good service.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q96-Q101):

NEW QUESTION # 96
Prior to implementing NKP, a company had created a number of Kubernetes (K8s) clusters using kubeadm. While they are deploying new managed clusters via NKP, the company does not wish to migrate workloads from these pre-existing native K8s clusters over to new NKP clusters just yet. What are the requirements to have these clusters attached to their NKP management cluster?

- A. The version of the K8s clusters must match the Kubernetes version of the NKP management cluster.
- B. The NKP management cluster must be able to reach the services and api-server of the target cluster.
- C. The version of the K8s clusters must be within N - 1 of the Kubernetes version of the NKP management cluster.
- D. An NKP management cluster admin account must be established on the K8s clusters.

Answer: B

NEW QUESTION # 97

What common issues may cause a cluster detachment process to fail? (Select two)

- A. Active platform applications still running on the cluster
- B. Incomplete uninstallation of workspace-level configurations
- C. Mismatched Prometheus metrics retention settings
- D. The cluster being paused in the infrastructure provider

Answer: A,B

NEW QUESTION # 98

A Platform Engineer is preparing an AWS instance using KIB for becoming an NKP cluster node.
During the process, the source AMI is successfully cloned, and multiple preparation steps have occurred against the cloned AMI, such as gathering OS-release facts and uploading image bundles to it. However, the process encounters an error and ultimately fails. What is one troubleshooting step the engineer can perform that may help identify the root cause of the issue?

- A. Rerun the KIB command, including the parameter to set the verbosity level to debug, so that all issued AWS CLI commands and their returns are included and added to an exported log file for review.
- B. Rerun the KIB command, including the pause parameter, so that each command in the KIB-prep sequence and its return can be reviewed in detail before allowing the prep process to continue.
- C. Rerun the KIB command, including the parameter to instruct Ansible not to automatically delete the cloned AMI on error. This way the OS image can be accessed and further inspected.
- D. Rerun the KIB command, including the parameter to instruct Packer not to automatically delete the cloned AMI on error. This way the OS image can be accessed and further inspected.

Answer: A

NEW QUESTION # 99

A Platform Engineer will be deploying an NKP cluster in a dark site with no Internet access. The Cloud Administrator has provided a Linux VM for this purpose, so the engineer needs to prepare this VM to be used as a bastion host. Which two actions should the engineer take to complete this task? (Choose two.)

- A. Install LDAP Server.
- B. Enable NTP Service.
- C. Install Docker.
- D. Get or create SSH Keys.

Answer: B,D

NEW QUESTION # 100

A Platform Engineer is preparing machine images for NKP through the NIB or KIB process. What is the purpose of doing this?

- A. Tagging the image to be used specifically for NKP
- B. Hardening an OS image with client-supplied hardening scripts
- C. Creating a CAPI-compliant image for use as NKP cluster nodes
- D. Creating a custom user account for NKP admins to ensure access to NKP nodes

Answer: C

NEW QUESTION # 101

......

The NCP-CN-6.10 Exam practice software is based on the real NCP-CN-6.10 exam dumps. The interface of NCP-CN-6.10 exam practice software is user-friendly so you will not face any difficulty to become familiar with it. Practice test software contains

simulated real NCP-CN-6.10 exam scenario. It has numerous self-learning and self-assessment features to test their learning. Our software exam offers you statistical reports which will upkeep the students to find their weak areas and work on them. We guarantee if you trust the NCP-CN-6.10 Exam Practice test software, getting the highest score in the actual NCP-CN-6.10 exam will not be difficult anymore.
