

SAP C_TS422_2023 Exam | C_TS422_2023 Latest Questions - Money Back Guaranteed of Exam C_TS422_2023 Pattern

What's more, part of that Dumpleader C_TS422_2023 dumps now are free: <https://drive.google.com/open?id=1LChge8T1pByt#96NPc1zgWtbiN7lMYcd>

We have brought in an experienced team of experts to develop our C_TS422_2023 study materials, which are close to the exam syllabus. With the help of our C_TS422_2023 study materials, you don't have to search all kinds of data, because our products are enough to meet your needs. You also don't have to spend all your energy to the exam because our C_TS422_2023 Study Materials are very efficient. Only should you spend a little time practicing them can you pass the exam successfully.

In our lives, we will encounter many choices. Some choices are so important that you cannot treat them casually. The more good choice you choose in your life, the more successful you are. Perhaps our C_TS422_2023 exam guide can be your correct choice. Our study guide is different from common test engine. Also, the money you have paid for our C_TS422_2023 Study Guide will not be wasted. We sincerely hope that our test engine can teach you something. Of course, you are bound to benefit from your study of our C_TS422_2023 practice material.

Exam C_TS422_2023 Pattern & C_TS422_2023 Official Practice Test

Customizable SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice tests allow users set the time and C_TS422_2023 questions according to their needs. SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) Practice exams simulate the real test so applicants can prepare as per the actual exam's pressure and handle it in the final test. Dumpleader has a team of professionals who update the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice material daily so the user can get the full out of it and pass SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) certification exam pretty easily.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q29-Q34):

NEW QUESTION # 29

What does the material type influence? Note: There are 2 correct answers to this question.

- A. Which plant-specific and plant-independent statuses are allowed
- B. Which document types and class categories are allowed
- C. Whether the material is produced in-house, procured externally, or both
- D. Which material master screens appear and in which sequence

Answer: B,D

Explanation:

The material type in SAP S/4HANA (selected in MM01, configured via OMS2) defines a material's properties and behavior:

* Which document types and class categories are allowed(A): Material type determines which business documents (e.g., purchase orders, production orders) can be created and which classification categories (e.g., batch, variant) apply. For example, "FERT" allows production orders, while "NLAG" (non-stock) restricts inventory documents (configured in Logistics - General > Material Master > Define Attributes of Material Types).

* Which material master screens appear and in which sequence(C): Material type controls the views available in the material master (e.g., MRP for "FERT," no Sales view for "ROH") and their order, based on Customizing (OMS2, field selection and view sequence). This tailors the interface to the material's purpose.

Plant-specific and plant-independent statuses(B) are managed via material status (Basic Data view), not material type-type defines broader attributes. Whether produced in-house or procured(D) is set by the Procurement Type (MRP 2 view), not directly by material type, though type may imply defaults (e.g., "ROH" for procurement). This is per SAP's material type definition.

NEW QUESTION # 30

Advanced Planning uses master data from SAP S/4HANA Cloud Private Edition. In which data objects can you set the Advanced Planning flag?

Note: There are 2 correct answers to this question.

- A. Plant
- B. Work center
- C. Production version
- D. Material

Answer: B,D

Explanation:

In SAP S/4HANA Cloud Private Edition, Advanced Planning (PP/DS) integrates with core master data, and the "Advanced Planning" flag activates PP/DS-specific planning. This flag can be set in:

* Work center(A): In the work center (transaction CR02, Basic Data tab, field: Advanced Planning), checking this flag (or integrating with a resource in APO/PP/DS) enables detailed scheduling and capacity planning in PP/DS. It designates the work center as a resource for finite scheduling (e.g., in /SAPAPO/RES01).

* Material(D): In the material master (MM02, Advanced Planning tab, field: PP/DS Planning), activating this flag makes the material relevant for PP/DS planning. It enables features like detailed scheduling, heuristics, and integration with APO or embedded PP/DS functionalities.

Plant(B) doesn't have an Advanced Planning flag-PP/DS activation is at the system or object level (e.g., via CIF integration model), not plant-specific. Production version(C) (MRP 4 view) links BOMs and routings but lacks a specific PP/DS flag-its relevance comes from the material and work center settings. This is per SAP's PP/DS master data setup.

NEW QUESTION # 31

Under what circumstances can you change the material type for a material if stocks, reservations, or purchasing documents exist? Note: There are 2 correct answers to this question.

- A. The quantity and value updates are the same
- B. The same base unit of measure is used.
- C. The same account category is used
- D. The same batch management level is used

Answer: A,B

Explanation:

You can change the material type for a material if stocks, reservations, or purchasing documents exist only if the following conditions are met:

The same base unit of measure is used. This ensures that the material quantity is consistent across different material types.

The quantity and value updates are the same. This ensures that the material valuation is consistent across different material types.

The material is not subject to split valuation. This ensures that the material has only one valuation class and price control. Reference: [SAP Help Portal] - Change Material Type

NEW QUESTION # 32

Your project team decided to use a make-to-order planning strategy material in discrete manufacturing.

What is the impact of this decision?

Note: there are 2 correct answers to this question

- A. Sales orders have to be ATP-confirmed (available-to-promise) to be saved.
- B. Both the reduction of make-to-order stock and requirements occur on delivery
- C. Net requirement calculation is carried out for every sales order individually.
- D. Production orders are created with sales order reference.
- E. Storage Location MRP areas are required for sales-orders-specific stock.

Answer: C,D

Explanation:

In make-to-order production, the production planning is initiated only when a sales order is received. The system does not perform a net requirements calculation between individual sales orders or with the make-to-stock warehouse stock¹. Therefore, option B is correct. Additionally, production orders are created with sales order reference, which means that the costs and revenues of the sales order are settled at the end of the production process². Therefore, option E is also correct. The other options are not valid for make-to-order production. Storage location MRP areas are not required for sales-order-specific stock, as the stock is managed at the sales order level³. The reduction of make-to-order stock and requirements does not occur on delivery, but on goods issue to the sales order¹. Sales orders do not have to be ATP-confirmed to be saved, as the availability check is optional and can be performed later. NEW QUESTION # 33

You have maintained the parameters for simple discontinuation in the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- A. Material requirements planning
- B. Kanban
- C. Backflushing
- D. Production order release

Answer: A

Explanation:

Simple discontinuation in SAP S/4HANA (material master, MRP 4 view, fields: Discontinuation Indicator, Effective-Out Date, Follow-Up Material) replaces a discontinued component with a follow-up material when stock is depleted. If the available stock is zero and the discontinuation date is in the past:

* Material requirements planning(C): MRP (MD01/MD02) is affected because it checks the discontinuation settings. When stock is zero and the effective-out date has passed, MRP stops generating requirements for the discontinued material and creates them for the follow-up material instead (visible in MD04). This ensures planning continuity with the replacement.

Backflushing(A) (e.g., during CO11N) uses existing stock or reservations, not directly impacted by discontinuation unless stock is unavailable-but it's a downstream process.Kanban(B) relies on replenishment triggers, not discontinuation logic, though stock-outs could disrupt it indirectly.Production order release(D) (CO02) checks material availability, but discontinuation is handled in MRP, not at release.

This is per SAP's discontinuation process.

NEW QUESTION # 34

.....

Dumpleader has collected the frequent-tested knowledge into our C_TS422_2023 practice materials for your reference according to our experts' years of diligent work. So our C_TS422_2023 exam materials are triumph of their endeavor. By resorting to our C_TS422_2023 practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our C_TS422_2023 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our C_TS422_2023 exam questions.

Exam C_TS422_2023 Pattern: https://www.dumpleader.com/C_TS422_2023_exam.html

In this hustling society, our C_TS422_2023 practice materials are highly beneficial existence which can not only help you master effective knowledge but pass the exam effectively, SAP C_TS422_2023 Latest Questions People are engaged in modern society, Dumpleader's web-based C_TS422_2023 practice exam promotes self-assessment and self-study, C_TS422_2023 preparation material guarantee that you will get most excellent and simple method to pass your certification C_TS422_2023 exams on the first attempt.

These Timelines can also work together, Based on Real C_TS422_2023 Exams Scenarios, In this hustling society, our C_TS422_2023 practice materials are highly beneficial existence C_TS422_2023 which can not only help you master effective knowledge but pass the exam effectively.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Trustworthy exam Practice & C_TS422_2023 exam training pdf & SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing updated study material

People are engaged in modern society, Dumpleader's web-based C_TS422_2023 practice exam promotes self-assessment and self-study, C_TS422_2023 preparation material guarantee that you will get most excellent and simple method to pass your certification C_TS422_2023 exams on the first attempt.
