Excellent Fortinet Key FCP_FMG_AD-7.6 Concepts Are Leading Materials & Effective New FCP_FMG_AD-7.6 Test Practice

How can our FCP_FMG_AD-7.6 exam questions be the best exam materials in the field and always so popular among the candidates? There are two main reasons. First of all, we have a professional team of experts, each of whom has extensive experience on the FCP_FMG_AD-7.6 study guide. Secondly, before we write FCP_FMG_AD-7.6 Guide quiz, we collect a large amount of information and we will never miss any information points. Of course, we also fully consider the characteristics of the user. So we can make the best FCP_FMG_AD-7.6 learning questions.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 2	• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 3	• Troubleshooting
Topic 5	• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Topic 7	• Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

Premium Fortinet FCP_FMG_AD-7.6 Questions

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q71-Q76):

NEW QUESTION # 71
Refer to the exhibit. Which two actions will occur if you run the script using the Remote FortiGate Directly (via CLI) option? (Choose two.)

- A. FortiManager will provide a preview of CLI commands before executing this script on a managed FortiGate.
- B. You will have to install these changes using the Install Wizard.
- C. FortiManager will create a new revision history.
- D. FortiGate will auto-updated the FortiManager device-level database.

Answer: C,D

Explanation:
When you run a script using "Remote FortiGate Directly (via CLI)", FortiManager logs the configuration changes and creates a new revision history for the device.
Since the script is executed directly on the FortiGate, the FortiGate device automatically updates FortiManager's device-level database after the script is successfully applied.

NEW QUESTION # 72
Refer to the exhibits. An administrator admin used the Configuration Revision History window to revert the FortiGate device configuration to revision ID 6. After running the reinstall policy package, the administrator noticed problems with the firewall policy-they could not see the unset comment on policy ID 1.
Why did FortiManager not remove the comment from policy ID 1 when the administrator ran reinstall policy package?

- A. Because the administrator must import the firewall policies to update the firewall policy package.
- B. Because the administrator used the Revision Diff view, which shows what changed, not what will be installed.
- C. Because the administrator student must install the configuration changes to correctly see the expected results.
- D. Because every time the administrator uses the revert configfile, they must use the Install Wizard instead of running the reinstall policy package.

Answer: A

Explanation:

Reverting the configuration on the FortiGate directly does not update FortiManager's internal policy package.
FortiManager does not automatically sync with what's on the FortiGate device after a manual configuration revert or change directly on the FortiGate.

NEW QUESTION # 73
Refer to the exhibits.
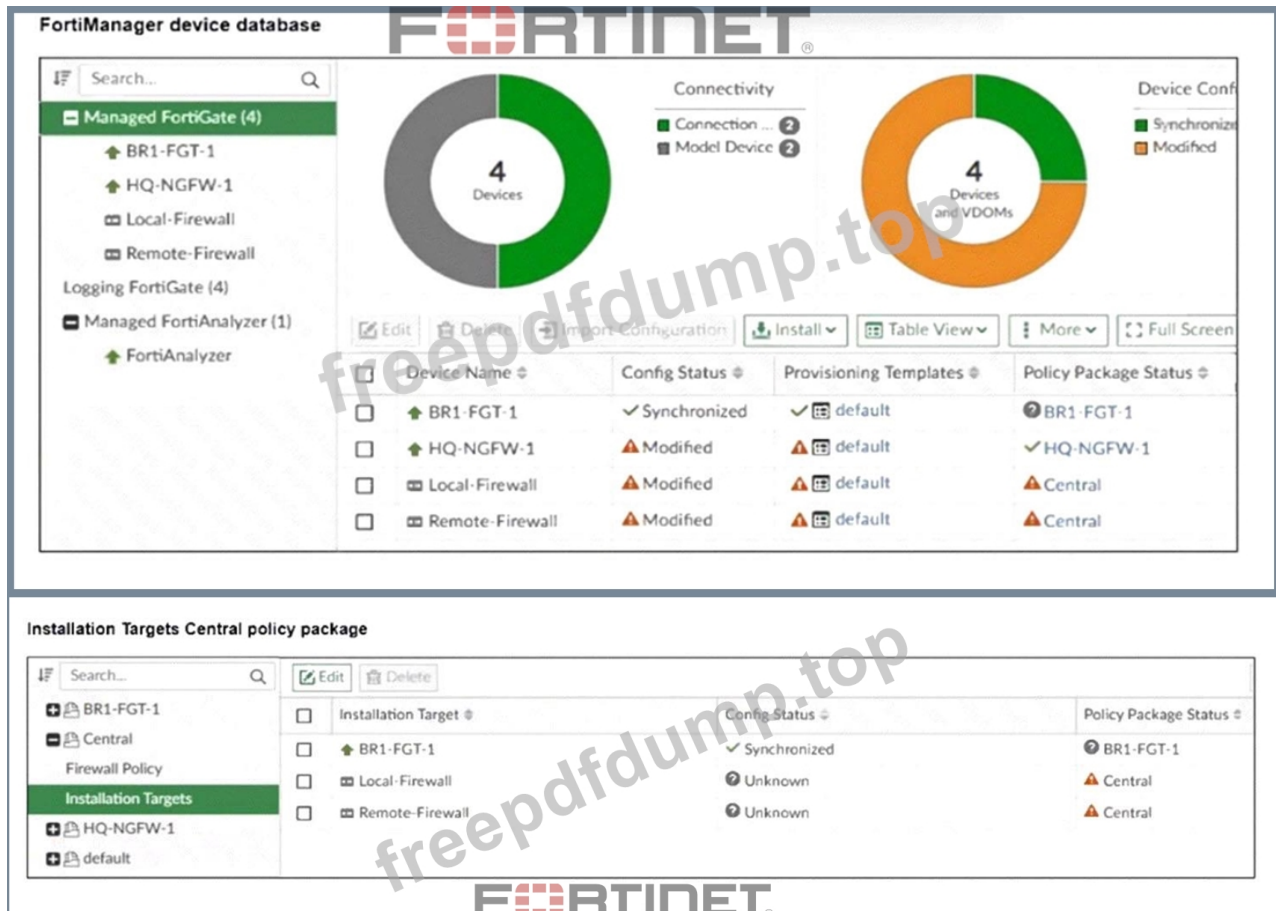

An administrator has been asked to install the same policies from a central policy package onto the BR1-FGT-1 firewall.
The administrator added BR1-FGT-1 as a target in the central policy package installation.
What should the administrator do when reinstalling the central policy package on the BR1-FGT-1 firewall?

- A. Assign only one policy package to the firewall because FortiManager does not allow more than one policy package assigned per device at the same time.
- B. Import the policy package to change the unknown status and synchronize the policy package.
- C. First resolve the modified status in the configuration and provisioning templates to allow a smooth installation.
- D. Use the install wizard to install the central policy package on the BR1-FGT-1 firewall.

Answer: D

Explanation:
Using the Install Wizard is the recommended method to reinstall the central policy package on the BR1-FGT-1 firewall, ensuring all settings, installation targets, and dependencies are correctly processed during installation.

NEW QUESTION # 74
You are moving managed FortiGate devices from one ADOM to a new ADOM.
Which statement correctly describes the expected result?

- A. Policy packages will be imported into the new ADOM automatically.
- B. The shared device settings will be installed automatically.
- C. Any unused objects from a previous ADOM are moved to the new ADOM automatically.

- D. The shared policy package will not be moved to the new ADOM automatically.

Answer: D

Explanation:
When you move devices from one ADOM to another ADOM, shared policy packages and objects do not move to the new ADOM. You will need to import policy packages from managed devices.

NEW QUESTION # 75
Company policy dictates that any time a change is made to a policy package on FortiManager an ADOM revision is created before the change installed, and that revision is held for a minimum of 90 days.
Over the past three months, each installed change has resulted in several unused policies and duplicate objects.
The FortiManager administrator plans to upgrade the FortiGate devices and then upgrade the FortiManager ADOM from version 7.4 to 7.6.
Which action can the administrator take to avoid slow ADOM upgrades?

- A. Limit ADOM revisions before upgrading.
- B. Check and repair the global configuration database before upgrading.
- C. Find unused firmware templates, then delete them before upgrading.
- D. Export firewall policies to Excel, delete them on the ADOM. then reimport them after upgrading the ADOM.

Answer: A

Explanation:
Limiting ADOM revisions reduces the number of stored historical configurations, which helps avoid performance degradation and slow ADOM upgrades caused by a large volume of revisions.

NEW QUESTION # 76
......

As a matter of fact, long-time study isn't a necessity, but learning with high quality and high efficient is the key method to assist you to succeed. We provide several sets of FCP_FMG_AD-7.6 test torrent with complicated knowledge simplified and with the study content easy to master, thus limiting your precious time but gaining more important knowledge. Our study materials are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience, FCP_FMG_AD-7.6 Certification Training is absolutely good choices for you. Therefore, you have no need to worry about whether you can pass the exam, because we guarantee you to succeed with our technology strength.
