### SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

#### NEW QUESTION # 40

When using the Local SAP S/4HANAA Database Schema migration approach, what is the maximum file size? Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 160 MB per file
- C. 100 MB per ZIP file
- D. 100 MB per file

**Answer: C,D**

#### NEW QUESTION # 41

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Private Cloud
- B. Software as a Service
- C. Platform as a Service
- D. Infrastructure as a Service
- E. On premise

**Answer: A,C,E**

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

\* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

\* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

\* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

### NEW QUESTION # 42

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Customer system admin
- B. Partner lead configuration expert
- C. Partner project manager
- D. Customer project manager

Answer: A

### NEW QUESTION # 43

Which of the following activities are completed in the Realize phase of the SAP Activate Methodology? Note: There are 2 correct answers to this question.

- A. Demonstrate where to find business process documentation
- B. Enter configuration values in SAP Central Business Configuration
- C. Gather perceived change impact feedback
- D. Set up manual test cases in SAP Cloud ALM

Answer: B,D

### NEW QUESTION # 44

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. Business Driven Configuration Questionnaire
- B. SAP Cloud ALM Processes app
- C. SAP Cloud ALM Requirements app
- D. Availability and Dependencies of Solution Processes Excel

Answer: A

Explanation:

The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. References = Business Driven Configuration Questionnaire, Importing Configuration Values from Business Driven Configuration Questionnaire, Using SAP Central Business Configuration to Activate Content in the SAP S/4HANA Cloud Starter System

### NEW QUESTION # 45
