

Test C_DBADM_2601 Dumps, Actual C_DBADM_2601 Test Answers

If you want to participate in the IT industry's important SAP C_DBADM_2601 examination, it is necessary to select PassReview SAP C_DBADM_2601 exam training database. Through SAP C_DBADM_2601 examination certification, you will be get a better guarantee. In your career, at least in the IT industry, your skills and knowledge will get international recognition and acceptance. This is one of the reasons that why lot of people choose SAP C_DBADM_2601 certification exam. So this exam is increasingly being taken seriously. So this exam is increasingly being taken seriously. PassReview SAP C_DBADM_2601 Exam Training materials can help you achieve your aspirations. PassReview SAP C_DBADM_2601 exam training materials are produced by the experienced IT experts, it is a combination of questions and answers, and no other training materials can be compared. You do not need to attend the expensive training courses. The SAP C_DBADM_2601 exam training materials of PassReview add to your shopping cart please. It is enough to help you to easily pass the exam.

All formats of PassReview's products are immediately usable after purchase. We also offer up to 365 days of free updates so you can prepare as per the SAP C_DBADM_2601 Latest Exam content. PassReview offers a free demo version of the SAP Certification Exams so that you can assess the validity of the product before purchasing it.

Actual C_DBADM_2601 Test Answers - Exam C_DBADM_2601 Review

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the C_DBADM_2601 test guide absolutely excellent quality and reasonable price, because the more times the user buys the C_DBADM_2601 test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the C_DBADM_2601 learning questions, our staff will help solve them as soon as possible.

SAP Certified - Database Administrator - SAP HANA Sample Questions (Q79-Q84):

NEW QUESTION # 79

CHALLENGE 4 - Release Recoverability Evidence Gate

The business sponsor asks whether the release decision can proceed because the systems are available and backups completed. The administration lead wants startup behavior after recovery documented first. Which response best fits the scenario?

- A. Proceed now and validate startup behavior during the later cloud migration phase.
- B. Proceed because availability and backup completion together are enough for release evidence.
- C. Remove recovery evidence from the release package because UAT is not daily production.
- **D. Complete recovery validation and startup behavior documentation before final sign-off.**

Answer: D

Explanation:

Feedback:

Recovery validation and startup behavior documentation should be completed before final sign-off. The scenario requires continuity evidence that goes beyond availability and backup completion.

NEW QUESTION # 80

CHALLENGE 3 - Freight Cloud Readiness Boundary

The project team wants to approve cloud migration planning using three facts: the SAP HANA Cloud database is provisioned, freight sample data is loaded, and on-premises cutover reports run successfully. Which validation step is still required?

- A. Stop on-premises cutover validation because the future reporting direction is cloud-based.
- B. Treat the freight sample dataset as proof that cloud monitoring and recovery evidence are complete.
- **C. Confirm cloud administration readiness evidence for the freight sample dataset scope.**
- D. Approve migration planning because the three facts cover the full readiness chain.

Answer: C

Explanation:

Feedback:

Cloud administration readiness evidence is still required for the freight sample dataset scope. Provisioning and data loading support planning, but they do not complete cloud readiness validation.

NEW QUESTION # 81

A consumer goods company runs SAP HANA for daily operational dashboards in a mixed landscape. The database remains available, but SAP HANA cockpit shows repeated alert notifications for disk usage growth in a data volume. The administrator checks recent workload activity and confirms that dashboard execution still completes successfully. A support analyst proposes acknowledging the alerts because no user-facing outage has occurred.

The constraint is that the administrator must prevent the monitoring artifact from becoming an execution-impacting condition while avoiding unnecessary database restart activity during business hours. The operations manager needs evidence that the alert is being handled at the correct system layer before the next reporting cycle begins.

Which action best addresses the monitoring condition?

- A. Acknowledge the alert and wait for user reports because dashboard execution currently completes successfully.
- **B. Investigate volume growth and related workload activity, correct the capacity condition, and validate that the alert state clears.**
- C. Increase the alert threshold so the current warning no longer appears during normal dashboard execution.
- D. Restart the database so disk usage indicators refresh before the next reporting cycle begins.

Answer: B

Explanation:

Feedback:

This acts at the operational resource layer indicated by the alert artifact. Reviewing growth behavior, correcting the capacity condition, and validating alert clearance confirms that monitoring, resource state, and execution readiness are aligned before the next reporting cycle.

NEW QUESTION # 82

CHALLENGE 3 - Cloud Transition Evidence Boundary

The modernization lead wants the SAP HANA Cloud database included in the same readiness status as the remediation systems because it is provisioned and has a limited reporting dataset. The cloud environment has not completed the startup, monitoring, or recovery evidence package used for the template release. What is the best response?

- A. Keep cloud transition evidence separate until cloud-specific administration validation is completed.
- B. Use the upgraded central system monitoring record as the SAP HANA Cloud readiness record.
- C. Include the cloud database in the same readiness status because provisioning and test data show progress.
- D. Stop modernization planning until the regional template release is fully completed.

Answer: A

Explanation:

Feedback:

Cloud transition evidence should remain separate until cloud-specific administration validation is completed. Provisioning and limited data support migration planning, but they do not equal template release readiness.

NEW QUESTION # 83

A regional rail services company uses SAP HANA for maintenance planning analytics. The administrator reviews recovery readiness after a backup configuration update. SAP HANA cockpit shows a recent successful data backup, and log backups are being created. During validation, the recovery checklist shows that the log backup location recorded for restore operations differs from the active log backup destination now used by the system. The operations team suggests approving readiness because both data and log backups exist.

The constraint is that the administrator must prove that restore procedures reference the active backup locations before accepting recovery readiness. The team must avoid a situation where backups exist but the documented recovery path cannot retrieve them. What should the administrator do next?

- A. Create another data backup and use its catalog entry as the primary recovery evidence.
- B. Approve recovery readiness because the system has recent data and log backup artifacts.
- C. Update and validate the recovery checklist against the active log backup destination, then rerun restore-path validation.
- D. Disable log backup creation until the documented restore location and active destination match again.

Answer: C

Explanation:

Feedback:

This resolves the restore-path mismatch at the recovery procedure layer. Updating and validating the checklist against the active destination confirms that backup creation, location documentation, retrieval path, and restore validation are aligned.

NEW QUESTION # 84

.....

Our C_DBADM_2601 test questions are compiled by domestic first-rate experts and senior lecturer and the contents of them contain all the important information about the test and all the possible answers of the questions which maybe appear in the test. You can use the practice test software to check your learning outcomes. Our C_DBADM_2601 test practice guide' self-learning and self-evaluation functions, the statistics report function, the timing function and the function of stimulating the test could assist you to find your weak links, check your level, adjust the speed and have a warming up for the real exam. You will feel your choice to buy C_DBADM_2601 Exam Dump is too right.

Actual C_DBADM_2601 Test Answers: https://www.passreview.com/C_DBADM_2601_exam-braindumps.html

PassReview Actual C_DBADM_2601 Test Answers values the time and money of its customers, With our experts and professors' hard work and persistent efforts, the C_DBADM_2601 study materials from our company have won the customers' strong support in the past years, SAP C_DBADM_2601 focuses on the success of its candidates, You can download C_DBADM_2601 dumps pdf files on your laptop, tablet, smartphone, or any other device.

Software Craftsmen Push for What They Need, I generally C_DBADM_2601 consider extended warranties a bad deal, PassReview values the time and money of its customers, With our experts and professors' hard work and persistent efforts, the C_DBADM_2601 Study Materials from our company have won the customers' strong support in the past years.
