Navigate to the section where snapshot or replication rules are managed. Click on "Create Rule" or the equivalent button. Enter the rule name as "2x5x14". Set the schedule for snapshots to occur every 12 hours during weekdays (Monday to Friday). Set the retention period to keep the snapshots for 14 days. Ensure the access type is set to "Snapshot". Save the snapshot rule.
Create a New Protection Policy
Go to the protection policies section. Click on "Create Policy" or the equivalent option. Name the policy "Bronze". Associate the snapshot rule "2x5x14" with this policy. Save the new policy.
Apply the Protection Policy to VM1
Navigate to the section where VMs are listed. Select "VM1" from the list of virtual machines. Access the configuration settings for VM1. Look for a tab or section labeled "Data Protection", "Protection Policies", or similar. Select the "Bronze" policy from the list of available protection policies.
