## valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-eaep2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

## EAEP2201 Exams - EAEP2201 Vce Exam

You may have been learning and trying to get the EAEP2201 certification hard, and good result is naturally become our evaluation to one of the important indices for one level. You need to use our EAEP2201 exam questions to testify the knowledge so that you can get the EAEP2201 Test Prep to obtain the qualification certificate to show your all aspects of the comprehensive abilities, and the EAEP2201 exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q19-

## Q24):

### NEW QUESTION # 19

A GIS administrator works for the Department of Transportation. Users need to analyze decades of traffic and crash data to determine the interstates with the most incidents. They will also analyze when certain vehicles were speeding and braking, and then correlate this data with vehicular accident locations.

Which server must be configured to support this workflow?

- A. GeoEvent Server
- B. Notebook Server
- C. GeoAnalytics Server

**Answer: A**

### NEW QUESTION # 20

An organization configures an ArcGIS Enterprise portal to allow single sign-on using Integrated Windows Authentication (IWA).

Configuration includes:

- \* All accounts in the Active Directory group gisusers are added to the portal
- \* Existing users can sign in without entering credentials However, new employees assigned to the same gisusers group cannot log in, create content, or join groups. What is causing this issue for the new employees?

- A. Their Active Directory accounts have been assigned an incompatible default user type
- B. Their Active Directory accounts have not had sufficient time to sync to the portal
- C. Their Active Directory accounts have not been added to the portal
- D. The Web Adaptor cache must be cleared

**Answer: C**

Explanation:

For IWA authentication, Active Directory users are not automatically added to the ArcGIS Enterprise portal. They must either be:

- \* Manually added as members, or
- \* Automatically created at first login if auto-creation is enabled.

Since the new users are assigned to the gisusers group but cannot sign in or create content, it's clear that their accounts have not yet been added to the portal.

From ArcGIS Enterprise documentation:

"Integrated Windows Authentication (IWA) allows users to sign in with their Windows credentials. However, users must still be members of the portal. You can manually add users or enable automatic account creation during login."

- \* Option B is invalid since default user type settings do not prevent login.
- \* Option C is incorrect because synchronization is not time-based-it's account-creation dependent.

### NEW QUESTION # 21

A GIS administrator must automate certain data workflows and administrative tasks in ArcGIS Enterprise.

The administrator must meet several requirements:

- \* The processes and methods must be well and thoroughly documented
- \* An option must be provided to modify the processes on the fly
- \* Scripts and processes must be shared to different individuals throughout the ArcGIS Enterprise organization Which ArcGIS Server role should be used to meet these requirements?

- A. ArcGIS Notebook Server
- B. ArcGIS GeoEvent Server
- C. ArcGIS Workflow Manager Server

**Answer: C**

### NEW QUESTION # 22

Multiple users report that a map service is experiencing negative performance. Upon review of ArcGIS Monitor data, the GIS

analyst finds the following:

- \* The minimum number of instances is 2 and the maximum is 8 for that service.
- \* The data is in a publication Enterprise Geodatabase with no system usage in excess of 50%.
- \* At the p75 level of requests, the map service time is 10 times longer than the service time at the p25 level.
- \* The number of instances in use at the p50 level is 8.
- \* The maximum % of physical memory in use is 40%, and the maximum % of virtual memory in use is 44% on the ArcGIS Server.
- \* The maximum % CPU utilization observed is 53%.

What is causing the issue?

- A. The maximum instance setting is too low for the demand on the underperforming map service.
- B. The network connection between the database server and ArcGIS Server is saturated.
- C. The client is an Android device, and the ArcGIS Server is a Linux virtual machine.

**Answer: A**

Explanation:

The ArcGIS Monitor data indicates that the map service is reaching its maximum configured instances (8) at the median usage level (p50), suggesting that the service cannot scale to meet higher demand. The significant increase in service time at the p75 level further supports that the service is under-provisioned. Since system resources like CPU and memory are not fully utilized, the bottleneck is likely due to the instance configuration. Increasing the maximum number of instances would allow the service to handle more concurrent requests, improving performance.

There is no evidence of network saturation or client-specific issues affecting performance in this scenario.

### NEW QUESTION # 23

Some members of an ArcGIS Enterprise organization are unable to create web maps and web scenes. The users are only responsible for creating stories with ArcGIS StoryMaps.

What should the GIS administrator do to prevent confusion about non-accessible functionality to those users?

- A. Configure a maintenance notification to explain the access limitation in Portal for ArcGIS
- B. Configure the ArcGIS Enterprise home page to show only items that are accessible to the signed-in user
- C. Configure Page visibility settings to remove web maps and web scenes from the navigation bar

**Answer: B**

Explanation:

To prevent confusion among users who do not have access to certain functionalities, such as creating web maps and web scenes, the GIS administrator should configure the ArcGIS Enterprise home page to display only the items and tools that are accessible to the signed-in user. This customization ensures that users see a tailored interface that aligns with their permissions and responsibilities, reducing the likelihood of encountering inaccessible options.

Configuring a maintenance notification (Option A) is more appropriate for temporary service outages or updates, not for managing user interface elements. Adjusting Page visibility settings (Option B) affects the visibility of entire pages but does not provide the granular control needed to tailor the home page based on user roles and permissions.
