JN0-637 New Test Bootcamp | JN0-637 Exam Guide Materials

P.S. Free & New JN0-637 dumps are available on Google Drive shared by ITdumpsfree: https://drive.google.com/open?id=1w4YRqaRGwNAsBgPqYHMPEAJysTDgk5Ll

"There is no royal road to learning." Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of JN0-637 study materials will make you no longer afraid of learning. JN0-637 study material provides you with a brand-new learning method that lets you get rid of heavy schoolbags, lose boring textbooks, and let you master all the important knowledge in the process of making a question. Please believe that with JN0-637 Study Materials, you will fall in love with learning.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	• Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.
Topic 2	• Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.
Topic 3	• Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.
Topic 4	• Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 5	• Troubleshooting Security Policies and Security Zones: This topic assesses the skills of networking professionals in troubleshooting and monitoring security policies and zones using tools like logging and tracing.
Topic 6	• Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.

JN0-637 Exam Guide Materials, Dumps JN0-637 Torrent

All the ITdumpsfree Juniper JN0-637 practice questions are real and based on actual Security, Professional (JNCIP-SEC) (JN0-637) exam topics. The web-based Security, Professional (JNCIP-SEC) (JN0-637) practice test is compatible with all operating systems like Mac, IOS, Android, and Windows. Because of its browser-based Juniper JN0-637 Practice Exam, it requires no installation to proceed further. Similarly, Chrome, IE, Firefox, Opera, Safari, and all the major browsers support the Security, Professional (JNCIP-SEC) (JN0-637) practice test.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q115-Q120):

NEW QUESTION # 115

You have deployed two SRX Series devices in an active/passive multimode HA scenario. In this scenario, which two statements are correct? (Choose two.)

- A. Services redundancy group 0 (SRG0) is used for services that do not have a control plane state.
- B. Services redundancy group 0 (SRG0) is used for services that have a control plane state.
- C. Services redundancy group 1 (SRG1) is used for services that do not have a control plane state.
- D. Services redundancy group 1 (SRG1) is used for services that have a control plane state.

Answer: A,D

NEW QUESTION # 116

Click the Exhibit button.

Referring to the exhibit, which three actions do you need to take to isolate the hosts at the switch port level if they become infected with malware? (Choose three.)

- A. Use a third-party connector.
- B. Configure AppTrack on the SRX Series device.
- C. Deploy Security Director with Policy Enforcer.
- D. Enroll the SRX Series device with Juniper ATP Cloud.
- E. Deploy Juniper Secure Analytics.

Answer: B,C,D

Explanation:
To isolate hosts at the switch port level when they become infected with malware, the SRX Series device must integrate with advanced threat detection and network management tools. Here's how the actions contribute to achieving this:
* Explanation of Answer A (Enroll SRX with Juniper ATP Cloud):
* Enrolling the SRX Series device withJuniper ATP Cloudallows for advanced malware detection and prevention. Juniper ATP (Advanced Threat Prevention) Cloud provides a cloud-based sandboxing solution that analyzes files and traffic for malicious behavior, helping to identify infected hosts.
* Once the SRX is enrolled, it can receive real-time threat intelligence from the cloud, enabling proactive isolation of compromised hosts.
* Explanation of Answer C (Deploy Security Director with Policy Enforcer):
* Security DirectorwithPolicy Enforcerallows for centralized security management and automated responses. Policy Enforcer can dynamically update policies to block infected hosts and isolate them based on detected threats. This is critical for automating the isolation process at the switch port level.
* With Policy Enforcer, you can quarantine infected devices automatically.
* Explanation of Answer D (Configure AppTrack on SRX):
* AppTrackis used to monitor and track application usage on the network. By configuring AppTrack on the SRX, you can detect abnormal behavior that may indicate malware infections, such as unusual application usage patterns. AppTrack can also generate logs and alerts to assist in isolating infected hosts at the switch port level.
* This provides visibility into which applications are being used, helping to identifymalicious traffic.
Juniper Security Reference:
* Juniper ATP Cloud Overview:Integrates advanced malware detection and threat intelligence for proactive defense.
* Security Director with Policy Enforcer:Automates policy changes in response to threats, ensuring fast isolation of infected hosts. Reference: Juniper Security Director Documentation.
* AppTrack:Provides application visibility, monitoring, and threat detection. Reference: Juniper AppTrack Documentation.

NEW QUESTION # 117

Which two statements about the differences between chassis cluster and multinode HA on SRX series devices are true? (Choose Two)

- A. Multinode HA member nodes require Layer 2 connectivity.
- B. Multinode HA supports Layer 2 and Layer 3 connectivity between nodes.
- C. Chassis cluster member nodes require Layer 2 connectivity.
- D. Multinode HA requires Layer 3 connectivity between nodes.

Answer: B,C

NEW QUESTION # 118

Which two statements are correct about the ICL in an active/active mode multinode HA environment?
(Choose two.)

- A. The ICL is the local device management interface in a multinode HA environment.
- B. The ICL is strictly a Layer 2 interface.
- C. The ICL traffic can be encrypted.
- D. The ICL uses a separate routing instance to communicate with remote multinode HA peers.

Answer: C,D

Explanation:
Explanation:

NEW QUESTION # 119

You have noticed a high number of TCP-based attacks directed toward your primary edge device.
You are asked to configure the IDP feature on your SRX Series device to block this attack.
Which two IDP attack objects would you configure to solve this problem? (Choose two.)

- A. host
- B. Protocol anomaly
- C. Signature
- D. Network

Answer: B,C

NEW QUESTION # 120

......

In today's society, the pace of life is very fast. No matter what your current status is JN0-637 exam questions can save you the most time, and then pass the exam while still having your own life time. The users of the JN0-637 Study Materials are very extensive, but everyone has a common feature, that is, hope to obtain the JN0-637 certification in the shortest possible time. You can really do this in our JN0-637 learning guide.
