Microsoft AZ-120 Questions: Fosters Your Exam Passing Skills [2026]

Evaluate your own mistakes each time you attempt the desktop Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) practice exam. It expertly is designed AZ-120 practice test software supervised by a team of professionals. There is 24/7 customer service to help you in any situation. You can customize your desired AZ-120 Exam conditions like exam length and the number of questions.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q220-Q225):

NEW QUESTION # 220

You plan to deploy multiple SAP HANA virtual machines to Azure by using an Azure Resource Manager template.

How should you configure Accelerated Networking and Write Accelerator in the template? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values

Answer Area

```
[
  {
    "apiVersion": "2017-06-01",

examplepdf.com

Box 1: true

enableAcceleratedNetworking: If the network interface is accelerated networking enabled.

To further reduce network latency between Azure VMs, we [Microsoft] recommend that you choose Azure Accelerated Networking. Use it when you deploy Azure VMs for an SAP workload, especially for the SAP application layer and the SAP DBMS layer.

Box 2: true

Write Accelerator should be used for the volumes that contain the transaction log or redo logs of a DBMS. It is not recommended to use Write Accelerator for the data volumes of a DBMS as the feature has been optimized to be used against log disks.

NEW QUESTION # 221

You deploy an SAP environment on Azure.

Your company has a Service Level Agreement (SLA) of 99.99% for SAP.

You implement Azure Availability Zones that have the following components:

- * Redundant SAP application servers

* ASCS/ERS instances that use a failover cluster

* Database high availability that has a primary instance and a secondary instance You need to validate the load distribution to the application servers. What should you use?

- A. SAPControl
- **B. SAP Solution Manager**
- C. SAP Web Dispatcher
- D. Azure Monitor

Answer: B

NEW QUESTION # 222

You plan to migrate an SAP database from Oracle to Microsoft SQL Server by using the SQL Server Migration Assistant (SSMA).

You are configuring a Proof of Concept (PoC) for the database migration You plan to perform the migration multiple times as part of the PoC.

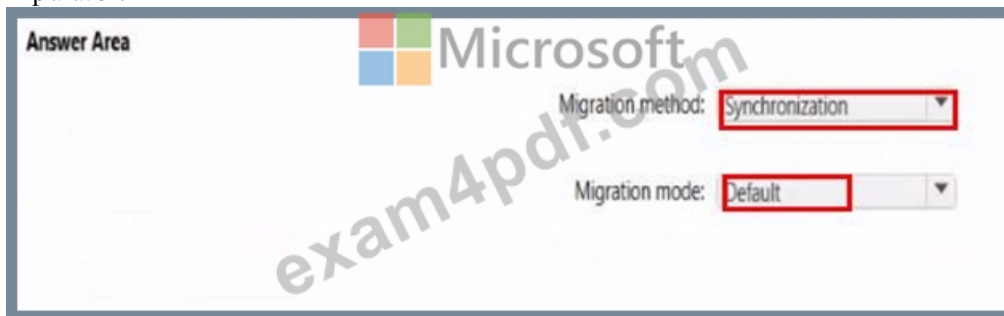

You need to ensure that you can perform the migrations as quickly as possible. The solution must ensure that all Oracle schemas are migrated.

Which migration method and migration mode should you use? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer selected as in image below.

Answer:

Explanation:

NEW QUESTION # 223

You have an Azure subscription.

You plan to deploy an Azure virtual machine that runs SUSE Linux Enterprise Server (SLES) 15 SP5 for SAP Applications. The virtual machine will host an SAP workload.

You need to ensure that the virtual machine will use the UEFI-based boot architecture.

What should you select from the Azure portal during the deployment?

- A. Extensions
- B. VM architecture
- C. Host group
- **D. Image**

Answer: D

NEW QUESTION # 224

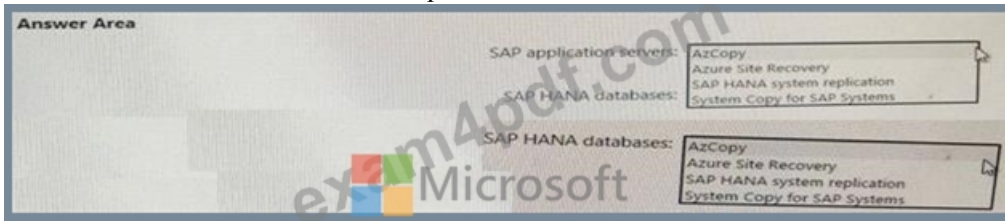

A company named Contoso. Ltd. has users across the globe. Contoso is evaluating whether to migrate SAP to Azure.

The SAP environment runs on SUSE Linux Enterprise Server (SLES) servers and SAP HANA databases. The Suite on HANA database is 4 TB.

You need to recommend a migration solution to migrate SAP application service and the SAP HANA databases. the solution must minimize downtime.

Which migration solutions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:
