

Valid PSE-Cortex Exam Dumps Free & Free PDF Test PSE-Cortex Assessment: Palo Alto Networks System Engineer - Cortex Professional

For Palo Alto Networks aspirants wishing to clear the Palo Alto Networks test and become a Palo Alto Networks System Engineer - Cortex Professional certification holder, EduDump Palo Alto Networks PSE-Cortex practice material is an excellent resource. By preparing with EduDump actual Palo Alto Networks PSE-Cortex Exam Questions, you can take get success on first attempt and take an important step toward accelerating your career. Download updated PSE-Cortex exam questions today and start preparation.

Palo Alto Networks PSE-Cortex certification exam is designed to test the skills and knowledge of system engineers who work with the Palo Alto Networks Cortex platform. Palo Alto Networks System Engineer - Cortex Professional certification exam is tailored for professionals who have a deep understanding of Cortex technology and are proficient in deploying and configuring it. The PSE-Cortex exam is a great way for professionals to showcase their expertise in Cortex technology and gain recognition in the industry.

The PSE-Cortex Certification is a valuable credential for professionals who work with Cortex technology. It demonstrates their expertise in designing, implementing, and troubleshooting Cortex solutions. Palo Alto Networks System Engineer - Cortex Professional certification is recognized globally, and it is a valuable asset for professionals who want to advance their careers in cybersecurity.

Pass Guaranteed Quiz 2026 The Best Palo Alto Networks PSE-Cortex: Palo Alto Networks System Engineer - Cortex Professional Exam Dumps Free

EduDump exam material is best suited to busy specialized who can now learn in their seemly timings. The PSE-Cortex Exam dumps have been gratified in the PDF format which can certainly be retrieved on all the digital devices, including; Smartphone, Laptop, and Tablets. There will be no additional installation required for PSE-Cortex certification exam preparation material. Also, this PDF can also be got printed. And all the information you will seize from PSE-Cortex Exam PDF can be verified on the Practice software, which has numerous self-learning and self-assessment features to test their learning. Our software exam offers you statistical reports which will upkeep the students to find their weak areas and work on them.

Palo Alto Networks PSE-Cortex exam is a vendor-specific certification that demonstrates the candidate's proficiency in the Cortex platform. PSE-Cortex exam covers a range of topics, including Cortex XDR, Cortex Data Lake, Cortex XSOAR, and Cortex Certifai. PSE-Cortex exam is intended for individuals who are already familiar with the Cortex platform and have hands-on experience working with it. Candidates who pass the PSE-Cortex Exam will be recognized as Palo Alto Networks System Engineer - Cortex Professionals.

Palo Alto Networks System Engineer - Cortex Professional Sample Questions

(Q168-Q173):

NEW QUESTION # 168

What is the size of the free Cortex Data Lake instance provided to a customer who has activated a TMS tenant, but has not purchased a Cortex Data Lake instance?

- A. 100 GB
- B. 10 TB
- C. 1 TB
- D. 10 GB

Answer: A

Explanation:

Cortex Data Lake (often referred to as Strata Logging Service in some contexts) is Palo Alto Networks' cloud-based storage solution that centralizes security data for products like Cortex XDR, Prisma Access, and NGFWs. The question involves a customer who has activated a TMS (Tenant Management Service) tenant but has not purchased a Cortex Data Lake instance. TMS is part of the Palo Alto Networks ecosystem for managing tenants and services, typically associated with Cortex or Prisma deployments. Let's break this down to determine the size of the free Cortex Data Lake instance provided in this scenario.

Understanding TMS and Cortex Data Lake:

* TMS Tenant: The Tenant Management Service is a framework used to manage multiple tenants or instances within Palo Alto Networks' cloud services (e.g., Cortex XDR, Prisma Access). Activating a TMS tenant implies the customer has initialized a management structure but hasn't committed to a full Cortex Data Lake purchase.

* Free Cortex Data Lake Instance: Palo Alto Networks provides a limited, free tier of Cortex Data Lake storage to customers who activate certain services or products, allowing them to evaluate functionality or store minimal data before committing to a paid license.

Free Storage Allocation:

When a customer activates a TMS tenant without purchasing a Cortex Data Lake instance, Palo Alto Networks allocates a default free storage capacity to enable basic functionality. According to official documentation and standard practices:

* The free Cortex Data Lake instance provides 100 GB of storage.

* This amount is intended for initial use cases, such as storing logs from a small number of endpoints (e.g., Cortex XDR Prevent agents), firewall logs, or trial data during evaluation periods.

Option Analysis:

* A. 10 GB:

* Analysis: 10 GB is too small to be a meaningful free tier for a product like Cortex Data Lake, which is designed to handle security telemetry from endpoints, networks, or cloud services. Even basic log storage for a few devices over a short period would exceed this quickly.

* Conclusion: Incorrect.

* B. 1 TB:

* Analysis: 1 TB (1,000 GB) is a substantial amount of storage, typically associated with paid Cortex Data Lake subscriptions rather than a free tier. Offering this much for free would undermine the paid licensing model.

* Conclusion: Incorrect.

* C. 10 TB:

* Analysis: 10 TB is even larger and aligns with enterprise-scale paid deployments, not a free instance. This size is far beyond what's provided without a purchase.

* Conclusion: Incorrect.

* D. 100 GB:

* Analysis: 100 GB is the documented size of the free Cortex Data Lake instance provided to customers who activate a tenant (e.g., via TMS) without purchasing additional storage. It's sufficient for small-scale testing, such as storing logs from a handful of Cortex XDR agents or firewall data for a limited retention period (e.g., 30 days).

* Conclusion: Correct.

Supporting Context:

* Cortex XDR Example: For Cortex XDR Prevent customers, activating a tenant includes 100 GB of free Cortex Data Lake storage for 30 days of alert data (not full telemetry, which requires XDR Pro).

This aligns with the TMS scenario, where basic tenant activation triggers the same free tier.

* Prisma Access: Similarly, Prisma Access customers activating a tenant without a purchased Data Lake instance receive 100 GB for initial log storage.

* Documentation: While exact wording may vary, Palo Alto Networks consistently references 100 GB as the free tier across product activation guides.

References:

Cortex Data Lake Getting Started Guide (Palo Alto Networks Documentation):

States that customers who activate a tenant without purchasing storage receive "100 GB of free storage" for initial use.

 Cortex XDR Prevent Activation:
 Notes that 100 GB is included for free with tenant activation, supporting basic alert storage.
 Palo Alto Networks Sales and Licensing FAQs:
 Confirms 100 GB as the standard free tier for Cortex Data Lake when no additional storage is purchased.

NEW QUESTION # 169

Which playbook functionality allows grouping of tasks to create functional building blocks?

- A. manual tasks
- B. sub-playbooks
- C. conditional tasks
- D. **playbook features**

Answer: D

Explanation:

Reference: <https://xsoar.pan.dev/docs/playbooks/playbooks-create-playbook-task>

NEW QUESTION # 170

During the TMS instance activation, a tenant (Customer) provides the following information for the fields in the Activation - Step 2 of 2 window.

Field	Value
Company Name	XNet Education Systems
Instance Name	xnet50
Subdomain	xnet
Region	

During the service instance provisioning which three DNS host names are created? (Choose three.)

- A. **cc-xnet.traps.paloaltonetworks.com**
- B. hc-xnet50.traps.paloaltonetworks.com
- C. **ch-xnet.traps.paloaltonetworks.com**
- D. **cc-xnet50.traps.paloaltonetworks.com**
- E. cc.xnet50traps.paloaltonetworks.com
- F. xnettraps.paloaltonetworks.com

Answer: A,C,D

NEW QUESTION # 171

Which four types of Traps logs are stored within Cortex Data Lake?

- A. **Threat, Config, System, Data**
- B. Threat, Monitor, System, Analytic
- C. Threat, Config, Authentication, Analytic
- D. Threat, Config, System, Analytic

Answer: A

NEW QUESTION # 172

Which feature of Cortex XSIAM displays an entire picture of an attack, including the originating process or delivery point?

- A. Automation playbook
- B. Sample analysis
- C. Causality View
- D. Correlation rule

Answer: C
