With each attempt of the Salesforce AP-214 Practice Exam in this manner, your score is saved.

## Salesforce Marketing Cloud Advanced Cross Channel Accredited Professional Sample Questions (Q60-Q65):

### NEW QUESTION # 60

Where would you add a topic profile

- A. Social studio automate
- B. Workspace settings

- C. Social studio engage
- **D. Admin settings**

**Answer: D**

Explanation:

\* Understanding Topic Profiles:

\* Topic profiles are the core of social listening in Social Studio. They define the keywords, social accounts, and other criteria used to capture relevant social media mentions.

\* Admin Settings as the Central Hub:

\* Admin settings in Social Studio are the central location for managing overall account configurations, user permissions, and, importantly, topic profiles.

\* Detailed Steps:

\* Access Admin Settings: In Social Studio, you'll click on your profile avatar in the top right corner and then select "Admin".

\* Topic Profiles Section: Within the Admin panel, you'll find a dedicated section for "Topic Profiles."

\* Create/Edit Topic Profiles: This is where you can create new topic profiles or edit existing ones.

You'll define keywords, include/exclude terms, specify languages, locations, media types, and link social accounts.

\* Why Other Options Are Incorrect:

\* A. Social Studio Automate: Social Studio Automate is used for automating actions based on rules (e.g., automatically routing posts to different teams, adding classifications). It's not where you create the foundation of social listening (topic profiles).

\* C. Workspace Settings: Workspace settings manage collaboration and workflow within a specific workspace. While you might use topic profiles within a workspace, you don't create them there.

\* D. Social Studio Engage: Engage is for viewing and interacting with social media content that has already been captured based on your topic profiles. You don't create topic profiles in Engage.

In Summary:

#### NEW QUESTION # 61

Decision split using contact data not working, myorders DE with 1 to many relationship configured in attribute group. What questions you need to ask to troubleshoot. Select multiple

- A. Are there any eligible matching orders for that particular contact
