## Question: VMware Cloud Foundation 5.2 Administrator

If you want to pass a high percentage of the VMware 2V0-11.25 Exam, you should consider studying for the actual exam. These practice tests are designed to help you prepare for the exam and ensure you know the syllabus content. It will also help you improve your time management skills, as these tests are designed like an actual exam. Moreover, they will help you learn to answer all questions in the time allowed.

### VMware Cloud Foundation 5.2 Administrator Sample Questions (Q146-Q151):

#### NEW QUESTION # 146

An administrator is tasked with troubleshooting an issue where some VMs are not appearing in the vCenter inventory after a recent migration to a new vSphere environment.

Which two components should the administrator examine to resolve this issue? (Choose two.)

- A. The vSphere permissions assigned to the VMs.
- B. The storage policies applied to the VMs.
- C. The network settings of the new vSphere environment.
- **D. The registration status of the VMs in the new vSphere environment.**
- **E. The compatibility of the VM hardware version with the new vSphere environment.**

**Answer: D,E**

Explanation:

If the hardware version of the virtual machines is incompatible with the new vSphere environment, the VMs may not appear or may fail to register properly. Ensuring compatibility between the VM hardware version and the vSphere environment is essential for successful VM migration.

If the VMs are not correctly registered in the new vSphere environment after migration, they won't show up in the vCenter inventory. Checking the registration status helps to identify if this is the issue.

#### NEW QUESTION # 147

An administrator is tasked with enabling Workload Management (vSphere Supervisor) on a VMware Cloud Foundation (VCF) workload domain using the SDDC Manager UI.

Which three are prerequisites for enabling Workload Management? (Choose three.)

- A. Verify at least one Content Library is available.
- **B. Verify at least one NSX Edge cluster is deployed and available.**
- **C. Verify that the vSphere Distributed Switch is configured with sufficient port groups.**
- D. Verify that the cluster is running vSAN.
- **E. Verify all hosts within the selected Sphere clusters have the proper vSphere with Tanzu licensing to support Workload Management.**

**Answer: B,C,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The official documentation for enabling Workload Management (vSphere Supervisor) on a VCF workload domain requires the following prerequisites:

Verify that the vSphere Distributed Switch is configured with sufficient port groups (A): The vSphere Distributed Switch must have the appropriate port groups created and configured to support the networking requirements of the Supervisor Cluster.

Verify all hosts within the selected Sphere clusters have the proper vSphere with Tanzu licensing to support Workload Management

(C): All ESXi hosts in the target cluster must have vSphere with Tanzu licensing to enable and use Workload Management features.

Verify at least one NSX Edge cluster is deployed and available (D): NSX Edge cluster is necessary to provide network services, including load balancing and routing, which are required for the Supervisor Cluster.

A content library is not a prerequisite for enabling Workload Management, and while vSAN is commonly used, it is not a strict requirement for all configurations of Supervisor Clusters.

#### NEW QUESTION # 148

An organization is integrating VMware vCenter with Active Directory (AD) to streamline user authentication. As part of this process, the administrator needs to add AD as an identity source in vCenter. Which three steps must be performed to successfully add AD as an identity source? (Choose three.)

- A. Select 'Identity Sources' and choose 'Active Directory Domain'.
- B. Create an Active Directory object for the vCenter Server Appliance.
- C. Configure DNS settings on all ESXi hosts to point to the AD DNS servers.
- D. Enter the Domain Name and the credentials of an AD user with a minimum of read-only access to Base DN for users and groups.
- E. Navigate to the vCenter Single Sign-On configuration in the vSphere Client.
- F. Reboot the vCenter to apply the identity source settings.

**Answer: A,D,E**

Explanation:

You must provide the AD domain name plus credentials (read-only is sufficient) to bind and query the Base DN for users and groups.

In the vSphere Client's Identity Sources section, choose "Active Directory Domain" when adding a new source.

These options are found under Administration # Single Sign-On # Configuration # Identity Sources in the vSphere Client.

#### NEW QUESTION # 149

Which feature of VMware Data Services Manager enhances security and compliance?

- A. Storage replication
- B. Automated workload migration
- C. Database level authentication
- D. Network traffic encryption

**Answer: C**

Explanation:

VMware Data Services Manager™ offers modern database and data services management for vSphere. It is a solution that provides a data-as-a-service toolkit for on-demand provisioning and automated management of PostgreSQL and MySQL databases in vSphere environment. <https://techdocs.broadcom.com/us/en/vmware-cis/dsm/data-services-manager/2-1/about-vmware-data-services-manager.html>

#### NEW QUESTION # 150

To help troubleshoot an issue with the vSphere Supervisor, an administrator must log into the Supervisor Control Plane VMs. Which three actions should the administrator take to meet the objective? (Choose three.)

- A. Log into the Supervisor Control Plane VM using the root user and <password>.
- B. Obtain the <password> by running /usr/lib/vmware-wcp/decryptK8Pwd.py.
- C. Update the <password> by running /usr/lib/vmware/auth/bin/chpw admin.
- D. Log into the Supervisor Control Plane VM using the admin user and <password>.
- E. Log into the vCenter Server Appliance using SSH.
- F. Log into the SDDC Manager appliance using SSH.

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the VMware vSphere with Tanzu Documentation and VMware Cloud Foundation 5.2 Administration Guide, the supported method to access Supervisor Control Plane VMs for troubleshooting involves the following actions:

Option B: Log into the Supervisor Control Plane VM using the admin user and <password>.

Exact Extract from official documentation:

"To troubleshoot Supervisor Control Plane VMs, log in via SSH using the 'admin' user and the password specific to the Supervisor Control Plane VM." (VMware vSphere with Tanzu Documentation - Supervisor Control Plane VM Access) Option E: Update the <password> by running /usr/lib/vmware/auth/bin/chpw admin.

Exact Extract from official documentation:

"If you need to update the 'admin' password for Supervisor Control Plane VMs, use the command '/usr/lib/vmware/auth/bin/chpw admin' on the VM." (VMware vSphere with Tanzu Documentation - Changing Admin Passwords) Option F: Obtain the <password> by running /usr/lib/vmware-wcp/decryptK8Pwd.py.

Exact Extract from official documentation:

"You can retrieve the 'admin' password for the Supervisor Control Plane VM by running the Python script '/usr/lib/vmware-wcp/decryptK8Pwd.py' on the vCenter Server Appliance." (VMware vSphere with Tanzu Documentation - Retrieving Admin Credentials) Why Not the Other Options?

Option A: Logging into the vCenter Server Appliance is not necessary for direct access to the Supervisor Control Plane VMs.

Option C: SDDC Manager appliance access is unrelated to Supervisor VM troubleshooting.

Option D: Root login to Supervisor Control Plane VMs is not supported or documented for troubleshooting.

Summary:

To access the Supervisor Control Plane VMs for troubleshooting, the administrator must use the admin user and password (B), can update the password using the chpw command (E), and retrieve the current password using the decryptK8Pwd.py script (F), following the exact steps documented in the VMware official guides.

## NEW QUESTION # 151

.....

No matter who you are, I believe you can do your best to achieve your goals through our 2V0-11.25 Preparation questions! For we have three different versions of 2V0-11.25 exam materials to satisfy all your needs. The PDF version of 2V0-11.25 practice guide can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices.

**Exam 2V0-11.25 Question:** <https://www.exam-killer.com/2V0-11.25-valid-questions.html>

We offer free demo download of real 2V0-11.25 valid dumps and candidates can download whenever you want, Why the clients speak highly of our 2V0-11.25 exam dump, The VMware Cloud Foundation 5.2 Administrator (2V0-11.25) Dumps PDF is the most convenient form of VMware Cloud Foundation 5.2 Administrator (2V0-11.25) preparation material, In recent years, many people are interested in VMware Exam 2V0-11.25 Question certification exam, VMware Latest Braindumps 2V0-11.25 Book Well, what is the good tool?

Quality approaches align with project management approaches in a number of areas, 2V0-11.25 including achieving customer satisfaction, preventing defects instead of inspecting for them, management support for quality, and continuous improvement.
