### Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q78-Q83):

#### NEW QUESTION # 78

U+ Bank's marketing department currently promotes various credit card offers by sending emails to qualified customers. The bank wants to limit the number of offers that customers can receive over a given period of time.

In the Answer Area, select the correct artifact you use to implement each requirement.

#### Answer:

Explanation:

Explanation:

A screenshot of a computer screen AI-generated content may be incorrect.

#### NEW QUESTION # 79

GlobalRetail operates in a fast-changing digital marketplace where customer preferences and competitor offers change weekly. Their marketing team struggles with lengthy approval processes that prevent quick responses to market trends, often causing them to miss critical engagement opportunities.

What does agility represent in the context of customer engagement projects?

- A. Automating all business processes through artificial Intelligence and machine learning algorithms
- B. Eliminating all testing requirements to completely accelerate software deployment cycles
- C. An organization's ability to react quickly to marketplace changes and emerging trends
- D. Outsourcing decision-making processes to external vendors for faster implementation speeds

#### Answer: C

#### NEW QUESTION # 80

The U+ Bank marketing department wants to leverage the next-best-action capability of Pega Customer Decision Hub on Its website to promote new offers to each customer.

Place the events in the sequential order.

#### Answer:

Explanation:

Explanation:

#### NEW QUESTION # 81

A volume constraint uses the Return any action that does not exceed constraint mode. The following tables show the configuration of the volume constraints and the list of customers in the outbound segment:

The outbound run selects customers in the following order to apply the volume constraints: CUST-01, CUST-02, CUST-03, and CUST-05.

Based on the configuration of the volume constraints for each channel, which offer does CUST-05 receive?

- A. Silver card

- B. Silver card and Diamond card
- **C. Diamond card**
- D. None

**Answer: C**

Explanation:

CUST-05 receives the Diamond card offer because it is the only action that does not exceed the volume constraint for the email channel. The Silver card offer has already reached its limit of 2 emails per day, so it is not eligible for CUST-05. The volume constraint mode Return any action that does not exceed means that any action that meets the eligibility and suitability criteria and does not violate the volume constraint will be returned, even if there are other actions with higher priority or propensity. ### NEW QUESTION # 82

MyCo, a mobile company, uses Pega Customer Decision Hub to display offers to customers on its website.

The company wants to present more relevant offers to customers based on customer behavior. The following diagram is the action hierarchy in the Next-Best-Action Designer.

The company wants to present offers from both the groups and arbitrate across the two groups to select the best offer based on customer behavior.

As a decisioning architect, what must you do to present offers from the two groups?

- A. Enable an engagement policy for the second group.
- **B. Map a real-time container to the Top-level or Issue-level.**
- C. Set contact limits for both the groups.
- D. Create a decision strategy at the Issue-level

**Answer: B**

Explanation:

To present offers from the two groups, you must map a real-time container to the Top-level or Issue-level. A real-time container is a configuration that defines how to deliver offers and treatments to a specific channel, such as a website or a mobile app. By mapping a real-time container to the Top-level or Issue-level, you can enable all the offers under that level to be available for delivery through that channel.
