PECB QMS ISO 9001:2015 Lead Auditor Exam Sample Questions (Q134-Q139):

NEW QUESTION # 134

An organisation decides to purchase products and services only from ISO 9001 certified suppliers. Match the four organisational functions to a potential benefit.

□

Answer:

Explanation:

□ Explanation:

Reduced incoming inspection # A. Quality

Improved communication with suppliers # B. Procurement

Purchased materials received on time # C. Logistics

Reduced variability within processes # D. Production

According to ISO 9001:2015, Clause 8.4 - Control of externally provided processes, products and services, organisations are required to ensure that externally provided products and services conform to specified requirements. When an organisation sources from ISO 9001 certified suppliers, there is greater assurance of consistency in quality, delivery, and communication. This enhances internal operations across various functions:

Reduced incoming inspection (Quality): ISO 9001 certified suppliers have robust quality controls (Clause 8.4.2), reducing the need for repeated inspections upon receipt. This aligns with Quality's responsibility for incoming inspection and verification.

Improved communication with suppliers (Procurement): Clause 8.4.3 emphasizes the communication of detailed requirements to external providers. Procurement plays a key role in ensuring these requirements are understood and met.

Purchased materials received on time (Logistics): Timely deliveries are often a result of structured supplier evaluation and selection (Clause 8.4.1). Logistics benefits through fewer delays and better scheduling of internal processes.

Reduced variability within processes (Production): Consistency of supplied materials supports stable and predictable production processes, which is a key aspect of Clause 8.5 - Production and service provision.

ISO 9001:2015 Clause 8.4.2 - Type and extent of control

ISO 9001:2015 Clause 8.4.3 - Information for external providers

ISO 9001:2015 Clause 8.5 - Production and service provision

NEW QUESTION # 135

What does the application of the process approach in a QMS enable?

- A. The consideration of processes in terms of financial value
- **B. The achievement of effective process performance**
- C. The reduction of resource consumption
- D. The improvement of processes based on the needs and expectations of interested parties

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: ISO 9001:2015 promotes the process approach, which allows organizations to structure their activities into interrelated processes. This approach helps ensure that processes effectively achieve intended results.

Clause 0.3.1 (Process Approach) states that "The application of the process approach in a quality management system enables understanding and consistency in meeting requirements, considering processes in terms of added value, and achieving effective process performance." This aligns directly with option C, making it the correct answer. The other options are either partially correct or do not fully capture the purpose of the process approach:

* Option A (Improvement based on interested parties) is a benefit but does not define the main goal.

* Option B (Financial value) is not the primary focus of the process approach.

* Option D (Reduction of resource consumption) may be an indirect benefit but is not a core objective.

NEW QUESTION # 136

Select the words that best complete the sentence:

Answer:

Explanation:

Explanation:

According to the ISO 19011:2018 document, the audit plan should provide the basis for agreement regarding the conduct and scheduling of the audit activities. The amount of detail provided in the audit plan should reflect the scope and complexity of the audit, as well as the risk of not achieving the audit objectives¹. The scope of the audit refers to the extent and boundaries of the audit, such as the audit criteria, the audit objectives, the organizational and functional units, and the processes to be audited¹. The complexity of the audit refers to the degree of difficulty or intricacy of the audit, such as the number and diversity of the auditees, the audit criteria, the audit methods, and the audit team composition². The risk of not achieving the audit objectives refers to the possibility that the audit may fail to provide reliable and sufficient audit evidence to support the audit conclusions and report¹.

Therefore, the complete sentence is:

In the context of a third-party audit, the amount of detail provided in the audit plan should reflect the scope and complexity of the audit, as well as the risk of not achieving the audit objectives.

NEW QUESTION # 137

You are leading a Stage 2 certification audit of a multi-site organisation and have received the audit schedule below; Head Office and Site 1 - Day 1 Site 2 (150 km from HQ) - Days 2 and 3 During Day 1 of the audit, the client informs you that the laboratory at Site 2 has been closed for decontamination due to a serious outbreak of an infectious disease among workers. In Site 2, all other functions could be audited as planned.

As the audit team leader, what would you do?

Choose the best acceptable action you could take:

- A. Complete the audit on day 3 and report back to the certification body for a certification decision.
- **B. Ask the audit Programme Manager for direction.**
- C. Immediately cancel the audit since the audit plan cannot be completed.
- D. Continue the audit on days 2 and 3 and return later to audit the Site 2 laboratory.

Answer: B

Explanation:

ISO 9001:2015 requires that certification audits be planned, controlled, and conducted in a way that ensures valid and reliable audit conclusions. However, ISO 9001 does not give operational detail on how to manage disrupted audits. For this, ISO 9001 explicitly refers to ISO 19011 and certification schemes require escalation to the audit programme or certification management function.

ISO 9001:2015, Clause 9.2.2 (NOTE) states that guidance on auditing management systems is provided in ISO 19011.

In a Stage 2 certification audit, all applicable processes within the scope must be audited before a certification decision can be made.

The laboratory at Site 2 is clearly part of the operational scope and cannot be audited due to circumstances outside the organisation's control (health and safety risk).

Why option C is correct:

* Certification audits operate under a controlled certification programme, not solely at the discretion of the audit team leader.

* ISO 19011 requires auditors to act responsibly when conditions prevent safe or complete auditing and to escalate significant changes or risks.

* Certification bodies require the Audit Programme Manager (or Certification Manager) to decide whether the audit should be paused, partially completed, rescheduled, or split to preserve certification integrity.

Therefore, seeking direction from the audit Programme Manager is the correct and compliant action.

NEW QUESTION # 138

The following list gives examples of records that may be evidence of how an organisation has fulfilled the requirements of clause 8.4 of ISO 9001. Match the records to the appropriate requirement of clause 8.4.

Answer:

Explanation:

□ Explanation:

□ The following table shows the possible matching of the records to the requirements of clause 8.4:

Table

Requirements

Records

Define product requirements

Product specification

Criteria for selection

List of requirements to be met by the external provider

Evaluation of potential external provider

External provider questionnaire

External provider selection

Approved external provider list

Communicate requirements

Purchase order

Monitoring of performance

External provider delivery times and quality issues

Comprehensive and Detailed Explanation: = According to clause 8.4 of ISO 9001:2015, the organization should ensure that externally provided processes, products, and services conform to the specified requirements. To do so, the organization should:

Define the product requirements that are relevant for the external provision, such as specifications, drawings, standards, codes, etc. These should be documented and communicated to the external provider. A record of the product specification can be used as evidence of this requirement.

Establish the criteria for the selection, evaluation, and re-evaluation of external providers, based on their ability to provide processes, products, and services in accordance with the requirements. The criteria should be documented and applied consistently. A record of the list of requirements to be met by the external provider can be used as evidence of this requirement.

Evaluate the potential external providers before selecting them, using the established criteria. The evaluation methods may include questionnaires, audits, references, samples, etc. The results of the evaluation should be documented and reviewed. A record of the external provider questionnaire can be used as evidence of this requirement.

Select the external providers that have demonstrated their competence and conformity to the requirements.

The selection should be based on the evaluation results and the organization's needs. The selection should be documented and approved. A record of the approved external provider list can be used as evidence of this requirement.

Communicate the requirements for the processes, products, and services to be provided by the external provider, including the verification and validation activities, the acceptance criteria, the documentation requirements, the changes control, etc. The communication methods may include purchase orders, contracts, agreements, etc. The communication should be clear, complete, and timely. A record of the purchase order can be used as evidence of this requirement.

Monitor the performance and conformity of the external provider, using the established criteria and methods.

The monitoring methods may include inspections, tests, audits, feedback, complaints, etc. The monitoring results should be documented and analyzed. A record of the external provider delivery times and quality issues can be used as evidence of this requirement.
