Our DP-100 study materials are closely linked with the test and the popular trend among the industries and provide all the information about the test. The answers and questions seize the vital points and are verified by the industry experts. Diversified functions can help you get an all-around preparation for the test. Our online customer service replies the clients' questions about our DP-100 Study Materials at any time. So our DP-100 study materials can be called perfect in all aspects.

Our website offer considerate 24/7 services with non-stopping care for you after purchasing our DP-100 practice materials. Although we cannot contact with each other face to face, but there are no disparate treatments and we treat every customer with consideration like we are around you at every stage during your review process. We will offer help insofar as I can. While our DP-100 practice materials are beneficiary even you lose your chance of winning this time. Full refund or other version switch is accessible.

## DP-100 - Designing and Implementing a Data Science Solution on Azure Pass-Sure Examcollection Dumps

Our DP-100 test question with other product of different thing is we have the most core expert team to update our DP-100 study materials, learning platform to changes with the change of the exam outline. If not timely updating DP-100 training materials will let users reduce the learning efficiency of even lags behind that of other competitors, the consequence is that users and we don't want to see the phenomenon of the worst, so in order to prevent the occurrence of this kind of risk, the DP-100 Practice Test materials give supervision and update the progress every day, it emphasized the key selling point of the product.

## Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q312-Q317):

### NEW QUESTION # 312

You manage an Azure Machine Learning workspace.

You plan to train a natural language processing (NLP) model that will assign labels 'or designated tokens in unstructured text You need to configure the NLP task by using automated machine learning.

Which configuration values should you use? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

**Answer:**

### NEW QUESTION # 313

You create a binary classification model by using Azure Machine Learning Studio.

You must tune hyperparameters by performing a parameter sweep of the model. The parameter sweep must meet the following requirements:

\* iterate all possible combinations of hyperparameters

\* minimize computing resources required to perform the sweep

You need to perform a parameter sweep of the model.

Which parameter sweep mode should you use?

- A. Random grid
- B. Sweep clustering
- C. Random sweep
- D. Entire grid

**Answer: A**

Explanation:

Maximum number of runs on random grid: This option also controls the number of iterations over a random sampling of parameter values, but the values are not generated randomly from the specified range; instead, a matrix is created of all possible combinations of parameter values and a random sampling is taken over the matrix. This method is more efficient and less prone to regional oversampling or undersampling.

If you are training a model that supports an integrated parameter sweep, you can also set a range of seed values to use and iterate over the random seeds as well. This is optional, but can be useful for avoiding bias introduced by seed selection.

Incorrect Answers:

B: If you are building a clustering model, use Sweep Clustering to automatically determine the optimum number of clusters and other parameters.

C: Entire grid: When you select this option, the module loops over a grid predefined by the system, to try different combinations and identify the best learner. This option is useful for cases where you don't know what the best parameter settings might be and want to try all possible combination of values.

### NEW QUESTION # 314

You need to define an evaluation strategy for the crowd sentiment models.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Step 1: Define a cross-entropy function activation

When using a neural network to perform classification and prediction, it is usually better to use cross-entropy error than classification error, and somewhat better to use cross-entropy error than mean squared error to evaluate the quality of the neural network.

Step 2: Add cost functions for each target state.

Step 3: Evaluated the distance error metric.

### NEW QUESTION # 315

You manage an Azure Machine Learning workspace by using the Python SDK v2.

You must create a compute cluster in the workspace. The compute cluster must run workloads and properly handle interruptions.

You start by calculating the maximum amount of compute resources required by the workloads and size the cluster to match the calculations.

The cluster definition includes the following properties and values:

\* name="mlcluster1"

\* size="STANDARD.DS3.v2"

\* min\_instances=1

\* max\_instances=4

\* tier="dedicated"

The cost of the compute resources must be minimized when a workload is active. Of idle. Cluster property changes must not affect the maximum amount of compute resources available to the workloads run on the cluster.

You need to modify the cluster properties to minimize the cost of compute resources.

Which properties should you modify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In recent, ExamsTorrent began to provide you with the latest exam dumps about IT certification test, such as Microsoft DP-100 Certification Dumps are developed based on the latest IT certification exam. ExamsTorrent Microsoft DP-100 certification training dumps will tell you the latest news about the exam. The changes of the exam outline and those new questions that may appear are included in our dumps. So if you want to attend IT certification exam, you'd better make the best of ExamsTorrent questions and answers. Only in this way can you prepare well for the exam.
