## Actual CompTIA CV0-004 Exam Questions And Correct Solution

According to the years of the test data analysis, we are very confident that almost all customers using our products passed the exam, and in o the CV0-004 question guide, with the help of their extremely easily passed the exam and obtained qualification certificate. We firmly believe that you can do it! Therefore, the choice of the CV0-004 real study dumps are to choose a guarantee, which can give you the opportunity to get a promotion and a raise in the future, even create conditions for your future life. And, more importantly, when you can show your talent in these areas, naturally, your social circle is constantly expanding, you will be more and more with your same interests and can impact your career development of outstanding people. Since there is such a high rate of return, why hesitate to buy the CV0-004 Exam Questions?

## CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q147-Q152):

### NEW QUESTION # 147

A cloud developer needs to update a REST API endpoint to resolve a defect. When too many users attempt to call the API simultaneously, the following message is displayed:

Error: Request Timeout - Please Try Again Later

Which of the following concepts should the developer consider to resolve this error?

- A. Rate limiting
- B. TLS encryption
- C. Server patch
- D. Permission issues

Answer: A

Explanation:

To resolve the issue of a REST API endpoint timing out when too many users attempt to call the API simultaneously, the developer should consider implementing rate limiting. Rate limiting controls the number of requests a user can submit in a given amount of time, preventing overuse of the API resources and ensuring availability for all users. Reference: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Cloud Service Maintenance and Management

#### NEW QUESTION # 148

A cloud engineer is in charge of deploying a platform in an IaaS public cloud. The application tracks the state using session cookies, and there are no affinity restrictions. Which of the following will help the engineer reduce monthly expenses and allow the application to provide the service?

- A. Resource metering
- B. Reserved resources
- C. Dedicated host
- **D. Pay-as-you-go model**

**Answer: D**

Explanation:

The pay-as-you-go (PAYG) model allows the cloud engineer to optimize costs by paying only for the resources actually used, rather than committing to long-term reserved instances or dedicated hosts. Since the application uses session cookies for tracking state and has no affinity restrictions, it can efficiently scale up or down based on demand. This flexibility helps reduce monthly expenses by avoiding over-provisioning and ensuring resources are used efficiently.

#### NEW QUESTION # 149

A cloud consultant needs to modernize a legacy application that can no longer address user demand and is expensive to maintain. Which of the following is the best migration strategy?

- A. Replatform
- B. Retain
- **C. Refactor**
- D. Rehost

**Answer: C**

Explanation:

Refactoring is the process of restructuring existing computer code without changing its external behavior. In cloud computing, it often means modifying the application to better leverage cloud-native features and services. This can address user demand and reduce maintenance costs by making the application more scalable, resilient, and manageable. References: CompTIA Cloud+ Certification Study Guide (Exam CV0-004) by Scott Wilson and Eric Vanderburg

#### NEW QUESTION # 150

An engineer wants to scale several cloud workloads on demand. Which of the following approaches is the most suitable?

- A. Scheduled
- B. Manual
- C. Trending
- **D. Load**

**Answer: D**

Explanation:

Load scaling is the most suitable approach for scaling several cloud workloads on demand. It automatically adjusts the number of active servers in a cloud environment based on the current load or traffic, ensuring that resources are efficiently utilized to meet demand without manual intervention. This approach helps maintain optimal performance and availability, particularly during unexpected surges in workload or traffic. References:

Understanding cloud management and technical operations, including scaling strategies, is crucial for optimizing resource utilization

and performance in cloud environments, as outlined in the CompTIA Cloud+ objectives.

### NEW QUESTION # 151

A company needs to deploy its own code directly in the cloud without provisioning additional infrastructure. Which of the following is the best cloud service model for the company to use?

- A. IaaS
- B. SaaS
- C. PaaS
- D. XaaS

**Answer: C**

Explanation:

Platform as a Service (PaaS) is the best cloud service model for deploying code directly in the cloud without provisioning additional infrastructure. PaaS provides a platform allowing customers to develop, run, and manage applications without the complexity of building and maintaining the infrastructure.

Reference: The PaaS model and its benefits for application deployment are covered under the Cloud Concepts domain in the CompTIA Cloud+ certification.

### NEW QUESTION # 152

.....

We offer you free update for one year for CV0-004 study guide, namely, in the following year, you can obtain the latest version for free. And the latest version for CV0-004 exam dumps will be sent to your email automatically. In addition, CV0-004 exam materials are high quality, since we have experienced experts to compile and verify them, therefore the quality and accuracy can be guaranteed, so you can use them at ease. We have online and offline chat service, and if you have any questions about CV0-004 Exam Dumps, you can consult us, and we will give you reply as quickly as possible.
