Topic 3, Northwind Traders

Overview

Northwind Traders is a manufacturing company based in New York City.

Existing Environment

Identity Environment

The on-premises network contains an Active Directory Domain Services (AD DS) domain named northwindtraders.com

Northwind Traders has a Microsoft Entra tenant and a Microsoft Entra Domain Services managed domain. The northwindtraders.com domain syncs with the Microsoft Entra tenant.

Virtual Machines

The company has an on-premises Hyper-V virtual machine named VM1 that has the following configurations:

* Generation: 1

* Disk size: 2 TB

* Disk format: VHDX

* Disk type: Dynamically expanding

Cloud Services

Northwind Traders has a Microsoft 365 E5 subscription. The subscription contains 500 users that are assigned Microsoft 365 E5 licenses.

The company has an Azure subscription that contains the resources shown in the following table.

Name	Type	Location	Configuration
storage1	Storage account	East US	Contains an Azure Files share named share1
VNet1	Virtual network	East US	Not applicable

Both subscriptions are linked to the Microsoft Entra tenant.

Requirements

Planned Changes

Northwind Traders identifies the following planned changes:

* Deploy an Azure Virtual Desktop host pool that will contain 10 session hosts joined to the Microsoft Entra Domain Services managed domain.

* Configure VM1 as the source image for the Azure Virtual Desktop deployment and upload the image to Azure.

* The Azure Virtual Desktop deployment will provide access to a custom app named Appl.

Performance Requirements

Northwind Traders identifies the following performance requirements:

- * Each Azure Virtual Desktop session host must support 15 user sessions.
- * Each new user session must be assigned to a single session host until the maximum session limit is reached for that host.

Application Requirements

Northwind Traders identifies the following application requirements:

- * Microsoft OneDrive must launch when users connect to a RemoteApp session in Azure Virtual Desktop.
- * App1 requires a desktop resolution of 1280 x 1024.
- * Administrative effort must be minimized.

Disaster Recovery Requirements

Northwind Traders identifies the following disaster recovery requirements for the Azure Virtual Desktop deployment:

- * Minimize outages if an Azure region fails.
- * Minimize the recovery time objective (RTO).
- * Minimize administrative effort in the event of a failover.

Security Requirements

Northwind Traders identifies the following security requirements:

- * When users sign in to the Azure Virtual Desktop deployment by using the Azure Virtual Desktop client they must authenticate by using their Microsoft Entra username and password only.
- * When users sign in to the Azure Virtual Desktop deployment by using a web browser, they must authenticate by using the Microsoft Authenticator app.
- * All the Azure Virtual Desktop session hosts deployed by using the VM1 source image must be onboarded to Microsoft Defender for Endpoint.
- * The client version and operating system used to connect to the session hosts must be logged.
- * The solution must follow the principle of least privilege.

Networking Requirements

The Azure Virtual Desktop session hosts must be able to access the resources on the on-premises network.

Northwind Traders identifies the following user profile requirements:

- * Users must be able to access share1 by using their Microsoft Entra account.
- * Azure Virtual Desktop user profiles must be managed by using FSLogix.
- * All user profiles must be stored in share1.

NEW QUESTION # 34

You need to deploy the session hosts to meet the deployment requirements Which PowerShell cmdlet should you run first?

- A. Set-AzWMADDomainExtension
- B. New-AzwvdRegistratratininfo
- C. Update-AZwvdSessionHost
- **D. Get-AzApiManagementSsoToken**

Answer: D

NEW QUESTION # 35

You have a Windows Virtual Desktop deployment.

You publish a RemoteApp named AppVersion1.

You need AppVersion1 to appear in the Remote Desktop client as Sales Contact Application.

Which PowerShell cmdlet should you use?

- A. Update-AzWvdApplicationGroup
- **B. Update-AzWvdApplication**
- C. New-AzADApplication
- D. Register-AzWvdApplicationGroup

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/customize-feed-for-virtual-desktop-users>

<https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/update-azwvdapplication?view=az>

NEW QUESTION # 36

You have two Azure subscriptions that are linked to an Azure Active Directory (Azure AD) tenant named contoso.com and contain an Azure Virtual Desktop deployment. The tenant contains a user named User1.

When User1 signs in to Azure Security Center, the user receives the message shown in the following exhibit.

You need to ensure that User1 can manage security information for the tenant. The solution must use the principle of least privilege. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Role to assign to User1:

	▼
Security Admin at the root management group level	
Security Admin at the subscription level	
Security administrator for contoso.com	

Role required to assign the role to User1:

	▼
External Identity Provider administrator	
Global administrator	
Privileged role administrator	

Answer:

Explanation:

Answer Area

Role to assign to User1:

	▼
Security Admin at the root management group level	
Security Admin at the subscription level	
Security administrator for contoso.com	

Role required to assign the role to User1:

	▼
External Identity Provider administrator	
Global administrator	
Privileged role administrator	

Explanation:

Answer Area

Role to assign to User1:

- Security Admin at the root management group level
- Security Admin at the subscription level
- Security administrator for contoso.com

Role required to assign the role to User1:

- External Identity Provider administrator
- Global administrator
- Privileged role administrator

NEW QUESTION # 37

You need to evaluate the RDS deployment in the Seattle office. The solution must meet the technical requirements. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create a project in Azure Migrate.
- Register the Lakeside tool with Azure Migrate.
- Add the Azure Advisor recommendation digest.
- Install agents on the virtual machines that have the Pool3 prefix.
- Install agents on the virtual machines that have the Pool2 prefix.
- Create a Recovery Service vault.

Answer Area

Answer area containing two empty slots with up and down arrow icons for ordering.

Answer:

Explanation:

Actions

Create a project in Azure Migrate.

Register the Lakeside tool with Azure Migrate.

Add the Azure Advisor recommendation digest.

Install agents on the virtual machines that have the Pool3 prefix.

Install agents on the virtual machines that have the Pool2 prefix.

Create a Recovery Service vault.

Answer Area

Create a project in Azure Migrate.

Register the Lakeside tool with Azure Migrate.

Install agents on the virtual machines that have the Pool2 prefix.

Explanation:

Create a project in Azure Migrate.

Register the Lakeside tool with Azure Migrate.

Install agents on the virtual machines that have the Pool2 prefix.
