

AI-901 Dumps Vce | Valid AI-901 Vce Dumps

Before you can become a professional expert in Microsoft technology, you need to pass AI-901 exam test. It means you should get the AI-901 certification. The AI-901 actual exam is challenging and passing is definitely requires a lot of hard work and effort. VerifiedDumps will provide the latest and valid AI-901 test study material to you. It just needs to be taken 20-30 hours for preparation, then you can attend the actual test with confident. Besides, in case of failure, we will give you full refund. While, 100% pass is the guarantee we promise to our customers.

Microsoft AI-901 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify AI concepts and capabilities: This domain covers the foundational knowledge of AI from ethical principles and responsible design to understanding how AI models work and what kinds of tasks they can perform. It also explores the full range of AI workloads including generative AI, computer vision, speech, and information extraction.
Topic 2	<ul style="list-style-type: none">Implement AI solutions by using Microsoft Foundry: This domain is hands-on and focuses on building and deploying AI solutions using the Microsoft Foundry platform and its associated tools. It spans generative AI apps, text and speech processing, computer vision, and document intelligence all implemented through the Foundry portal and SDK.

Valid Microsoft AI-901 Vce Dumps - AI-901 Test Labs

With our customer-oriented AI-901 actual question, you can be one of the former exam candidates with passing rate up to 98 to 100 percent. You will pay just a small amount of money on our AI-901 exam guide but harvest colossal success with potential bright future. And we have confidence that your future aims will come along with this successful exam as the beginning. So choosing AI-901 actual question is choosing success.

Microsoft Azure AI Fundamentals Sample Questions (Q63-Q68):

NEW QUESTION # 63

You are developing an application that analyze invoices by using Azure Content Understanding in Foundry Tools. You need to ensure that the application retrieves the analysis results after processing completes. How should you complete the Python code? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
poller = client.begin_analyze(  
    analyzer_id="invoice",  
    input_url=url  
)  
result = poller.()
```

- get_results
- result
- status
- wait

Answer:

Explanation:

Answer Area

```
poller = client.begin_analyze(  
    analyzer_id="invoice",  
    input_url=url  
)  
result = poller.()
```

- get_results
- result
- status
- wait

NEW QUESTION # 64

Select the answer that correctly completes the sentence.

Answer Area

_____ defines which fields to extract when analyzing content

- A keyword list
- Optical character recognition (OCR)-only processing
- A schema
- A synchronous API call

Answer:

Explanation:

Answer Area

_____ defines which fields to extract when analyzing content

- A keyword list
- Optical character recognition (OCR)-only processing
- A schema
- A synchronous API call

NEW QUESTION # 65

You are developing an application that processes voicemail recordings by using Azure Content Understanding in Foundry Tools. Which feature does Azure Content Understanding use to convert audio to text?

- A. optical character recognition (OCR)
- B. key phrase extraction
- C. transcription
- D. Voice Live

Answer: C

Explanation:

Azure Content Understanding uses transcription to convert audio content, such as voicemail recordings, into text. Microsoft's Azure Content Understanding audio documentation states that transcription converts conversational audio into searchable and analyzable text-based transcripts.

Option A. Voice Live is not the feature used by Content Understanding to convert voicemail recordings into text.

Option B. key phrase extraction identifies important phrases after text is available; it is not the audio-to-text conversion step.

Option D. optical character recognition (OCR) is for extracting text from images or documents, not audio.

Therefore, the correct answer is C. transcription.

NEW QUESTION # 66

Select the answer that correctly completes the sentence.

Answer Area

When using the OpenAI Responses API and a vision-enabled model, you can include an image in a request by providing the image as

- a base64-encoded image data
- a CSV file attachment
- an MP4 video stream
- a shared access signature (SAS) token

Answer:

Explanation:

Answer Area

When using the OpenAI Responses API and a vision-enabled model, you can include an image in a request by providing the image as

- a base64-encoded image data
- a CSV file attachment
- an MP4 video stream
- a shared access signature (SAS) token

NEW QUESTION # 67

You plan to create an AI application that will use Azure OpenAI Service. The solution requires that a specific amount of throughput be allocated. Which type of deployment should you use?

- A. provisioned
- B. global batch
- C. data zone standard
- D. standard

Answer: A

Explanation:

When a specific amount of throughput is needed with Azure OpenAI Service, you should use Provisioned Throughput Units (PTUs) for your deployment. PTUs allow you to reserve a fixed amount of processing capacity for your models, ensuring consistent

performance and avoiding potential throttling or rate limits.

In contrast, the "Standard" deployment option in Azure OpenAI Service uses a "pay-as-you-go" model, where you are billed for the amount of usage. While this can be suitable for applications with fluctuating usage patterns, it does not provide the same level of throughput control as PTUs.

In summary: When you need to allocate a specific amount of throughput with Azure OpenAI Service, choose the "Provisioned" deployment type, which allows you to use PTUs.
