With the increasing demand for Salesforce development skills, the Salesforce OmniStudio-Developer Certification is an excellent way to demonstrate your expertise and stand out in the industry.

Salesforce Certified OmniStudio Developer Sample Questions (Q32-Q37):

NEW QUESTION # 32

A developer writes an OmniScript that includes a DataRaptor that updates the Account status based on information provided from the OmniScript. The information must be updated only if the Account record already exists. Otherwise, a new account must be created.

How should the developer accomplish this task?

- A. Populate the Lookup object and Lookup fields
- B. Check Overwrite Target for all Null input checkbox on the Account id field
- **C. Check the Upsert key and is required for Upsert checkboxes on the Account id field**
- D. Check the Upsert key checkbox on the Account Status field

Answer: C

Explanation:

Explanation

According to the OmniStudio Developer Guide, "To upsert a record, select the Upsert Key checkbox for the field that contains the unique identifier for the record. If you want to create a new record when no match is found, select Is Required for Upsert."

Therefore, the correct answer is B.

NEW QUESTION # 33

In an Integration Procedure, a developer needs to perform a multi-step calculation on every element of an array.

Based on best practices, what two methods are recommended?

Choose 2 answers

- **A. Use a Calculation Action to call a Calculation Procedure.**
- B. Use a ListAction to merge the array elements together.
- C. Use a Set Values Element inside a Loop Block.
- **D. Use a Matrix Action to call a Calculation Matrix.**

Answer: A,D

Explanation:

Explanation

According to the Integration Procedure Actions page, a Calculation Action can be used to "call a Calculation Procedure that performs calculations on input data" and a Matrix Action can be used to "call a Calculation Matrix that performs calculations on input data".

NEW QUESTION # 34

In a Calculation Procedure, what is required for the output of a Calculation Step to be used in an Aggregation Step?

- A. It must be a matrix lookup step
- **B. It must be a calculation step**
- C. It must be included in the calculation output
- D. It must be included in constants

Answer: B

NEW QUESTION # 35

..... configure Additional input to send exactly the same data? Assume that the developer checked Send Only Additional input.

- ☐ A)
- ☐ B)
- ☐ C)
- ☐ D)

- **A. Option D**
- B. Option A
- C. Option B

- D. Option C

Answer: A

NEW QUESTION # 36

A customer sets up two LWC OmniScripts, one embedded into another. AccountId is set in a Set Values element in the parent OmniScript. The AccountId set in the parent OmniScript is used to set another Set values element ContextAccountId in the embedded OmniScript. The embedded OmniScript is activated.

While previewing the OmniScript flow from the parent, it is found that Account I set correct in the parent OmniScript. However, ContextAccount in the embedded OmniScript is not set with the AccountId from parent OmniScript. On previewing the embedded OmniScript individually. It is found that ContextAccountId is set correctly.

What is the reason for this? Refer to the exhibit below.

- A. Both parent and embedded OmniScripts have the same element name for the Set Values element.
- **B. The WLC PubSub Message flag in the Set Values action of the parent OmniScript has not been set.**
- C. The flag passData.JSON in the parent OmniScript in not configured correctly.
- D. A developer failed to includea Navigate Action Element to pass data from the parent OmniScript.

Answer: B

Explanation:

The LWC PubSub Message flag in the Set Values action of the parent OmniScript enables the parent OmniScript to send data to the embedded OmniScript using a custom event. If this flag is not set, the data will not be passed to the embedded OmniScript

NEW QUESTION # 37
