Candidates who pass the DSCI DCPLA certification exam are recognized as experts in the field of data privacy and are highly sought after by organizations that are looking to improve their privacy posture. DSCI Certified Privacy Lead Assessor DCPLA certification certification is also a valuable asset for professionals who are looking to advance their careers in the field of data

privacy. The DSCI DCPLA Certification is widely recognized in India and is a benchmark for excellence in the field of data privacy.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q26-Q31):

NEW QUESTION # 26

The objective of DSCI Privacy Assessment Framework - Organizational Competence of Privacy - is to assess if the organization is able: (Tick all that apply)

- A. To ensure organizations meet all the applicable regulatory requirements
- B. To understand and support the Privacy Program whilst identifying inefficiencies that impact privacy and /or the underlying areas of improvement
- C. To provide assurance on the management system established for managing data privacy, to external and internal stakeholders
- D. To effectively demonstrate Privacy program
- E. To validate that the privacy protection measures implemented are adequate and are operating effectively

Answer: B,C,D,E

Explanation:

The Organizational Competence aspect of the DSCI Privacy Assessment Framework evaluates whether the organization:

- * Has structured processes to demonstrate privacy capability (A)
- * Can offer assurance to stakeholders through effective management systems (B)
- * Recognizes and supports the privacy framework while seeking improvements (C)
- * Validates adequacy and effectiveness of privacy safeguards implemented (E) Meeting all applicable regulations is a result of these capabilities but not the primary focus of the competence assessment layer itself.

NEW QUESTION # 27

Which among the following would not be characteristic of a good privacy notice?

- A. Clear and concise
- B. Easy to understand
- C. Multi-lingual
- D. Comprehensive - explaining all the possible scenarios and processing details making the notice lengthy

Answer: D

Explanation:

A good privacy notice, as guided by the DSCI Privacy Framework and other global frameworks, should be:

- * Easy to understand
- * Clear and concise
- * Accessible in multiple languages where appropriate

While being comprehensive is essential, overwhelming users with exhaustive and overly detailed information is discouraged. Overly lengthy notices may obscure important information and reduce usability. The objective is to balance completeness with clarity and brevity.

Thus, Option C, by suggesting excessive length, does not align with the characteristics of a good privacy notice.

NEW QUESTION # 28

With respect to privacy monitoring and incident management process, which of the following should be a part of a standard incident handling process?

- I) Incident identification and notification
- II) Investigation and remediation
- III) Root cause analysis
- IV) User awareness training on how to report incidents

- A. III and IV
- B. All of the Above
- C. I, II and III

- D. I and II

Answer: B

NEW QUESTION # 29

From the following list, identify the technology aspects that are specially designed for upholding privacy:

- I) Data minimization
- II) Intrusion prevention system
- III) Data scrambling
- IV) Data loss prevention
- V) Data portability
- VI) Data obfuscation
- VII) Data encryption
- VIII) Data mirroring

- A. Only I, III, V, VII and VIII
- B. Only I, II, III, VII and VIII
- **C. Only I, III, IV, VI and VII**
- D. Only II, V, VI, VII and VIII

Answer: C

Explanation:

Privacy-enhancing technologies (PETs) are critical for operationalizing privacy principles. According to the DPF:

* Data minimization (I): Collect only necessary data

* Data scrambling (III), Obfuscation (VI), and Encryption (VII): Techniques to protect identity and data content

* Data loss prevention (IV): Prevent unauthorized sharing or leakage

Data mirroring and intrusion prevention systems are primarily security mechanisms and not specifically privacy-focused. Data portability, while a right, is not a technology per se for "upholding" privacy but for enabling user control.

Thus, C includes the most appropriate privacy technologies.

NEW QUESTION # 30

Which of the following is not an appropriate privacy principle?

- i. Collection limitation
- ii. Collection limitation
- iii. Notice
- iv. Consent
- v. Access & correction
- vi. Data usage

- A. Collection limitation
- B. Data usage
- **C. Notice**
- D. Access & Correction

Answer: C

NEW QUESTION # 31
