

UiPath-ABAv1 Training Materials | UiPath-ABAv1 Exam Syllabus

DOWNLOAD the newest Dumps4PDF UiPath-ABAv1 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1MDxGrzeyJ_WIsPmMxkW7Z66DPpYGISsd

The Dumps4PDF guarantees their customers that if they have prepared with UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) practice test, they can pass the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual UiPath UiPath-ABAv1 Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score. The UiPath UiPath-ABAv1 practice material of Dumps4PDF came into existence after consultation with many professionals and getting their positive reviews.

The UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) actual questions we sell also come with a free demo. Spend no time, otherwise, you will pass on these fantastic opportunities. Start preparing for the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) exam by purchasing the most recent UiPath UiPath-ABAv1 exam dumps. You must improve your skills and knowledge to stay current and competitive. You merely need to obtain the UiPath-ABAv1 Certification Exam badge in order to achieve this. You must pass the UiPath Certified Professional Automation Business Analyst Professional v1.0 UiPath-ABAv1 exam to accomplish this, which can only be done with thorough exam preparation. Download the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) exam questions right away for immediate and thorough exam preparation.

UiPath-ABAv1 latest exam torrent & UiPath-ABAv1 pass-guaranteed dumps

You don't need to worry about wasting your precious time but failing to get the UiPath-ABAv1 certification. With our UiPath-ABAv1 practice guide, your success is 100% guaranteed. Tens of thousands of people have used our UiPath-ABAv1 Study Materials and the pass rate of the exam is high as 98% to 100%. This means as long as you learn with our UiPath-ABAv1 learning

quiz, you will pass the exam without doubt.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q130-Q135):

NEW QUESTION # 130

When prioritizing the processes to be automated based on the Automation Quadrant, what is a process with LOW complexity & HIGH benefit considered?

- A. Long-term improvement
- B. Low hanging fruit
- C. Must-do improvement
- **D. Quick win**

Answer: D

Explanation:

In the Automation Quadrant used for prioritizing processes for automation, a process that is characterized by LOW complexity and HIGH benefit is considered a 'Quick win'. This term is used to describe a process that can be automated easily and will deliver significant benefits quickly.

NEW QUESTION # 131

Who is responsible for preparing the test data?

- A. The SME with the development team
- **B. The SME with the Business Analyst**
- C. The process owner with the IT team or system owners
- D. The process owner with the Business Analyst

Answer: B

Explanation:

In the context of RPA (Robotic Process Automation), preparing the test data is a collaborative effort that typically involves the Subject Matter Expert (SME) and the Business Analyst. The SME provides the domain knowledge and understanding of the process, while the Business Analyst has the technical know-how and understanding of the RPA tools and capabilities. Together, they ensure that the test data is representative of the actual data that the RPA solution will handle, which is crucial for effective testing and validation of the automated workflows.

References: The role of the SME and Business Analyst in preparing test data is outlined in the UiPath Documentation Portal, specifically in the section "Data-Driven Testing" found at <https://docs.uipath.com/studio/standalone/2023.10/user-guide/data-driven-testing1>.

NEW QUESTION # 132

In the context of UiPath selectors, what is an anchor?

- A. An XML fragment that stores the attributes of an element and its parent elements, including the target application
- **B. An anchor is a nearby element that helps to uniquely identify the target element.**
- C. An image in the application window that identifies the element, for example an icon or a button
- D. A selector that takes into account possible changes in the attributes of an element, identifying them based on a pattern, rather than on an exact match

Answer: B

Explanation:

In UiPath, an anchor is used in conjunction with selectors to improve the accuracy of identifying UI elements within an application. When a selector is not reliable due to dynamic content or changing layouts, an anchor—a stable element nearby the target—can be used to pinpoint the target element with greater precision. The anchor serves as a point of reference, and the relative position of the target element to this anchor is used to identify it during automation tasks.

NEW QUESTION # 133

What is an example of a feasibility-based prioritization criterion?

- A. There is a high number of stakeholders who are interested in the business process or requirement
- B. Each step in the business process has a different stakeholder
- C. There is a high number of qualified candidates for the development team
- **D. All the inputs are standardized and digital**

Answer: D

Explanation:

A feasibility-based prioritization criterion refers to factors that make a process more suitable for automation.

Having all inputs standardized and digital is an example of such a criterion because it indicates that the process is likely to be more straightforward to automate. Standardized, digital inputs reduce the complexity of the automation task and increase the likelihood of successful implementation. This is in contrast to processes with non-standardized or non-digital inputs, which may require additional steps such as digitization or standardization before they can be automated effectively.

References: The explanation is based on the UiPath Community Forum discussions and the UiPath Documentation Portal's information on feasibility and complexity in process assessment for RPA implementation.

NEW QUESTION # 134

UiPath Process Mining provides TemplateOne application that offers different generic dashboards containing information, KPIs, and analysis functionality focused on a specific process area. What are the 3 standard KPIs part of the Automation Dashboard within the TemplateOne application?

- **A. Automation Rate, Total Manual Processing time, Total Manual event cost**
- B. Automation Rate, Material Group Count, Avg. throughput time
- C. Automation Rate, Total Manual Processing time, Supplier Avg. Time
- D. Automation Rate, Total Manual event cost, Intercompany case value

Answer: A

Explanation:

In the TemplateOne application provided by UiPath Process Mining, the Automation Dashboard includes the following three standard KPIs: Automation Rate, Total Manual Processing Time, and Total Manual Event Cost. These KPIs help in assessing the efficiency and cost-effectiveness of manual vs automated processes within an organization.

UiPath Documentation on Process Mining and TemplateOne at <https://docs.uipath.com/>.

NEW QUESTION # 135

.....

Persistence and proficiency made our experts dedicated in this line over so many years. Their passing rates are over 98 and more, which is quite riveting outcomes. After using our UiPath-ABAv1 practice materials, you will have instinctive intuition to conquer all problems and difficulties in your review. We are sure you can seep great deal of knowledge from our UiPath-ABAv1 practice materials in preference to other materials obviously. These UiPath-ABAv1 practice materials have variant kinds including PDF, app and software versions.
