Topic 4: Build Salesforce Automation Solutions	20%	- Salesforce Automation • 1. Integrate Salesforce with external systems • 2. Automate approvals and notifications • 3. Build flows with Flow Builder
Topic 5: Implement MuleSoft RPA Solutions	18%	- RPA Development • 1. Debug and monitor automations • 2. Design RPA processes • 3. Configure bots and workflows

ADX-350 Prepaway Dumps & Exam ADX-350 Preview

Our ADX-350 practice dumps are so popular that all our customers are giving high praise on its high-quality to help them pass the exams. Numerous of warming feedbacks from our worthy customers give us data and confidence. We have clear data collected from customers who chose our ADX-350 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our ADX-350 exam questions!

Salesforce Certified Hyperautomation Specialist Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

AnyAirlines wants to share the Flight Path API through their public Anypoint Exchange Portal. What should be configured before the API can be shared?

- A. The API should be functional and accessible for users to interact with.
- B. The users that need access to the API should be added to the appropriate role in Anypoint Platform.
- C. The visibility level of API instances should be set to public.
- D. The API should be secured using one of the supported authentication/authorization mechanisms.

Answer: C

Explanation:

Before sharing an API on the public Anypoint Exchange Portal, several configurations must be in place:

Set Visibility Level to Public:

Ensure the API's visibility level is configured as public within the Anypoint Platform so that it can be shared and accessed by external users.

Navigate to Anypoint Platform > API Manager > Select the API > Settings > Set Visibility to Public.

Ensure API Functionality and Accessibility:

Make sure the API is fully functional and accessible so that users can interact with it once shared.

Configure Security:

While setting the visibility to public is crucial, ensuring that the API is secured using one of the supported authentication/authorization mechanisms is a best practice to control access.

NEW QUESTION # 57

The MuleSoft development team at Northern Trail Outfitters creates a Mule application that interacts with several APIs and RPA processes. The team needs to share this application with other teams to help them create similar applications.

How should the Mule application be published in Anypoint Exchange to meet this requirement?

- A. Template asset
- B. Connector asset
- C. Custom asset
- D. API asset

Answer: A

Explanation:

To share a Mule application that interacts with several APIs and RPA processes with other teams for creating similar applications, publishing it as a Template asset is the best approach:

Template Asset:

A Template in Anypoint Exchange is designed to provide a reusable solution that can be easily adapted for different use cases. It includes predefined integration logic and configurations that can be used as a starting point for new projects.

By publishing the Mule application as a Template, other teams can leverage this pre-built solution, customize it to their specific needs, and ensure consistency in integration practices across the organization.

Anypoint Exchange Templates Documentation

NEW QUESTION # 58

Which Connected App scope should be used to connect RPA Manager with an Anypoint Platform account?

- A. Exchange Administrator
- B. API Catalog Contributor
- C. Application Creator
- **D. RPA Integrator**

Answer: D

Explanation:

To connect RPA Manager with an Anypoint Platform account, the appropriate Connected App scope is RPA Integrator:

RPA Integrator Scope:

The RPA Integrator scope is designed to provide the necessary permissions for integrating RPA Manager with Anypoint Platform. This scope allows the connected app to interact with the RPA Manager and manage RPA processes.

Connected App Configuration:

When setting up a connected app in Anypoint Platform, select the RPA Integrator scope to ensure that the integration can access and manage the RPA processes as required.

NEW QUESTION # 59

Which type of integration project should be implemented with MuleSoft Composer?

- A. Batch processing of larger-than-memory files with conditional logic within the batch steps
- **B. Data transformation from a source system to a target system by a non-technical user**
- C. Automating UI interactions using image recognition
- D. Long running workflows that require manual steps and approvals by users

Answer: B

Explanation:

MuleSoft Composer is designed for business users to create integrations without deep technical knowledge. It is ideal for scenarios that involve:

Data Transformation and Integration:

Non-technical users can easily connect different systems, automate data transfers, and transform data from one system to another using a no-code interface.

MuleSoft Composer provides pre-built connectors and an intuitive interface to set up these integrations.

Simplified Automation:

The platform is optimized for creating straightforward, rule-based automations where complex coding is not required.

Therefore, automating data transformation tasks by a non-technical user fits perfectly with MuleSoft Composer's capabilities.

MuleSoft Composer Documentation

NEW QUESTION # 60

Which API policy can be applied to limit the number of requests an individual client can make to an API?

- A. Spike Control
- B. Client ID Enforcement
- **C. Rate limiting - SLA-Based**
- D. OAuth 2.0 access token enforcement

Answer: C

Explanation:

The Rate Limiting - SLA-Based policy in Anypoint Platform is designed to control the number of requests an individual client can make to an API. This policy is highly configurable and allows you to set specific limits based on service level agreements (SLAs).

Rate Limiting - SLA-Based:

This policy helps protect APIs from being overwhelmed by too many requests by enforcing a limit on the number of requests a client
