

# Valid JN0-637 Reliable Test Topics - Pass JN0-637 in One Time - Latest Test JN0-637 Objectives Pdf

P.S. Free & New JN0-637 dumps are available on Google Drive shared by CertkingdomPDF: <https://drive.google.com/open?id=1wBw9x9K-dKBjgLRJigbyD0nv9KdLVASl>

The most important feature of the online version of our JN0-637 learning materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the JN0-637 Learning Materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

## Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Troubleshooting Security Policies and Security Zones: This topic assesses the skills of networking professionals in troubleshooting and monitoring security policies and zones using tools like logging and tracing.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.</li> </ul>

## Unique Juniper JN0-637 Pdf Questions

God always helps those who help themselves. It is impossible to make great fortune overnight. Enough preparation and efforts are needed when you come across an opportunity. So we suggest that you learn our JN0-637 latest training material, which can help broaden your knowledge. Nowadays, lifelong learning has got wide attention. The much knowledge you learn, the better chance you will have. Our JN0-637 practice material suits you best. You can elevate your ability in a short time. Then you can apply what you have learned on our JN0-637 test engine into practice. We warmly welcome you to purchase our study guide.

## Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q55-Q60):

### NEW QUESTION # 55

Click the Exhibit button.

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The ge-0/0/3.0 and ge-0/0/4.0 interfaces are not active and will not respond to ARP requests to the virtual IP MAC address.
- B. This device is the active node for SRG1.
- C. This device is the backup node for SRG1.
- D. The ge-0/0/3.0 and ge-0/0/4.0 interfaces are active and will respond to ARP requests to the virtual IP MAC address.

**Answer: B,D**

### NEW QUESTION # 56

You configured a chassis cluster for high availability on an SRX Series device and enrolled this HA cluster with the Juniper ATP Cloud.

Which two statements are correct in this scenario? (Choose two.)

- A. You must use the same license key on both cluster nodes.
- B. You must use different license keys on both cluster nodes.
- C. You must set up your HA cluster after enrolling your devices with Juniper ATP Cloud
- D. When enrolling your devices, you only need to enroll one node.

**Answer: A,D**

### NEW QUESTION # 57

A company has acquired a new branch office that has the same address space as one of its local networks, 192.168.100.0/24. The offices need to communicate with each other.

Which two NAT configurations will satisfy this requirement? (Choose two.)

- A. [edit security nat source]  
user@OfficeA# show rule-set OfficeBtoA {  
from zone OfficeB;  
to zone OfficeA;

- ```

rule 1 {
match {
source-address 192.168.210.0/24;
destination-address 192.168.200.0/24;
}
then {
source-nat { interface; }
}
}
}

```
- B. [edit security nat source]

```

user@OfficeB# show rule-set OfficeAtoB {
from zone OfficeA;
to zone OfficeB;
rule 1 {
match {
source-address 192.168.200.0/24;
destination-address 192.168.210.0/24;
}
then {
source-nat { interface; }
}
}
}

```
  - C. [edit security nat static]

```

user@OfficeB# show rule-set From-Office-A {
from interface ge-0/0/0.0;
rule 1 {
match {
destination-address 192.168.210.0/24;
}
then {
static-nat {
prefix { 192.168.100.0/24; }
}
}
}
}

```
  - D. [edit security nat static]

```

user@OfficeA# show rule-set From-Office-B {
from interface ge-0/0/0.0;
rule 1 {
match {
destination-address 192.168.200.0/24;
}
then {
static-nat {
prefix { 192.168.100.0/24; }
}
}
}
}

```

**Answer: C,D**

Explanation:

Comprehensive Detailed Step-by-Step Explanation with All Juniper Security References When two networks with overlapping IP address spaces need to communicate, Network Address Translation (NAT) is required to translate the IP addresses so that they become unique across the combined network. In this scenario, both the local network and the new branch office use the same subnet: 192.168.100.0/24. To enable communication without IP conflicts, we need to translate the overlapping addresses to unique ones.

#### Understanding the Problem:

\* Local Network (Office A): 192.168.100.0/24

\* Branch Office (Office B): 192.168.100.0/24

\* Objective: Allow communication between Office A and Office B despite overlapping IP ranges.

#### Solution Overview:

To resolve the overlapping IP addresses, we can use Static NAT to create a one-to-one mapping between the overlapping IP addresses and a unique IP range. This way, when packets traverse the network boundary, their IP addresses are translated to a non-overlapping range, avoiding conflicts.

Option B and Option C implement Static NAT to resolve the issue:

\* Option B (At Office A):

\* Translates destination addresses from 192.168.200.0/24 to 192.168.100.0/24.

\* This allows Office B to reach Office A's overlapping network by targeting a unique IP range (192.168.200.0/24).

\* Option C (At Office B):

\* Translates destination addresses from 192.168.210.0/24 to 192.168.100.0/24.

\* This allows Office A to reach Office B's overlapping network by targeting a unique IP range (192.168.210.0/24).

#### Detailed Explanation:

##### 1. Static NAT Configuration at Office A (Option B):

\* Configuration:

[edit security nat static]

user@OfficeA# show rule-set From-Office-B {

from interface ge-0/0/0.0;

rule 1 {

match {

destination-address 192.168.200.0/24;

}

then {

static-nat {

prefix { 192.168.100.0/24; }

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

}

\* Explanation:

\* from interface ge-0/0/0.0;: Specifies the interface through which the traffic is received.

\* Matching Traffic:

\* destination-address 192.168.200.0/24;: Matches packets destined for 192.168.200.0/24.

\* Action:

\* static-nat { prefix { 192.168.100.0/24; } } : Translates the destination address to 192.168.100.0/24.

\* Result:

\* Office B sends packets to 192.168.200.0/24, which are translated to 192.168.100.0/24 upon arrival at Office A.

#### NEW QUESTION # 58

##### Exhibit

You are not able to ping the default gateway of 192.168.100.1 (or your network that is located on your SRX Series firewall. Referring to the exhibit, which two commands would correct the configuration of your SRX Series device? (Choose two.)

- A. ☐
- B. ☐
- C. ☐
- D. ☐

**Answer: A,D**

#### NEW QUESTION # 59

##### Exhibit

□ You are using traceoptions to verify NAT session information on your SRX Series device. Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The SRX Series device is performing only source NAT on this session.
- B. This is the first packet in the session.
- C. This is the last packet in the session.
- D. The SRX Series device is performing both source and destination NAT on this session.

Answer: C,D

## NEW QUESTION # 60

.....

You can access our web-based Security, Professional (JNCIP-SEC) (JN0-637) practice exam from anywhere with an internet connection, and fit your studying into your busy schedule. No more traveling to a physical classroom, wasting time and money on gas or public transportation. With the web-based Juniper JN0-637 Practice Test, you can evaluate and enhance your progress. Customizable web-based mock exam creates a real Security, Professional (JNCIP-SEC) (JN0-637) exam environment and works on all operating systems.
