

2026 100% Free OGEA-101–Accurate 100% Free Cost Effective Dumps | OGEA-101 Valid Braindumps Free

P.S. Free 2026 The Open Group OGEA-101 dumps are available on Google Drive shared by PassLeader:
<https://drive.google.com/open?id=1FXlQphY2GilEj2FOCR1umVvh11Z43Qv>

Free demos offered by PassLeader gives users a chance to try the product before buying. Users can get an idea of the OGEA-101 exam dumps, helping them determine if it's a good fit for their needs. The demo provides access to a limited portion of the OGEA-101 dumps material to give users a better understanding of the content. Overall, PassLeader TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) free demo is a valuable opportunity for users to assess the value of the PassLeader's study material before making a purchase. The PassLeader provides 1 year of free updates of real questions. This offer allows students to stay up-to-date with changes in the exam's content.

Our company has employed a lot of leading experts in the field to compile the OGEA-101 exam torrents, so you can definitely feel rest assured about the high quality of our OGEA-101 question torrents. On the other thing, the pass rate among our customers who prepared the exam under the guidance of our OGEA-101 Study Materials has reached as high as 98% to 100%. What's more, you will have more opportunities to get promotion as well as a pay raise in the near future after using our OGEA-101 question torrents since you are sure to get the certification.

Some Best Features of The Open Group OGEA-101 Exam Questions

Companies can decide whether candidates are The Open Group qualified, or in other words, candidates' educational background and relating OGEA-101 professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged OGEA-101 Certification, can they become popular employees. So for you, the OGEA-101 latest braindumps compiled by our company can offer you the best help.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q92-Q97):

NEW QUESTION # 92

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2 & 3
- B. 3 & 4
- C. 1 & 2
- D. 1 & 4

Answer: C

Explanation:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect.

NEW QUESTION # 93

Consider the following statements about Architecture Partitioning:

- * The TOGAF ADM requires a partitioning model for architecture development
- * Architectures are partitioned when different teams need to work on different elements of the architecture at the same time
- * Partitions can be used to facilitate architecture re-use

Which statements are correct?

- A. 1 and 2
- B. 1 and 3
- **C. 2 and 3**
- D. 1, 2 and 3

Answer: C

Explanation:

Comprehensive and Detailed Explanation

Architecture Partitioning is an ADM technique in TOGAF that addresses how large and complex architectures can be broken down into manageable parts. The intent is to make architecture development more effective, especially in large enterprises with multiple teams, stakeholders, and domains.

Key points from TOGAF:

- * TOGAF does not mandate a partitioning model. It provides guidelines and techniques to help architects determine whether and how to partition. This means statement 1 is incorrect.
- * Statement 2: Correct. Architectures may be partitioned to allow different teams to work on different elements in parallel (e.g., by domain, line of business, geographic scope). Partitioning provides clear ownership and reduces overlap or conflict.
- * Statement 3: Correct. Partitions can be structured in a way that supports architecture re-use, since well-defined partitions (e.g., capability-based or domain-based) enable consistent re-use of architecture building blocks across projects.

Correct Mapping

- * Statement 1: Incorrect (partitioning is not required by ADM).
- * Statement 2: Correct.
- * Statement 3: Correct.

Correct answer is D (2 and 3).

Why the other options are incorrect

- * A (1, 2 and 3): Incorrect because TOGAF does not require partitioning.
- * B (1 and 3): Incorrect because 1 is not correct.
- * C (1 and 2): Incorrect because 1 is not correct.

References

- * The Open Group, TOGAF 9 Certified Study Guide - coverage of partitioning and its uses in large- scale architecture development.

NEW QUESTION # 94

In which section of the TOGAF template for Architecture Principles would a reader find the answer to the question of "How does this affect me?"

- **A. Implications**
- B. Name
- C. Rationale
- D. Statement

Answer: A

Explanation:

Comprehensive and Detailed Explanation

TOGAF defines an Architecture Principle as a qualitative statement of intent that should be met by the architecture. To ensure clarity and consistent application, TOGAF provides a standard template for documenting each principle. The template includes four parts:

- * Name - A clear, precise, and easy-to-remember name for the principle.
- * Answers the question: What is this principle called?
- * Statement - A short, unambiguous sentence that communicates the essence of the principle.
- * Answers the question: What does this principle mean?
- * Rationale - Explains why the principle is important, the benefits of adopting it, and how it supports the enterprise's goals.
- * Answers the question: Why should we adopt this principle?
- * Implications - Highlights the consequences of adopting the principle, including the impact on business processes, technology, governance, and resources.
- * Answers the question: How does this affect me?

Therefore, the correct section where the reader would find the answer to "How does this affect me?" is Implications.

Why the other options are incorrect

- * A. Statement: Defines the essence of the principle but does not address consequences.
- * B. Rationale: Explains the reasoning and justification for the principle but not its practical effects.
- * C. Name: Only provides the identifier or title of the principle.

References

- * The Open Group, TOGAF Standard, Version 9.2, Part III: ADM Guidelines & Techniques - Architecture Principles.
- * The Open Group, TOGAF 9 Certified Study Guide - description of the Architecture Principles template and the purpose of each section.

NEW QUESTION # 95

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	Sufficient documentation to get permission to proceed. Permission to proceed to develop a Target Architecture to prove out a summary target.	The scope of the problem being addressed. Those who have interests that are fundamental to the problem being addressed. (Stakeholders & Concerns) What summary answer to the problem is acceptable to the stakeholders? Stakeholder priority and preference. What value does the summary answer provide?

Which ADM Phase does this describe?

- A. Phase A
- B. Phase C
- **C. Phase B**
- D. Preliminary Phase

Answer: C

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference:

The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

NEW QUESTION # 96

Complete the following sentence:

Presenting different _____ and _____ to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture

- A. Business Scenarios Business Models
- B. Solutions Applications
- **C. Architecture Views Architecture Viewpoints**
- D. Alternatives Trade-offs

Answer: C

Explanation:

According to the TOGAF Standard, an architecture view is a representation of a system from the perspective of a related set of concerns¹. An architecture viewpoint is a specification of the conventions for a particular kind of architecture view¹. Presenting different architecture views and architecture viewpoints to stakeholders helps architects to extract hidden agendas, principles, and requirements that could impact the final target architecture. This is because different stakeholders may have different concerns and interests in the system, and by showing them how the system addresses their concerns from different perspectives, the architects can elicit more feedback and validation from them². For example, a business stakeholder may be interested in the business architecture view, which focuses on the business processes, functions, and capabilities of the system³. A security stakeholder may be interested in the enterprise security view, which addresses the security aspects of the system, such as confidentiality, integrity, and availability³. By presenting these views to the respective stakeholders, the architects can ensure that the system meets their expectations and needs, and also identify any potential issues or gaps that may affect the target architecture.
