熱門的JN0-336最新考古題，免費下載JN0-336考試指南幫助妳通過JN0-336考試

我們NewDumps的IT認證考題擁有多年的培訓經驗，NewDumps Juniper的JN0-336考試培訓資料是個值得信賴的產品，我們的IT精英團隊不斷為廣大考生提供最新版的JN0-336考試培訓資料，我們的工作人員作出了巨大努力，以確保你們在考試中總是取得好成績，可以肯定的是，NewDumps Juniper的JN0-336考試材料是為你提供最實際的IT認證材料。

最新的 JNCIS-SEC JN0-336 免費考試真題 (Q46-Q51):

問題 #46

On an SRX5800, which port is used for chassis cluster out-of-band management?

- A. user-defined
- B. fxp1

- C. Txp0
- D. ge-0/0/0

答案： A

問題 #47

You are implementing an SRX Series device at a branch office that has low bandwidth and also uses a cloud-based VoIP solution with an outbound policy that permits all traffic.

Which service would you implement at your edge device to prioritize VoIP traffic in this scenario?

- A. AppFW
- B. AppQoS
- C. AppQoS
- D. SIP ALG

答案： C

解題說明：

The service that you would implement at your edge device to prioritize VoIP traffic in this scenario is AppQoS. AppQoS is a feature that enables you to allocate bandwidth and prioritize traffic based on application signatures or custom rules. AppQoS can enhance the quality of service and experience for critical or latency-sensitive applications, such as VoIP. You can configure AppQoS policies to assign different classes of service (CoS) values or queue numbers to different applications or traffic flows. You can also define bandwidth limits, guarantees, or bursts for each class or queue. Reference: = [Application Quality of Service Overview], [Configuring Application Quality of Service]

問題 #48

You are asked to ensure that if the session table on your SRX Series device gets close to exhausting its resources, that you enforce a more aggressive age-out of existing flows.

In this scenario, which two statements are correct? (Choose two.)

- A. The high-watermark configuration specifies the percentage of how much of the session table can be allocated before applying a more aggressive age-out timer
- B. The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the low-watermark value is met.
- C. The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the high-watermark value is met.
- D. The high-watermark configuration specifies the percentage of how much of the session table is left before disabling a more aggressive age- out timer.

答案： A,C

解題說明：

The early-ageout configuration specifies the timeout value, in seconds, that will be applied once the high- watermark value is met. The high-watermark configuration specifies the percentage of how much of the session table can be allocated before applying a more aggressive age-out timer. This ensures that the session table does not become full and cause traffic issues, and also ensures that existing flows are aged out quickly when the table begins to get close to being full.

問題 #49

Click the Exhibit button.

You are asked to create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device.

What needs to be added to this configuration to complete this task?

- A. Add an action to the permit portion of the security policy.
- B. Add a security intelligence policy to the permit portion of the security policy.
- C. Add logging to the permit portion of the security policy.
- D. Add a match rule to the security policy with an appropriate threat level.

答案： B

解題說明：

To create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device, you need to add a security intelligence policy to the permit portion of the security policy. A security intelligence policy is a policy that allows you to block or monitor traffic from malicious sources based on threat intelligence feeds from Juniper ATP Cloud or other providers. One of the feeds that you can use is the Infected-Hosts feed, which contains IP addresses of hosts that are infected with malware and communicate with command-and-control servers.

You can create a profile and a rule for the Infected-Hosts feed and specify the threat level and the action to take for the infected hosts. Then, you can link the security intelligence policy with the firewall policy and apply it to the traffic that you want to protect.

Reference: = Security Intelligence Overview, Configuring Security Intelligence Policy, Configure the Security Intelligence Policy on the SRX Series Device

問題 #50

Exhibit

You are asked to track BitTorrent traffic on your network. You need to automatically add the workstations to the High Risk Workstations feed and the servers to the BitTorrent Servers feed automatically to help mitigate future threats. Which two commands would add this functionality to the FindThreat policy? (Choose two.)

- A.
- B.
- C.
- D.

答案： A,B

問題 #51

.....

不要再因為準備一個考試浪費太多的時間了。快點購買NewDumps的JN0-336考古題吧。有了這個考古題，你將更好地知道該怎麼準備考試才更有效率。這是一個可以讓你輕鬆就通過考試的難得的工具，錯過這個機會你將會後悔。所以，不要猶豫趕緊行動吧。
