our 156-536 exam guide has not equivocal content that may confuse exam candidates. All question points of our 156-536 study quiz can dispel your doubts clearly. Get our 156-536 certification actual exam and just make sure that you fully understand it and study every single question in it by heart. And we believe you will get benefited from it enormously beyond your expectations with the help our 156-536 Learning Materials.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q89-Q94):

NEW QUESTION # 89

Where are quarantined files stored?

- A. On client computer, under C:\Program Files\CheckPoint\Endpoint Security\Remediation\quarantine
- **B. On client computer, under C:\ProgramData\CheckPoint\Endpoint Security\Remediation\quarantine**
- C. On client computer, under C:\ProgramData\CheckPoint\Harmony Endpoint Security\quarantine
- D. On Management server, under %FWDIR%\sba\Remediation\quarantine

Answer: B

NEW QUESTION # 90

The Endpoint administrator prepared deployment rules for remote deployment in a mixed desktop environment. Some of the non-Windows machines could not install Harmony Endpoint clients. What is the reason for this?

- A. Deployment rules were assigned to users not to machines
- B. Administrator doesn't run chmod command, to allow execution permission to the deployment script
- C. macOS clients are not supported by Harmony Endpoint
- **D. Deployment rules are not supported on macOS clients**

Answer: D

Explanation:

The official Check Point Harmony Endpoint documentation clearly states that deployment rules (automatic deployment) are not

supported for macOS clients. macOS client deployments must instead be performed manually using exported packages or third-party deployment methods.

Exact Extract from Official Document:

"Deploy New Endpoints... macOS: No" (indicating that deployment rules cannot automatically deploy endpoints for macOS)

NEW QUESTION # 91

In a Standalone installation, the EMS is installed on the same computer or a different one than the NMS?

- A. Half on one and half on another computer
- B. Different
- C. Both
- D. Same

Answer: D

NEW QUESTION # 92

Harmony Endpoint's Full Disk Encryption (FDE) only allows access to authorized users using what?

- A. Username verification
- B. Multifaceted pre-boot capabilities
- C. Single login
- D. Strong Passwords

Answer: B

NEW QUESTION # 93

Which of the following is TRUE about the functions of Harmony Endpoint components?

- A. Web Management Console for Endpoint connects to the Check Point Security Management Server (SMS)
- B. SmartEndpoint connects to the Check Point Security Management Server (SMS)
- C. SmartConsole connects to and manages the Endpoint Management Server (EMS)
- D. SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)

Answer: D

Explanation:

The SmartEndpoint Console is a key component in the Harmony Endpoint architecture, specifically designed to connect to and manage the Endpoint Management Server (EMS). It is a Check Point SmartConsole application used to deploy, monitor, and configure endpoint security clients and policies, communicating directly with the EMS. In contrast, SmartEndpoint does not connect to the Security Management Server (SMS) as stated in option A. SmartConsole (C) is a broader management tool for Check Point gateways, not specifically for the EMS. Option D, regarding the Web Management Console, is not supported by the documentation as connecting to the SMS. Therefore, "SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)" (B) is the true statement.

NEW QUESTION # 94

.....

As a key to the success of your life, the benefits that our 156-536 study braindumps can bring you are not measured by money. 156-536 exam questions can not only help you pass the exam, but also help you master a new set of learning methods and teach you how to study efficiently, our 156-536 Study Materials will lead you to success. And 156-536 study materials provide free trial service for consumers. Come and have a try!
