Pass Guaranteed Veeam - VMCE_v12 –The Best Valid Test Vce

The VMCE_v12 prep torrent we provide will cost you less time and energy. You only need relatively little time to review and prepare. After all, many people who prepare for the VMCE_v12 exam, either the office workers or the students, are all busy. But the VMCE_v12 test prep we provide are compiled elaborately and it makes you use less time and energy to learn and provide the VMCE_v12 Study Materials of high quality and seizes the focus the VMCE_v12 exam. It lets you master the most information and costs you the least time and energy.

Veeam Certified Engineer v12 Sample Questions (Q98-Q103):

NEW QUESTION # 98
A company has an RPO set at 4 hours and values data protection and disaster recovery. A disaster occurs on June 12, 2023 at 10:00 AM.
Which restore point gives the company the best RPO?

- A. June 12,2023,5:00 AM

- B. June 12,2023,9:30 AM
- C. June 12,2023, 1:00 PM
- D. June 12,2023,8:00 AM

Answer: B

Explanation:
Given the company has an RPO set at 4 hours, the restore point that gives the best RPO is the one closest to the time of the disaster without going over the disaster's timestamp. Since the disaster occurred on June 12, 2023, at 10:00 AM, the restore point at June 12, 2023, 9:30 AM would be the most recent one within the RPO threshold. This restore point minimizes data loss and provides the most current data before the disaster.

NEW QUESTION # 99
A backup administrator must enable guest file system indexing for a backup job of a Microsoft Windows file server VM. All required credentials are added to the Veeam Backup & Replication server. VMware Tools (VIX) cannot be used due to security regulations. What should be done to make it possible in the following environment?

- A. Install a file system indexing plugin on the Microsoft Windows file server
- B. Use the Veeam Backup & Replication server as a quest interaction proxy
- C. Connect the ESXi host to the VM network
- D. Use the proxy server as a guest interaction proxy

Answer: D

Explanation:
If VMware Tools (VIX) cannot be used due to security regulations, the backup administrator can use the proxy server as a guest interaction proxy to enable guest file system indexing for a backup job. The guest interaction proxy is responsible for the deployment and coordination of guest processing tasks, such as guest file system indexing, which does not require VIX.

NEW QUESTION # 100
An administrator is asked to change a backup copy job from periodic mode to immediate mode.
How can this be accomplished?

- A. Seed a new job with the original backup copy job data.
- B. Modify the job to target the Scale-out Backup Repository.
- C. Create a new backup copy job and delete the original job.
- D. Modify the job type under properties.

Answer: D

Explanation:
https://helpcenter.veeam.com/docs/backup/vsphere/backup_copy_modes.html?ver=120#changin g-backup-copy-modes

NEW QUESTION # 101
The administrator of a VMware environment backed up by Veeam Backup & Replication has a critical server that has crashed and will not reboot. They were able to bring it back online quickly using Instant VM Recovery so people could continue to work. What else is required to complete the recovery?

- A. Commit tailback
- B. Migrate to production
- C. Merge delta file
- D. Commit failover

Answer: B

Explanation:
After using Instant VM Recovery to bring a critical crashed server back online quickly, the final step required to complete the recovery process is A: Migrate to production. Instant VM Recovery allows a VM to run directly from the backup file in a temporary

location, enabling rapid recovery and minimal downtime. However, because the VM is running in this provisional state, it's essential to migrate it back to the production environment to ensure long-term stability and performance. The "Migrate to production" operation involves moving the running VM from the backup storage to the production storage, typically involving a storage vMotion in VMware environments or a similar process in other hypervisors. This step ensures that the VM is fully restored to its original or a new production environment, solidifying the recovery and allowing the VM to operate as part of the normal infrastructure once again.

NEW QUESTION # 102

An engineer needs to test the impact of operating system updates on app functionality in an isolated non-production environment. What Veeam Backup and Replication feature can be used to facilitate this?

- A. Direct Storage Snapshots
- B. Instant Recovery
- C. Virtual Labs
- D. Replication

Answer: C

Explanation:
Virtual Labs is the ideal feature for testing the impact of operating system updates in an isolated environment. Virtual Labs allow you to create a secure, isolated copy of your production environment where you can test updates, patches, and other changes without affecting the live environment.

NEW QUESTION # 103

......

In order to make life better, attending Veeam certification examinations will be the best choice for every IT workers. Passing VMCE_v12 exam and obtaining a certification help candidates get salary raise and position promotion opportunities. It will be a fast and convenient road to success for the certification with our Veeam VMCE_v12 Practice Test Engine. As for our guaranteed pass policy, our products are too good a change to miss for ambitious people.
