

# XSOAR-Engineer Fragen Und Antworten, XSOAR-Engineer Lernhilfe

Die meisten Leute wählen Zertpruefung, denn es über große Bequemlichkeit und Anwendbarkeit verfügt. Die IT-Eliten von Zertpruefung verfolgen ständig die Schulungsunterlagen von Palo Alto Networks XSOAR-Engineer Zertifizierung aus ihren professionellen Prospektiven, was die Genauigkeit unserer Schulungsunterlagen zur Palo Alto Networks XSOAR-Engineer Prüfung garantiert. Wenn Sie noch besorgt sind, können Sie einen Teil der Prüfungsfragen und Antworten downloaden, bevor Sie die Palo Alto Networks XSOAR-Engineer Schulungsunterlagen von Zertpruefung kaufen.

## Palo Alto Networks XSOAR-Engineer Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Incident Interactions and Reporting: This domain covers incident operations including states and actions, War Room activities, incident relationships, and dashboard and report configuration for metrics and visualization.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Threat Intelligence Management: This domain focuses on threat intelligence operations including indicator creation and configuration, indicator relationships, enrichment with source reliability, external intelligence sharing, and exclusion list management.</li> </ul>

Thema 3	<ul style="list-style-type: none"> <li>• Planning, Installation, and Maintenance: This domain covers system setup and administration including authentication configuration, engine deployment, dev</li> <li>• prod environment planning, Marketplace pack management, integration instance configuration, and system maintenance.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>• Use Case Planning and Development: This domain focuses on designing security use cases through incident and indicator lifecycle management, field and layout customization, classifier and mapper configuration, incident creation methods, pre</li> <li>• post-processing, and incident type configuration with playbooks, layouts, SLAs, and lists.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• Playbook Development: This domain addresses automation through playbook creation including task configuration, context data manipulation, various task types, sub-playbooks with looping, filters and transformers, debugger usage, built-ins and scripts, automation script creation, and job management.</li> </ul>

## XSOAR-Engineer Fragen & Antworten & XSOAR-Engineer Studienführer & XSOAR-Engineer Prüfungsvorbereitung

Die Schulungsunterlagen zur Palo Alto Networks XSOAR-Engineer Zertifizierungsprüfung von Zertpruefung sind am besten. Wir sind bei den Kandidaten sehr beliebt. Wenn Sie die Schulungsunterlagen zur Palo Alto Networks XSOAR-Engineer Zertifizierungsprüfung von Zertpruefung zur Zertpruefung benutzen, geben wir Ihnen eine 100%-Pass-Garantie. Sonst erstatteten wir Ihnen die gesamte Summe zurück, um Ihre Interessen zu schützen. Unser Zertpruefung ist ganz zuverlässig.

### Palo Alto Networks XSOAR Engineer XSOAR-Engineer Prüfungsfragen mit Lösungen (Q62-Q67):

#### 62. Frage

What is an outcome of using sections within a tab when customizing an incident layout?.

- A. Restricting access to sensitive fields based on user roles, ensuring data privacy within the specific incident type.
- B. Enforcing mandatory fields that must be completed before an incident can be closed.
- C. Grouping related fields and information logically, improving readability and data entry efficiency.
- D. Triggering specific automations or playbooks when data within that section is modified during an investigation.

**Antwort: C**

Begründung:

The Layout customization section of the XSOAR Admin Guide explains that incident layouts control how analysts view and interact with fields, evidence, and metadata. Within a layout tab, sections exist purely for the purpose of organizing related fields into structured blocks, improving clarity, readability, and workflow efficiency. This is essential in complex incident types where numerous fields must be grouped logically (e.g.,

"User Details," "Endpoint Information," "Alert Metadata").

Sections do not trigger automations or playbooks; automation triggers are defined through playbooks, field- change scripts, or incident type settings. They also do not enforce field mandatory requirements-mandatory fields are defined in the incident type configuration, not within layout sections. Likewise, RBAC does not operate at the section level; access restrictions apply to fields or entire incident types, not layout sections.

Therefore, the only correct and documented result of using sections within tabs is enhanced logical grouping of fields, improving analyst usability and data-entry organization. This aligns with option C, matching the intended purpose described in the layout configuration documentation.

#### 63. Frage

Based on the image below, what is the output when "Test" is clicked?.

- A. Red.
- B. Yellow.
- C. Orange.
- D. Blue.

Antwort: A

64. Frage

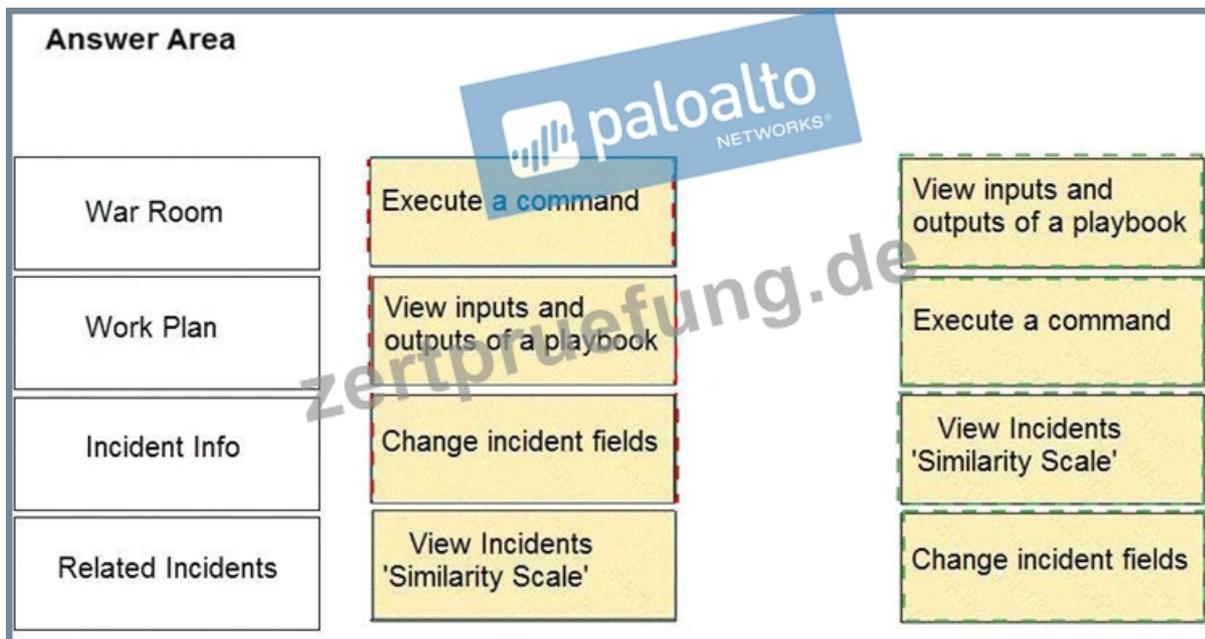

Match the appropriate action to the layout type.

**Answer Area**

War Room	Drag answer here	View inputs and outputs of a playbook
Work Plan	Drag answer here	Execute a command
Incident Info	Drag answer here	View Incidents 'Similarity Scale'
Related Incidents	Drag answer here	Change incident fields

Antwort:

Begründung:

### Answer Area

### 65. Frage

A large number of incidents were deleted by mistake.

Which two architecture components can be used to recover the lost data? (Choose two.)

- A. Local backup
- B. Distributed database
- C. Live backup
- D. Engine

Antwort: A,C

Begründung:

<https://docs.paloaltonetworks.com/cortex/cortex-xsoar/6-6/cortex-xsoar-admin/disaster-recovery-and-live-backup/backup-the-database.html> Reference: <https://docs.paloaltonetworks.com/cortex/cortex-xsoar/6-0/cortex-xsoar-admin/disaster-recovery-and-live-backup/disaster-recovery-and-backup-overview.html>

## 66. Frage

Assuming an incident type configuration runs the associated playbook automatically, which pre-process rule action can preserve matching incidents without triggering the playbook?.

- A. Drop.
- **B. Link.**
- C. Update.
- D. Close.

**Antwort: B**

Begründung:

Pre-process rules allow XSOAR to evaluate incoming events before they are fully created as incidents. These rules can suppress, modify, or relate events based on defined criteria. According to the Admin Guide, when a pre-process rule uses the Link action, XSOAR links the incoming event to an existing incident without triggering the standard incident creation process or subsequent playbook execution. This preserves the data for correlation and investigation while preventing duplicate or unnecessary playbook runs.

The Close action (A) suppresses incidents completely and is used to auto-close unwanted events; this prevents preservation of the event and does not trigger the playbook. The Drop action (C) discards incoming events entirely, removing them from the system and not preserving them. The Update action (B) modifies or enriches existing incidents but does not stop the playbook from running on newly created incidents of that type.

Because the requirement is to preserve the incident while also preventing automatic playbook execution, the Link action is the only workflow that fulfills both requirements according to XSOAR's pre-process rule architecture. Thus, option B is correct.

## 67. Frage

.....

Jede Version der Palo Alto Networks XSOAR-Engineer Prüfungsunterlagen von uns hat ihre eigene Überlegenheit. PDF Version hat keine Beschränkung für Anlage, deshalb können Sie irgendwo die Unterlagen lesen. Wenn Sie Internet benutzen können, die Online Test Engine der Palo Alto Networks XSOAR-Engineer können Sie sowohl mit Windows, Mac als auch Android, iOS benutzen. Mit Simulations-Software können Sie die Prüfungsumwelt der Palo Alto Networks XSOAR-Engineer erfahren und bessere Kenntnisse darüber erwerben. Übrigens, Sie dürfen die Prüfungssoftware irgendwie viele Male installieren.
