Our experts have prepared SAP SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam preparation. ActualCollection provides you C_ACDET_2506 Exam Questions in 3 different formats to open up your study options and suit your preparation tempo.

It is inescapable choice to make why don't you choose our C_ACDET_2506 practice materials with passing rate up to 98-100 percent. You can have a sweeping through of our C_ACDET_2506 practice materials with intelligibly and under-stable contents. It is time to take the plunge and you will not feel depressed. All incomprehensible issues will be small problems and all contents will be printed on your minds. So even trifling mistakes can be solved by using our C_ACDET_2506 practice materials, as well as all careless mistakes you may make.

2026 The Best C_ACDET_2506 – 100% Free Free Updates | Valid Braindumps C_ACDET_2506 Book

Our C_ACDET_2506 learning quiz can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality C_ACDET_2506 exam materials may bring discredit on the company. Our C_ACDET_2506 learning questions are undeniable excellent products full of benefits, so our C_ACDET_2506 exam materials can spruce up our own image and our exam questions are your best choice.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q46-Q51):

NEW QUESTION # 46

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- **A. Translations are included in migrations and are listed as AMLStringResource in the migration**
- B. Contact an SAP Deployment lead for customization help.
- C. User with Partner Administrator can configure translation.
- D. Create a package to migrate translations by ICM.

Answer: A

NEW QUESTION # 47

Which of the following applies in a greenfield deployment scenario when migrating configurations from your test site?

- **A. You cannot make other configuration updates in ICM when a migration operation is in progress.**
- **B. The status changes to Complete when migration is finished.**
- C. if any configuration type fails during the migration process, you cannot create a new migration request.
- D. You can revert migrated configurations from the target site.

Answer: A,B

NEW QUESTION # 48

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- B. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- C. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

- D. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location.

Answer: D

Explanation:

For managing searchable lists of storage locations with associated attributes like addresses, the best SAP Ariba practice is to use a Flex Master Data (FMD) Template. This allows you to model the storage locations and related information dynamically. After creating the FMD template and loading the data (e.g., from CSV imports), you can create a custom field referencing the FMD type. This approach enables users to search, filter, and select valid locations efficiently, while also allowing the underlying data to be maintained separately and updated independently of the configuration.

Using text fields with validation or enumerations is insufficient for large or dynamic datasets and doesn't scale well. Date fields are unrelated to this scenario.

FMD provides a scalable and flexible solution for complex master data requirements like storage locations.

NEW QUESTION # 49

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. Publish the form template within the test site in order to add the form fields in the package.
- B. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- C. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- D. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- E. Discard any other packages that appear in My Action Items.

Answer: B,C,D

Explanation:

When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.

* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

* String Resource Files (C): These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.

* Flex Master Data (E): Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 50

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. Publish the form template within the test site in order to add the form fields in the package.
- B. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- C. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- D. Discard any other packages that appear in My Action Items.
- E. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.

Answer: B,C,E

NEW QUESTION # 51

The SAP PDF Questions format designed by the ActualCollection will facilitate its consumers. Its portability helps you carry on with the study anywhere because it functions on all smart devices. You can also make notes or print out the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) pdf questions. The simple, systematic, and user-friendly Interface of the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) PDF dumps format will make your preparation convenient.
