MuleSoft MCD-Level-1MuleSoft Certified Developer - Level 1 (Mule 4)2

**MCD-Level-1 Exam Reference - Exam MCD-Level-1 Fees**

What is more difficult is not only passing the Financials in MuleSoft Certified Developer - Level 1 (Mule 4) (MCD-Level-1) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the MuleSoft Certified Developer - Level 1 (Mule 4) (MCD-Level-1) certification. If you are going through the same tough challenge, do not worry because 2Pass4sure is here to assist you.

The MCD-Level-1 exam consists of 60 multiple-choice questions that must be completed within 120 minutes. MCD-Level-1 exam covers various topics, including MuleSoft architecture, MuleSoft development fundamentals, data transformation, error handling, and API design. MCD-Level-1 exam is computer-based and can be taken at any Pearson VUE testing center globally.

**MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q75-Q80):**

**NEW QUESTION # 75**

An API instance of type API endpoint with API proxy is created in API manager using an API specification from Anypoint Exchange. The API instance is also configured with an API proxy that is deployed and running in CloudHub.

An SLA-based policy is enabled in API manager for this API instance.

Where can an external API consumer obtain a valid client ID and client secret to successfully send requests to the API proxy?

- A. In the organization's public API portal in Anypoint Exchange, from an approved client application for the API proxy
- B. In Anypoint Studio, from components generated by APIkit for the API specification
- C. In Anypoint Studio, from components generated by Rest Connect for API specification
- D. In Runtime Manager, from the properties tab of the deployed approved API proxy

**Answer: A**

**Explanation:**

- \* When a client application is registered in Anypoint Platform, a pair of credentials consisting of a client ID and client secret is generated.
- \* When the client application requests access to an API, a contract is created between the application and that API.
- \* An API that is protected with a Client ID Enforcement policy is accessible only to applications that have an approved contract.

.....

In the organization's public API portal in Anypoint Exchange, from

## Highly-Praised MCD-Level-1 Qualification Test Helps You Pass the MuleSoft Certified Developer - Level 1 (Mule 4) Exam - ExamPrepAway

How far the distance between words and deeds? It depends to every person. If a person is strong-willed, it is close at hand. I think you should be such a person. Since to choose to participate in the MuleSoft MCD-Level-1 certification exam, of course, it is

necessary to have to go through. This is also the performance that you are strong-willed. ExamPrepAway MuleSoft MCD-Level-1 Exam Training materials is the best choice to help you pass the exam. The training materials of ExamPrepAway website have a unique good quality on the internet. If you want to pass the MuleSoft MCD-Level-1 exam, you'd better to buy ExamPrepAway's exam training materials quickly.

## MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q89-Q94):

### NEW QUESTION # 89

Refer to the exhibit.

The API needs to be updated using the company-wide standard for the Plan data type. The Object data type has already been published in Anypoint Exchange with the global reference .

ACME/DataTypes/PlanDataType.raml.

What is a valid RAML specification that reuses the Plan data type?

A)

B)

C)

D)

- A. Option B
- B. Option A
- C. Option C
- D. Option D

**Answer: D**

### NEW QUESTION # 90

What asset cannot be created using Design Center?

- A. API fragments
- B. API specifications
- C. API portals
- D. Mule Applications

**Answer: C**

Explanation:

API portal are created by API Exchange and cannot be created by Design Center

### NEW QUESTION # 91

Refer to the exhibit.

What is the correct syntax to add a customer ID as a URI parameter in an HTTP Listener's path attribute?

- A. (customerID)
- B. \${ customerID}
- C. #[customerID]
- D. {customerID}

**Answer: D**

### NEW QUESTION # 92

Refer to the exhibit.

What is the output payload in the On Complete phase

- A. The records processed by the last batch step: [StepTwo1, StepTwo2, StepTwo3]
- B. summary statistics with NO record data

- C. The original payload: [1,2,3]
- D. The records processed by all batch steps: [StepTwoStepOne1, stepTwoStepOne2, StepTwoStepOne3]

**Answer: B**

Explanation:

This is a trick question. On complete phase payload consists of summary of records processed which gives insight on which records failed or passed. Hence option 4 is correct answer MuleSoft Documentation Reference :

<https://docs.mulesoft.com/mule-runtime/4.3/batch-processing-concept#on-complete>

### NEW QUESTION # 93

A Scatter-Gather processes three separate HTTP requests. Each request returns a Mule event with a JSON payload. What is the final output of the Scatter-Gather?

- A. An Array of the three Mule event Objects
- B. An Object containing all three JSON payload Objects
- **C. An Object containing all three Mule event Objects**
- D. An Array of the three JSON payload Objects

**Answer: C**

Explanation:

Correct answer is An Object containing all three Mule event Objects

The Scatter-Gather component is a routing event processor that processes a Mule event through different parallel processing routes that contain different event processors. Each route receives a reference to the Mule event and executes a sequence of one or more event processors. Each of these routes uses a separate thread to execute the event processors, and the resulting Mule event can be either the same Mule event without modifications or a new Mule event with its own payload, attributes, and variables. The Scatter-Gather component then combines the Mule events returned by each processing route into a new Mule event that is passed to the next event processor only after every route completes successfully.

The Scatter-Gather component executes each route in parallel, not sequentially. Parallel execution of routes can greatly increase the efficiency of your Mule application and may provide more information than sequential processing.

Sample output is as below

□ MuleSoft Documentation reference : <https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-concept>
