Whether you buy Canadian Securities Course Exam2 CSC2 Pdf Dumps file, desktop practice test software, and web-based practice test software or all formats, your investment is secured.

### CSI Canadian Securities Course Exam2 Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

Based on market capitalization, which sector of the SSP.'TSX Composite index has one of the highest weightings within the index?

- A. Health care
- B. Utilities
- C. Information technology
- D. Energy

**Answer: D**

Explanation:

The Energy sector is one of the highest-weighted sectors in the S&P/TSX Composite Index based on market capitalization. This reflects Canada's resource-rich economy, where energy companies, including oil, gas, and related services, make up a significant portion of the market.

Other options:

- \* Health care: A relatively small portion of the index.
- \* Utilities: Have a smaller weight compared to energy.

\* Information technology: While growing, it has not surpassed energy in weight within the Canadian market.

References:

\* Volume 1, Chapter 8: Equity Securities, section on "Canadian Market Indexes" outlines the composition and sectoral weightings of the S&P/TSX Composite Index.

### NEW QUESTION # 38

An investment analyst at a bank is reviewing the high, low and closing prices of a financial services stock.

What type of analysis is this analyst conducting?

- A. Chart analysis
- B. Quantitative analysis
- C. Moving average analysis
- D. Cycle analysis

**Answer: A**

### NEW QUESTION # 39

After reviewing a client's risk tolerance, time horizon and financial objectives. Andy recommends that a long-term asset mix of 55% equities, 40% bonds and 5% cash would be most appropriate for the client.

Which approach has Andy taken in his recommendation?

- A. Tactical asset allocation
- B. Ongoing asset allocation
- C. Dynamic asset allocation
- D. Strategic asset allocation

**Answer: D**

Explanation:

Strategic asset allocation is a long-term approach to portfolio management where a target allocation among asset classes (e.g., equities, bonds, cash) is established based on the client's risk tolerance, time horizon, and financial objectives. This allocation remains relatively constant over time, with periodic rebalancing to maintain the original proportions.

\* Details of Andy's Recommendation: Andy recommends a fixed asset mix of 55% equities, 40% bonds, and 5% cash, which aligns with the principles of strategic asset allocation. The focus is on maintaining this allocation to meet long-term goals, without frequent shifts based on short-term market movements.

\* Why Other Options Are Incorrect:

\* A. Dynamic asset allocation: This involves frequent changes to asset allocation in response to market trends, which is not evident in Andy's recommendation.

\* B. Tactical asset allocation: This is a short-term, active approach where adjustments are made based on market conditions to capitalize on opportunities.

\* D. Ongoing asset allocation: While this involves periodic rebalancing, it is not a defined approach like strategic allocation.

:

CSC Volume 2, Chapter 16: Asset allocation strategies.

### NEW QUESTION # 40

A fixed-rate bond was originally priced at \$100 and paid \$5 per year in interest. Currently, the bond is trading at \$102.75. What is the impact on the current yield of coupon of the bond as a result of the change in price?

- A. The current yield is higher than 5%.
- B. The coupon is lower than 5%.
- C. The coupon is higher than 5%.
- D. The current yield is lower than 5%

**Answer: D**

Explanation:

The coupon rate of the bond remains fixed at 5%, as it is based on the bond's original par value of \$100. The current yield, however, decreases because the bond's price has increased to \$102.75. Current yield is calculated as:

$$\text{Current Yield} = \frac{\text{Coupon Payment}}{\text{Current Price}}$$

Given:

\* Coupon Payment = \$5

\* Current Price = \$102.75

$$\text{Current Yield} = \frac{5}{102.75} \approx 4.87\%$$

\* A. The coupon is higher than 5%: The coupon remains fixed at 5%.

\* B. The current yield is higher than 5%: The current yield is lower than 5% due to the increased price.

\* D. The coupon is lower than 5%: The coupon does not change with the bond's price.

Reference: CSC Volume 1, Chapter 7, "Bond Pricing - Current Yield Calculation" explains the relationship between price changes and current yield.

#### NEW QUESTION # 41

Which type of market participant is generally regulated as an alternative trading system?

- A. Over-the-counter bulletin board.
- **B. Dark pool**
- C. Pink sheets
- D. Venture exchange

**Answer: B**

Explanation:

An alternative trading system (ATS) is a trading platform that is not a formal stock exchange but allows for the buying and selling of securities. A dark pool is a type of ATS where trade details are not displayed until after execution, providing anonymity to large institutional trades. Other options like venture exchanges, pink sheets, and OTC bulletin boards are not considered ATSs.
