New Amazon AWS-Solutions-Associate Dumps Ebook & AWS-Solutions-Associate Braindumps Downloads

The quality of our AWS-Solutions-Associate exam questions is very high and we can guarantee to you that you will have no difficulty to pass the exam. The content of the questions and answers of AWS-Solutions-Associate study braindumps is refined and focuses on the most important information. To let the clients be familiar with the atmosphere and pace of the real exam we provide the function of stimulating the exam. Our expert team updates the AWS-Solutions-Associate training guide frequently to let the clients practice more. Every detail of our AWS-Solutions-Associate learning prep is perfect.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q523-Q528):

NEW QUESTION # 523

In EC2, what happens to the data in an instance store if an instance reboots (either intentionally or unintentionally)?

- A. Data persists in the instance store.
- B. Data in the instance store will be lost.
- C. Data is partially present in the instance store.
- D. Data is deleted from the instance store for security reasons.

Answer: A

Explanation:

The data in an instance store persists only during the lifetime of its associated instance. If an instance reboots (intentionally or unintentionally), data in the instance store persists. However, data on instance store volumes is lost under the following circumstances.

Failure of an underlying drive

Stopping an Amazon EBS-backed instance

Terminating an instance

NEW QUESTION # 524

A company hosts its static website content from an Amazon S3 bucket in the us-east-1 Region. Content is made available through an Amazon CloudFront origin pointing to that bucket. Cross-Region replication is set up to create a second copy of the bucket in the ap-southeast-1 Region. Management wants a solution that provides greater availability for the website.

Which combination of actions should a solutions architect take to increase availability? (Select TWO.)

- A. Create an additional CloudFront origin pointing to the ap-southeast-1 bucket
- B. Add both buckets to the CloudFront origin
- C. Create a record in Amazon Route 53 pointing to the replica bucket
- D. Configure failover routing in Amazon Route 53
- E. Set up a CloudFront origin group with the us-east-1 bucket as the primary and the ap-southeast-1 bucket as the secondary

Answer: A,E

NEW QUESTION # 525

A company has an application that generates a large number of files, each approximately 5 MB in size. The files are stored in Amazon S3. Company policy requires the files to be stored for 4 years before they can be deleted. Immediate accessibility is always required as the files contain critical business data that is not easy to reproduce. The files are frequently accessed in the first 30 days of the object creation but are rarely accessed after the first 30 days. Which storage solution is MOST cost-effective?

- A. Create an S3 bucket Lifecycle policy to move files from S3 Standard to S3 Standard-Infrequent Access (S3 Standard-IA) 30 days from object creation. Move the files to S3 Glacier 4 years after object creation.
- B. Create an S3 bucket lifecycle policy to move files from S3 Standard to S3 Glacier 30 days from object creation. Delete the files 4 years after object creation.
- C. Create an S3 bucket lifecycle policy to move files from S3 Standard-Infrequent Access (S3 Standard-IA) 30 days from object creation. Delete the files 4 years after object creation.
- D. Create an S3 bucket lifecycle policy to move files from S3 Standard to S3 One Zone-Infrequent Access (S3 One Zone-IA) 30 days from object creation. Delete the files 4 years after object creation.

Answer: D

NEW QUESTION # 526

A company has global users accessing an application deployed in different AWS Regions, exposing public static IP addresses. The users are experiencing poor performance when accessing the application over the internet.

What should a solutions architect recommend to reduce internet latency?

- **A. Set up AWS Global Accelerator and add endpoints.**
- B. Set up an Amazon CloudFront distribution to access an application.
- C. Set up an Amazon Route 53 geoproximity routing policy to route traffic.
- D. Set up AWS Direct Connect locations in multiple Regions.

Answer: A

NEW QUESTION # 527

A company hosts its web application on AWS using seven Amazon EC2 instances. The company requires that the IP addresses of all healthy EC2 instances be returned in response to DNS queries.

Which policy should be used to meet this requirement?

- **A. Multivalue routing policy**
- B. Simple routing policy
- C. Geolocation routing policy
- D. Latency routing policy

Answer: A

Explanation:

Explanation

Use a multivalue answer routing policy to help distribute DNS responses across multiple resources. For example, use multivalue answer routing when you want to associate your routing records with a Route 53 health check. For example, use multivalue answer routing when you need to return multiple values for a DNS query and route traffic to multiple IP addresses.
