Pdf ACD201 Exam Dump & ACD201 Authorized Test Dumps

PrepAwayETE would give you access to Appian Senior Developer (ACD201) exam questions that are factual and unambiguous, as well as information that is important for the preparation of the ACD201 exam. You won't be anxious because the available Appian Senior Developer (ACD201) exam dumps are structured instead of distributed. Appian Senior Developer (ACD201) certification exam candidates have specific requirements and anticipate a certain level of satisfaction before buying a Appian ACD201 practice exam. The Appian Senior Developer (ACD201) practice exam applicants can rest assured that PrepAwayETE's round-the-clock

support staff will answer their questions.

Appian Senior Developer Sample Questions (Q52-Q57):

NEW QUESTION # 52
An insurance application has a dashboard in which all the cases with "Accident" case type and "Health Insurance" insurance type are displayed to the user, using the following query:

You need to update the query entity to display all the cases that are "Accident" case type and "Health Insurance" insurance type, or created in the last ten days.
What is the right configuration for the logical expression?

- A. ☐
- B. ☐
- C. ☐

Answer: B

Explanation:
A filter for createdDate >= today() - 10 (records created in the last 10 days).
A nested AND logical expression that requires both caseType = "Accident" and insuranceType = "Health Insurance".

NEW QUESTION # 53
You're conducting a code review and notice that some accessibility features are missing on the interfaces.
Which two UX best practices should be followed to align with accessibility requirements? (Choose two.)

- A. Indicate the hierarchy of sections with a heading tag in addition to label sizes (for example: "H1").
- B. Use rich text items to act as headers for structuring interfaces.
- C. Use a single rich text icon with "POSITIVE" or "NEGATIVE" styling to indicate statuses.
- D. Apply a label value for all fields when the label position is "Hidden".

Answer: A,D

Explanation:
Applying a label value for all fields, even when the label position is hidden, ensures screen readers and assistive technologies can interpret the field correctly.
Indicating the hierarchy of sections with heading tags improves navigation for users with assistive technologies, aligning with accessibility standards.

NEW QUESTION # 54
A view is created with the primary table PERSON and is joined using a left join with the APPOINTMENT table on the column "PERSON_ID". There is a one-to-many relationship between the PERSON and APPOINTMENT tables.
A Custom Data Type (CDT) and a data store entity have been created based on this view, with the primary key being "PERSON_ID".
Review the data presented in the PERSON and APPOINTMENT tables:
Which two statements are true when the following query entity is executed? (Choose two.)

- A. result totalCount is 1
- B. Appian makes one more query to the database(other than the actual query to fetch the data) to get the totalCount based on the applied filters and paging info.
- C. Appian makes one more query to the database(other than the actual query to fetch the data) to get the totalCount based on the applied filters.
- D. result totalCount is 3

Answer: A,C

Explanation:
Appian makes an additional query to the database (other than the main query for data) to retrieve the totalCount when fetchTotalCount: true() is used.

The result totalCount is 1, as there is only one person (PERSON_ID 1101) being filtered, even though there are multiple "New" appointments for that person; with a CDT based on PERSON_ID as the primary key, only one row is counted per person.

NEW QUESTION # 55

Consider this POST request:

https://www.example.com/suite/webapi/customer

Match the values to the correct fields in the resulting http!request value.

Note: Each value will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Answer:

Explanation:

Explanation:

NEW QUESTION # 56

What are three ways to optimize the memory usage of a process model? (Choose three.)

- A. Divide large nodes into multiple smaller nodes.
- B. Configure process variables as parameters.
- C. Pass data directly to activity nodes and smart services.
- D. Avoid storing large blocks of text in process variables.
- E. Decrease the number of process variables.
- F. Minimize the use of subprocesses in the model.

Answer: B,C,D

Explanation:

Passing data directly to activity nodes and smart services reduces unnecessary use of process variables, optimizing memory.

Configuring process variables as parameters limits their lifespan and persistence, saving memory.

Avoiding large blocks of text in process variables minimizes memory consumption within the process model.

NEW QUESTION # 57

......

The content of our hree versions of ACD201 exam questions is the absolute same, just in different ways to use. Therefore, you do not worry about that you get false information of ACD201 guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. The 3 formats of ACD201 Study Materials are PDF, Software/PC, and APP/Online. Each format has distinct strength and advantages to help you pass the exam.
