P.S. Free 2026 Cohesity COH-285 dumps are available on Google Drive shared by Test4Cram: <https://drive.google.com/open?id=1Yjo3-OTIW87z-ljKApRoeFewq6zSbUiN>

Our Test4Cram's COH-285 test training materials can test your knowledge, when you prepare for COH-285 test; and can also evaluate your performance at the appointed time. Our COH-285 exam training materials is the result of Test4Cram's experienced IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you have any concerns, you can first try COH-285 PDF VCE free demo and answers, and then make a decision whether to choose our COH-285 dumps or not.

## Cohesity COH-285 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Monitor and Maintain NetBackup:</b> This section of the exam measures skills of operations personnel and focuses on the monitoring and maintenance tasks necessary to keep a NetBackup environment healthy. The topics include the core concepts of image management and the use of the NetBackup Administration Console to verify images, expire them, import backup data, and perform manual duplication. The section explains how to manage both disk and cloud storage within NetBackup and highlights the use of reports for verification and monitoring. It also covers administrative controls for running, cancelling, suspending, resuming, and prioritizing backup or duplication jobs. Candidates learn how to initiate and monitor restore operations and understand the security management features such as role based access control and host ID certificates.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Configure NetBackup:</b> This section of the exam measures the skills of system administrators and focuses on the configuration tasks required to set up and manage a NetBackup environment. It covers the setup of primary, media, and client settings along with essential host properties, including the use of security certificates. The section explains how to configure disk storage, cloud storage, and storage unit groups to support stable backup operations. It also includes the configuration of standard and advanced backup policies and protection plans. Candidates are expected to understand specialized backup solutions such as synthetic backups, True Image Restore, multiple data streams, checkpoint restart, and different duplication methods that involve storage lifecycle policies, disk staging, and replication features.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Troubleshoot NetBackup:</b> This section of the exam measures skills of NetBackup administrators and focuses on resolving issues that occur during backup and recovery operations. It covers the interpretation of status codes and job details to diagnose failed jobs. The section also explains how to troubleshoot devices and media and how to validate connectivity between primary servers, media servers, and client systems. Candidates learn to address common problems in disaster recovery situations, including tasks related to recovering the NetBackup catalog.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Tune NetBackup:</b> This section of the exam measures skills of system engineers and focuses on analyzing performance related factors in a NetBackup environment. It introduces performance assessment and optimization practices to help candidates identify bottlenecks and improve overall efficiency. Tuning NetBackup includes making adjustments that lead to more stable and faster backup and recovery operations.</li> </ul>
