Do you feel Fortinet FCP_FCT_AD-7.4 exam preparation is tough? PracticeDump desktop and web-based online FCP - FortiClient EMS 7.4 Administrator (FCP_FCT_AD-7.4) practice test software will give you a clear idea about the final FCP_FCT_AD-7.4 test pattern. Practicing with the Fortinet FCP_FCT_AD-7.4 practice test, you can evaluate your FCP - FortiClient EMS 7.4 Administrator (FCP_FCT_AD-7.4) exam preparation. It helps you to pass the Fortinet FCP_FCT_AD-7.4 test with excellent results. Fortinet FCP_FCT_AD-7.4 imitates the actual FCP_FCT_AD-7.4 exam environment. You can take the FCP - FortiClient EMS 7.4 Administrator (FCP_FCT_AD-7.4) practice exam many times to evaluate and enhance your Fortinet FCP_FCT_AD-7.4 exam preparation level.

Fortinet FCP_FCT_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.
Topic 2	<ul style="list-style-type: none"> Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.
Topic 3	<ul style="list-style-type: none"> Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.
Topic 4	<ul style="list-style-type: none"> FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.

Fortinet is here to assist you to advance in the quick-paced, technology world if that is your goal. Your dream of passing the Fortinet FCP_FCT_AD-7.4 certification exam on your first try will come true thanks to Fortinet's first-rate FCP_FCT_AD-7.4 Practice Exam. The majority of people struggle to locate outstanding Fortinet FCP_FCT_AD-7.4 exam dumps that can enable them to get ready for the real Fortinet FCP_FCT_AD-7.4 exam.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

In a FortiSandbox integration, what does the remediation option do?

- A. Exclude specified files
- B. Wait for FortiSandbox results before allowing files
- C. Alert and notify only
- D. Deny access to a file when it sees no results

Answer: C

Explanation:

* Understanding FortiSandbox Integration:

* In a FortiSandbox integration, various remediation options are available for handling suspicious files.

* Evaluating Remediation Options:

* The remediation option for alerting and notifying without blocking access or waiting for results is essential to understand.

* Conclusion:

* The correct action for the remediation option in this context is to alert and notify only.

NEW QUESTION # 39

Refer to the exhibits, which show a network topology diagram of ZTNA proxy access and the ZTNA rule configuration.

An administrator runs the diagnose endpoint record list CLI command on FortiGate to check Remote-Client endpoint information, however Remote-Client is not showing up in the endpoint record list.

What is the cause of this issue?

- A. Remote-Client failed the client certificate authentication.
- B. Remote-Client has not initiated a connection to the ZTNA access proxy.
- C. Remote-Client provided an invalid certificate to connect to the ZTNA access proxy.
- D. Remote-Client provided an empty client certificate to connect to the ZTNA access proxy.

Answer: A

Explanation:

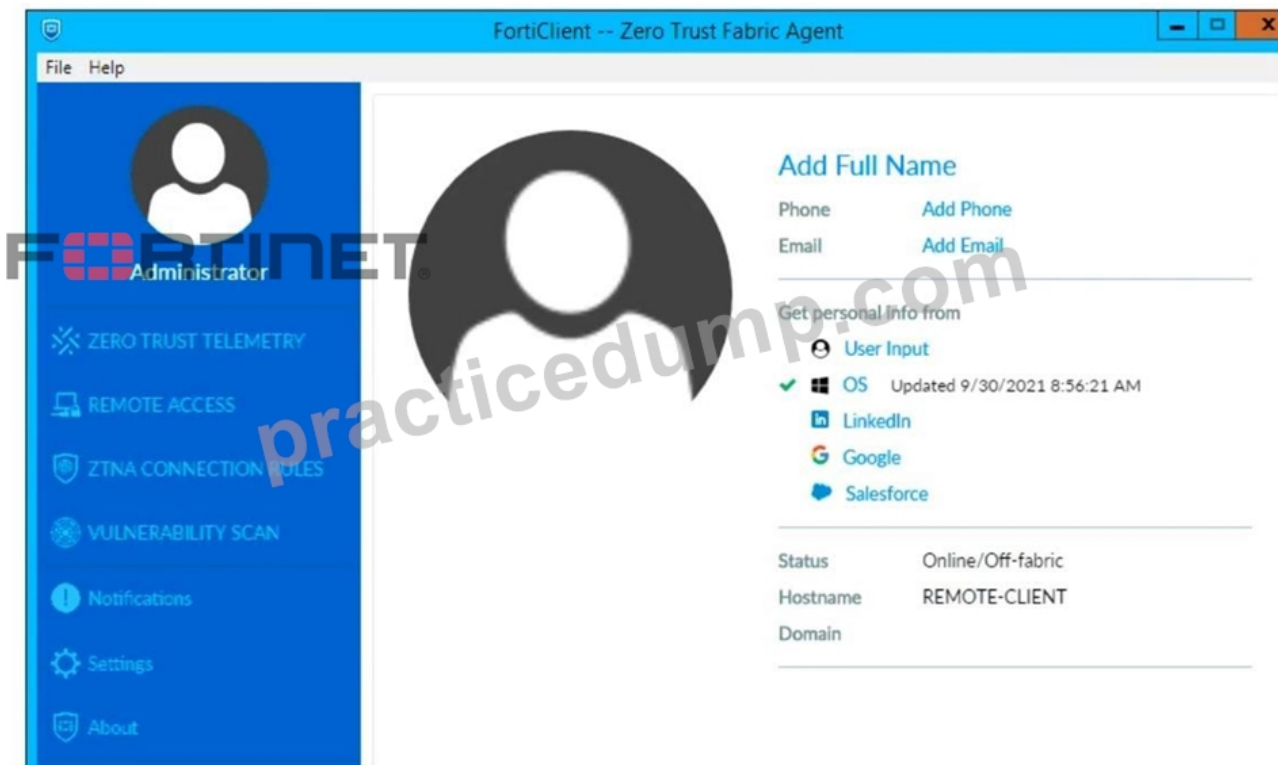

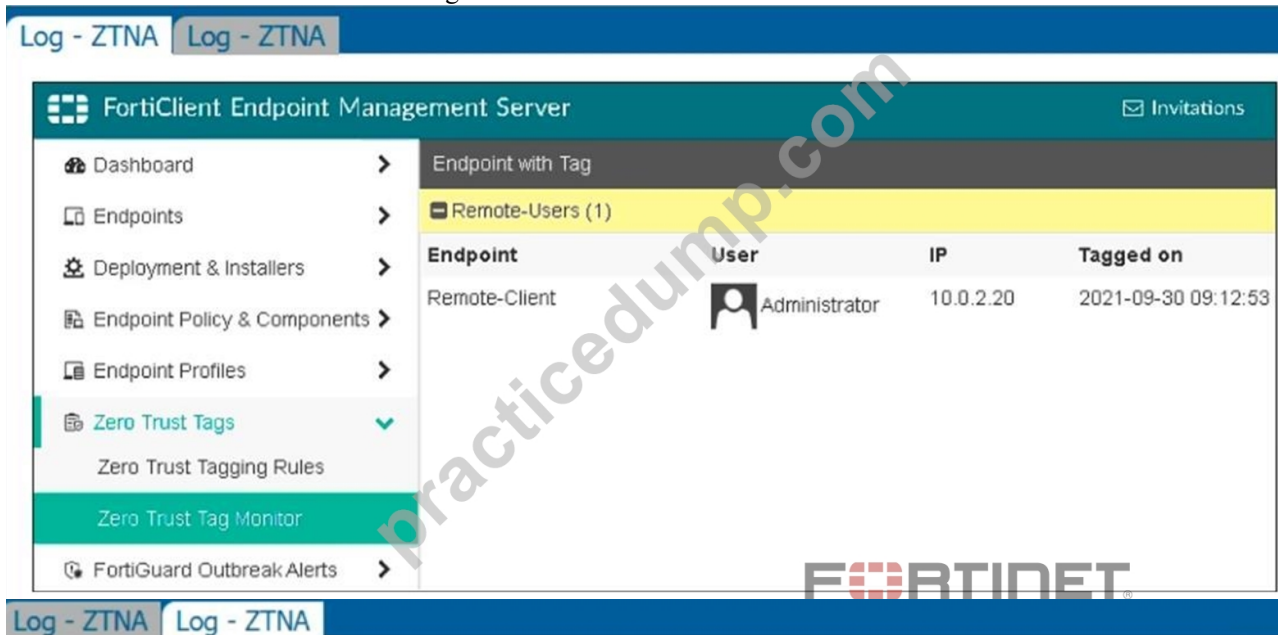

The following diagnose commands help to verify the presence of matching endpoint record, and information such as the client UID, client certificate SN, and EMS certificate SN on the FortiGate.

If any of the information is missing or incomplete, client certificate authentication might fail because the corresponding endpoint entry is not found.

<https://docs.fortinet.com/document/fortigate/7.4.0/administration-guide/25915/establish-device-identity-and-trust-context-with-forticlient-ems>

NEW QUESTION # 40

Refer to the exhibits. Which show the Zero Trust Tag Monitor and the FortiClient GUI status. Remote-Client is tagged as Remote-Users on the FortiClient EMS Zero Trust Tag Monitor. What must an administrator do to show the tag on the FortiClient GUI?

- A. Change the FortiClient system settings to enable tag visibility
- B. Update tagging rule logic to enable tag visibility
- C. Change the endpoint control setting to enable tag visibility
- D. Change the user identity settings to enable tag visibility

Answer: A

Explanation:

Based on the exhibits provided:

The "Remote-Client" is tagged as "Remote-Users" in the FortiClient EMS Zero Trust Tag Monitor.

To ensure that the tag "Remote-Users" is visible in the FortiClient GUI, the system settings within FortiClient need to be updated to enable tag visibility.

The tag visibility feature is controlled by FortiClient system settings which manage how tags are displayed in the GUI.

Therefore, the administrator needs to change the FortiClient system settings to enable tag visibility.

NEW QUESTION # 41

An administrator must add an authentication server on FortiClient EMS in a different security zone that cannot allow a direct connection.

Which solution can provide secure access between FortiClient EMS and the Active Directory server?

- A. Configure and deploy a FortiGate device between FortiClient EMS and the Active Directory server.
- B. Configure an Active Directory connector between FortiClient EMS and the Active Directory server.
- C. Configure Active Directory and install FortiClient EMS on the same VM.
- D. Configure a slave FortiClient EMS on a virtual machine.

Answer: A

Explanation:

Requirement:

The administrator needs to add an authentication server on FortiClient EMS in a different security zone that cannot allow a direct connection.

Solution Analysis:

The goal is to securely connect FortiClient EMS and the Active Directory server despite being in different security zones.

Evaluating Options:

Installing FortiClient EMS on the same VM as Active Directory (option B) is not practical due to security zone separation.

Configuring a slave FortiClient EMS on a virtual machine (option C) does not address the need for secure communication.

Configuring an Active Directory connector (option D) may not be sufficient without secure routing.

Conclusion:

Deploying a FortiGate device between FortiClient EMS and the Active Directory server ensures secure and controlled access between the two zones.

NEW QUESTION # 42

Which two statements are true about ZTNA? {Choose two.}

- A. ZTNA manages access for remote users only.
- B. ZTNA provides role-based access.
- C. ZTNA provides a security posture check.
- D. ZTNA manages access through the client only.

Answer: B,C

Explanation:

ZTNA (Zero Trust Network Access) is a security architecture that is designed to provide secure access to network resources for users, devices, and applications. It is based on the principle of "never trust, always verify," which means that all access to network resources is subject to strict verification and authentication.

Two functions of ZTNA are:

ZTNA provides a security posture check: ZTNA checks the security posture of devices and users that are attempting to access network resources. This can include checks on the device's software and hardware configurations, security settings, and the presence of malware.

ZTNA provides role-based access: ZTNA controls access to network resources based on the role of the user or device. Users and devices are granted access to only those resources that are necessary for their role, and all other access is denied. This helps to prevent unauthorized access and minimize the risk of data breaches.

NEW QUESTION # 43

.....

Will you feel nervous while facing the real exam? Choose us, since we will help you relieve your nerves. FCP_FCT_AD-7.4 Soft

test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your confidence for the exam will be strengthened. In addition, FCP_FCT_AD-7.4 exam dumps are edited by professional experts, who are quite familiar with the exam center, therefore the quality can be guaranteed. We offer you free demo for FCP_FCT_AD-7.4 to have a try before buying. And you will receive the downloading link and password within ten minutes for FCP_FCT_AD-7.4 exam materials, so that you can start your learning immediately.
