Microsoft GitHub Copilot Sample Questions (Q81-Q86):

NEW QUESTION # 81
When using GitHub Copilot Chat to generate unit tests, which slash command would you use?

- A. /tests
- B. /generate-tests
- C. /create-tests
- D. /init-tests

Answer: A

Explanation:
"/tests: Generate unit tests for the selected code or function."
This is the official description of the /tests slash command, confirming it is the command used to create unit tests.
References: GitHub Copilot Chat slash command reference.

NEW QUESTION # 82
What is the best way to share feedback about GitHub Copilot Chat when using it on GitHub Mobile?

- A. The feedback section on the GitHub website.
- B. Use the emojis in the Copilot Chat interface.
- C. The Settings menu in the GitHub Mobile app.
- D. By tweeting at GitHub's official X (Twitter) account.

Answer: B

Explanation:
"On GitHub Mobile, you can use emojis in the Copilot Chat interface to provide quick feedback on the responses." This makes option A correct.
References: GitHub Copilot Mobile documentation.

NEW QUESTION # 83
How does GitHub Copilot Chat help to fix security issues in your codebase?

- A. By providing detailed reports on the security vulnerabilities present in the codebase.
- B. By automatically refactoring the entire codebase to remove vulnerabilities.
- C. By enforcing strict coding standards that prevent the introduction of vulnerabilities.
- D. By annotating the given suggestions with known vulnerability patterns.

Answer: D

Explanation:
"When Copilot Chat generates suggestions, it may annotate them with warnings about known insecure patterns, helping developers identify potential vulnerabilities in context." This indicates that Copilot Chat assists with security by annotating code suggestions with vulnerability patterns.
References: GitHub Copilot Chat security and responsible use documentation.

NEW QUESTION # 84
Which of the following does GitHub Copilot's LLM derive context from when producing a response?

- A. Frequency of commits to the repository
- B. Version control system integrated with the IDE
- C. Neighboring or related files within a project
- D. Syntax highlighting scheme of the code in the IDE

Answer: C

Explanation:
"Copilot may use context from neighboring or related files in the project to improve the accuracy of its suggestions." This confirms that context is enriched with information from related files, making option C correct.
References: GitHub Copilot context derivation documentation.

NEW QUESTION # 85
How do you generate code suggestions with GitHub Copilot in the CLI?

- A. Describe the project's architecture # Use the copilot generate command # Accept the generated suggestion.

- B. Type out the code snippet # Use the copilot refine command to enhance it # Review the suggested command.
- C. Write code comments # Press the suggestion shortcut # Select the best suggestion from the list.
- D. Use gh copilot suggest # Write the command you want # Select the best suggestion from the list.

Answer: D

Explanation:
"To generate a suggestion, run gh copilot suggest, provide your command description, then review and select from the suggestions returned." This confirms the CLI command flow in option C.
References: GitHub Copilot CLI documentation.
