JN0-106 Reliable Test Test, JN0-106 Reliable Dumps Files

Juniper JN0-106 study guide files will help you get a certification easily. Let's try to make the best use of our resources and take the best way to clear exams with Juniper JN0-106 Study Guide files. If you are an efficient working man, purchasing valid study guide files will be suitable for you.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q14-Q19):

NEW QUESTION # 14

A security policy requires that a user account be created for auditing purposes. This user should only view configuration and operational data without making any changes. Which predefined login class would satisfy this requirement?

- A. read-only
- B. super-user
- C. operator
- D. unauthorized

Answer: A

Explanation:

Junos OS provides several predefined login classes to implement Role-Based Access Control (RBAC) efficiently. For an auditor who needs to verify the current state of the device without the risk of altering it, the read-only class is the ideal choice.

The read-only class allows a user to log in and execute show commands to view the running configuration and operational statistics. However, it strictly prohibits the user from entering configuration mode (using the configure command) or executing any " impactful " operational commands that could reset counters, clear log files, or affect traffic flow.

It is important to distinguish this from the operator class. While the operator class also cannot change the configuration, it does have permissions to clear interface statistics, reset routing protocol neighbors, and perform other " clear " or " reset " actions. For a pure auditing role where even resetting a counter would be considered a breach of policy, read-only provides the necessary " look but don't touch " environment. The super-user class, conversely, has full unrestricted access, and unauthorized is not a standard functional class.

Using the read-only class ensures compliance with security best practices by granting the minimum necessary privileges required for the auditing task.

NEW QUESTION # 15

Which command displays real-time usage statistics for all interfaces?

- A. monitor interface traffic
- B. show interfaces
- C. show interfaces extensive
- D. monitor traffic

Answer: A

Explanation:

The monitor interface traffic command displays real-time usage statistics for all interfaces on a Junos device.

NEW QUESTION # 16

Referring to the exhibit, where are the configuration backup files stored?

```
[edit system archival]
user@router# show
configuration {
    transfer-on-commit;
    archive-sites {
        "scp://user@172.15.100.2:/archive" password "$9..."; ## SECRET-DATA
        "ftp://user@10.210.9.178:/archive" password "$9..."; ## SECRET-DATA
    }
}
```

- A. Files are stored to the SCP site and the FTP site simultaneously.
- B. Files are stored to the SCP site but if the transfer fails, then to the FTP site.
- C. Files are stored to the SCP site and the FTP site in a round-robin manner.
- D. Files are stored to any site as selected by Junos internally.

Answer: B

Explanation:

If you specify more than one archive site, the device attempts to transfer files to the first archive site in the list, moving to the next site only if the transfer fails.

NEW QUESTION # 17

You are logged in to a Junos OS device with SSH and issued the `show protocols | compare` command in the configuration, but no output is shown. Which statement is correct in this scenario?

- A. Someone accidentally deleted the active configuration.
- B. You must commit the configuration before any output will be shown.
- C. The command only works for interface configuration differences.
- D. There are no changes to the candidate configuration.

Answer: D

Explanation:

If issuing the "show | compare" command in configuration mode yields no output, it indicates that there are no changes to the candidate configuration (B). This command is used to compare the current candidate configuration with the active configuration, and a lack of output suggests that the candidate configuration matches the active one, meaning no changes have been made or the changes have already been committed.

NEW QUESTION # 18

Click the Exhibit button.

```
[edit firewall filter test]
term 1 {
  from {
    source-address {
      10.0.0.0/8;
    }
  }
  then {
    log;
    next term;
  }
}
term 2 {
  then {
    reject;
  }
}
}
```

How is traffic, sourced from 10.0.0.0/8, treated by the firewall filter shown in the exhibit?

- A. logged and rejected
- B. logged with no further action
- C. logged and discarded
- D. logged and accepted

Answer: A

NEW QUESTION # 19

.....

The Juniper JN0-106 practice tests have customizable time and JN0-106 exam questions feature so that the students can set the time and JN0-106 exam questions according to their needs. The Juniper JN0-106 practice test questions are getting updated on the daily basis and there are also up to 1 year of free updates. Earning the Juniper JN0-106 Certification Exam is the way to grow in the modern era with high-paying jobs. The 24/7 support system is available for the customers so that they can get the solution to every problem they face and pass Junos, Associate (JNCIA-Junos) (JN0-106) exam. You can also evaluate the JN0-106 prep material with a free demo.

JN0-106 Reliable Test Test: <https://www.actual4exams.com/JN0-106-valid-dump.html>

We will full refund to you of JN0-106 pass-sure materials, We are the leading position in offering valid JN0-106 PDF & test engine dumps of IT certifications examinations, Our JN0-106 quiz guide is of high quality, which mainly reflected in the passing rate, The Juniper JN0-106 certification exam badge will make a good impression on the interviewer, How to let our customers know the applicability of the virtual products like JN0-106 exam software before buying?

This is certainly handy, but limited in terms of what you can actually accomplish, Western Union applied the new technology on its own network, We will full refund to you of JN0-106 pass-sure materials.

2026 JN0-106 Latest Learning Materials | Trustable 100% Free Junos, Associate (JNCIA-Junos) Reliable Test Test
