Exam 1Z0-1042-25 Learning | Reliable 1Z0-1042-25 Exam Review

Dear, hurry up to get the 100% pass 1Z0-1042-25 exam study dumps for your preparation. You will get original questions and verified answers for the Oracle certification. After purchase of the 1Z0-1042-25 exam dumps, you can instant download the 1Z0-1042-25 practice torrent and start your study with no time wasted. The validity and useful 1Z0-1042-25 will clear your doubts which will be in the actual test. When you prepare well with our 1Z0-1042-25 pdf cram, the 100% pass will be easy thing.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Topic 2	• Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Topic 3	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 4	• Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 5	• Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.

Free PDF 1Z0-1042-25 - Oracle Cloud Infrastructure 2025 Application Integration Professional Latest Exam Learning

As far as our 1Z0-1042-25 practice test is concerned, the PDF version brings you much convenience with regard to the following two aspects. On the one hand, the PDF version contains demo where a part of questions selected from the entire version of our 1Z0-1042-25 Test Torrent is contained. On the other hand, our 1Z0-1042-25 preparation materials can be printed so that you can study for the exams with papers and PDF version. With such benefits, why don't you have a try?

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q39-Q44):

NEW QUESTION # 39
There are use cases in which you need to perform an advanced XSL task that you cannot perform in Oracle Integration Cloud (OIC) data mapper. To perform advanced mapping tasks, you decide to use an external XSL mapper and then import the .xml back to your integration.
Which is NOT a valid consideration when handling this use case?

- A. You must export the entire integration that contains one or more .xml files.
- B. The exported archive must be imported into an Oracle Service Bus project in JDeveloper.
- C. The exported archive file can include a map file that is largely complete in content or a map file that is empty of content.

Answer: B

Explanation:
Importing the exported archive into an Oracle Service Bus project in JDeveloper is incorrect. The external XSL mapper will be imported back into the Oracle Integration Cloud, not an OSB project in JDeveloper.

NEW QUESTION # 40
Oracle Integration (OIC) provides the File Server feature, which is an embedded SFTP server that enables organizations to focus on building integrations without the need to host and maintain a separate SFTP server.
Which statement is NOT valid concerning the OIC File Server feature?

- A. Any external SFTP client can access File Server if an OIC administrator has configured specific folder access permissions for that client.
- B. The OIC File Server is disabled by default in a newly provisioned OIC instance.
- C. To write files to the OIC File Server from an internal OIC integration flow, a File Server action must be used.
- D. Access to the OIC File Server Management REST APIs is limited to users that have been granted the ServiceAdministrator role.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
File Server:
B:False-File Adapter, not "File Server action," is used.

NEW QUESTION # 41
You have an Oracle Integration Cloud (OIC) synchronous integration flow that updates external systems with several invocations. However, several of your OIC integration clients are reporting that they are experiencing timeouts waiting for the response confirmation from this processing. Which is a legitimate strategy to mitigate this issue?

- A. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- B. Increase the blocking timeout within the OIC integration settings to allow for extended time.
- C. Change the design implementation strategy to an asynchronous flow that provides a separate notification to clients when the processing is complete.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Timeouts in synchronous flows:
Option A:Increasing timeouts might help but doesn't address efficiency and risks longer delays.
Option B:Fine-grained calls in a loop could worsen performance, increasing latency.
Option C:Switching to an asynchronous flow decouples client waits from processing, using callbacks or notifications- a proven mitigation strategy.
C aligns with best practices for responsiveness.

NEW QUESTION # 42

Which of the following best exemplifies the concept of HATEOAS (Hypermedia as the Engine of Application State) in RESTful web services?

- A. A client application pre-fetches all possible resource states and transitions to minimize server interactions.
- B. A client application receives a base URI from the server and constructs all subsequent resource URIs by concatenating strings.
- C. A client application hardcodes all URIs for resource endpoints, allowing it to navigate the API without relying on server responses.
- D. A client application receives resource representations that include hyperlinks to related resources, enabling dynamic navigation based on the server's responses.

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
HATEOAS:
B:True-dynamic navigation via hyperlinks.

NEW QUESTION # 43

You created a scheduled integration in Oracle Integration Cloud (OIC) that uses scheduled parameters named startDate and endDate to determine the date range for a data synchronization process. The default values for these parameters are set to the previous day for startDate and the current day for endDate. However, you now want to schedule a run of the instance with a different start date.
What should you do?

- A. Modify the parameter value in the instance's integration properties and restart the instance.
- B. Modify the parameter value in the integration code and redeploy the integration.
- C. Override the parameter value when scheduling the integration instance.
- D. Create a new version of the integration by modifying the parameter value, and then deploy the new scheduled integration version.

Answer: C

Explanation:
Override the parameter values when scheduling the instance. This approach is efficient and flexible, allowing you to adjust the schedule parameters without modifying the integration.

NEW QUESTION # 44
