Certified Information Privacy Manager (CIPM) certification is highly valued in the industry and can enhance an individual's career opportunities and earning potential.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q256-Q261):

NEW QUESTION # 256
Which of the following is NOT a main technical data control area?

- A. Access controls.
- B. Obfuscation.
- C. Data minimization.
- D. Tokenization.

Answer: B

Explanation:
Obfuscation is not a main technical data control area. Obfuscation means hiding or disguising data or information to make it less intelligible or accessible. Obfuscation can be used as a security measure or a privacy-enhancing technique, but it is not a specific type of data control. The main technical data control areas are tokenization, encryption, access controls, and data minimization. Tokenization means replacing sensitive data with non-sensitive substitutes called tokens that have no intrinsic value. Encryption means transforming data into an unreadable format that can only be decrypted with a key. Access controls mean restricting who can access or modify data based on their roles, permissions, or authentication methods. Data minimization means collecting, storing, and processing only the minimum amount of data necessary for a specific purpose1, 2. NEW QUESTION # 257
What are you doing if you succumb to "overgeneralization" when analyzing data from metrics?

- A. Using data that is too broad to capture specific meanings.
- B. Possessing too many types of data to perform a valid analysis.
- C. Trying to use several measurements to gauge one aspect of a program.
- D. Using limited data in an attempt to support broad conclusions.

Answer: D

Explanation:
If you succumb to "overgeneralization" when analyzing data from metrics, you are using data that is too broad to capture specific meanings. For example, if you use a single metric such as "number of complaints" to measure customer satisfaction, you are ignoring other factors that may affect customer satisfaction such as quality of service, responsiveness, or loyalty. You are also assuming that all complaints are equally valid and important, which may not be the case. To avoid overgeneralization, you should use multiple metrics that are relevant, specific, and measurable for your objectives. NEW QUESTION # 258
Which of the following best describes proper compliance for an international organization using Binding Corporate Rules (BCRs) as a controller or processor?

- A. All employees are subject to the rules in their entirety, regardless of where the work is taking place.
- B. Employees who control personal data must complete a rigorous certification procedure, as they are exempt from legal enforcement.
- C. All employees must follow the privacy regulations of the jurisdictions where the current scope of their work is established.
- D. Employees must sign an ad hoc contractual agreement each time personal data is exported.

Answer: D

NEW QUESTION # 259
A minimum requirement for carrying out a Data Protection Impact Assessment (DPIA) would include?

- A. Assessment of the necessity and proportionality.
- B. Processing on a large scale of special categories of data.
- C. Monitoring of a publicly accessible area on a large scale.
- D. Assessment of security measures.

Answer: B

Explanation:
Processing on a large scale of special categories of data is a minimum requirement for carrying out a Data Protection Impact Assessment (DPIA) under the General Data Protection Regulation (GDPR). A DPIA is a type of Privacy Impact Assessment (PIA) that is specifically required by the GDPR when a processing activity is likely to result in a high risk to the rights and freedoms of natural persons. According to Article 35(3)(b) of the GDPR, a DPIA is mandatory when the processing involves a large scale of special categories of data or personal data relating to criminal convictions and offences. Special categories of data are personal data that reveal racial or ethnic origin, political opinions, religious or philosophical beliefs, trade union membership, genetic data, biometric data, health data, sex life or sexual orientation. These types of data are considered more sensitive and require more protection, as they may pose higher risks of discrimination, identity theft, fraud, or other harms to the data subjects.

NEW QUESTION # 260
SCENARIO
Please use the following to answer the next question:
John is the new privacy officer at the prestigious international law firm - A&M LLP. A&M LLP is very proud of its reputation in the practice areas of Trusts & Estates and Merger & Acquisition in both U.S. and Europe. During lunch with a colleague from the Information Technology department, John heard that the Head of IT, Derrick, is about to outsource the firm's email continuity service to their existing email security vendor - MessageSafe.
Being successful as an email hygiene vendor, MessageSafe is expanding its business by leasing cloud infrastructure from Cloud Inc. to host email continuity service for A&M LLP.
John is very concerned about this initiative. He recalled that MessageSafe was in the news six months ago due to a security breach. Immediately, John did a quick research of MessageSafe's previous breach and learned that the breach was caused by an unintentional mistake by an IT administrator. He scheduled a meeting with Derrick to address his concerns.
At the meeting, Derrick emphasized that email is the primary method for the firm's lawyers to communicate with clients, thus it is critical to have the email continuity service to avoid any possible email downtime. Derrick has been using the anti-spam service provided by MessageSafe for five years and is very happy with the quality of service provided by MessageSafe. In addition to the significant discount offered by MessageSafe, Derrick emphasized that he can also speed up the onboarding process since the firm already has a service contract in place with MessageSafe. The existing on-premises email continuity solution is about to reach its end of life very soon and he doesn't have the time or resource to look for another solution. Furthermore, the off-premises email continuity service will only be turned on when the email service at A&M LLP's primary and secondary data centers are both down, and the email messages stored at MessageSafe site for continuity service will be automatically deleted after 30 days.
Which of the following is the most effective control to enforce MessageSafe's implementation of appropriate technical countermeasures to protect the personal data received from A&M LLP?

- A. MessageSafe must apply appropriate security controls on the cloud infrastructure.
- B. MessageSafe must flow-down its data protection contract terms with A&M LLP to Cloud Inc.
- C. MessageSafe must notify A&M LLP of a data breach.
- D. MessageSafe must apply due diligence before trusting Cloud Inc. with the personal data received from A&M LLP.

Answer: C
