The customers can access the result of their previous given Sharing-and-Visibility-Architect Exam history and try not to make any excessive mistakes in the future. The Salesforce Certified Sharing and Visibility Architect practice tests have customizable time and Sharing-and-Visibility-Architect exam questions feature so that the students can set the time and Sharing-and-Visibility-Architect exam questions according to their needs.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q63-Q68):

NEW QUESTION # 63

Dreamforce presenters need to be able to edit their presentation details (summary, presenter biographies, etc) on a private custom object in Salesforce (Presentation). All presenters for a presentation are captured on a Presenters junction object between Presenter and User.

How can this be accomplished?

- A. Trigger on Presenter junction object that adds the user to the Sales Team for the Presentation record.

- B. Give Edit rights to the Presentation record via a Permission set that is given to the Presenters for a record.
- C. Trigger on Presenter junction object that uses Apex Managed sharing to add or remove access to the related Presentation record.

Answer: C

Explanation:

To allow presenters to edit details on a private custom object (Presentation) based on their relationship through a junction object, Apex Managed Sharing is the best solution:

- * Option A: Permission sets provide global permissions, not record-specific access based on a junction object.
- * Option B: Adding users to a Sales Team applies to opportunities, not custom objects like Presentation.
- * Option C (Correct): Apex Managed Sharing allows the creation of precise, record-specific sharing rules that dynamically grant access based on junction object relationships. This approach ensures presenters can edit only their related Presentation records.

- * Apex Managed Sharing for Custom Sharing Logic

NEW QUESTION # 64

...From customers on company Issued desktops and uses case object to track customer issues and grievances. The company would like to capture images of customer site captured by field consultants while they are editing the case record during customer site visit. The Director of IT wants to minimize customization and promote reuseability of code artifacts wherever possible, What recommendations should an architect give to the company to implement the image capture requirement, while ensuring customer that the service rep can continue to use same lightning pages they were trained to use?

- A. Use Lightning Component as an override for "Edit" action on mobile view allowing image capture feature. No Change required for desktop users.
- B. Create 4 separate button "Edit in Mobile", which opens & custom lightning component that will allow field consultants to add an image. No change required for desktop users.
- C. So Use Lightning Component as an override for "Edit" action on lightning experience allowing image capture feature. Detect the form factor of the device and redirect the user to the default not overridden view.

Answer: C

NEW QUESTION # 65

Universal Containers uses Standard WorkOrder object to track various work orders sent to field agents. Currently, the WorkOrder object has more than 400 fields. There are eight different types of work order processes established. The Director of Customer Service wants to ensure that field agents get to see only required information specific to the WorkOrder type they are addressing. Which option is recommended to implement this requirement?

- A. Use Dynamic form to add different page sections and control visibility of sections by Work Order RecordType value,
- B. Use a custom LWC to override the view action of WorkOrder with custom metadata type defining relevant fields per WorkOrder type
- C. Use different page layouts per work order type with different sections representing key information about the specific work order type.

Answer: A

NEW QUESTION # 66

Universal containers (UC) service reps are assigned to a profile which has "View All" in Case object..

To make sure service reps have access to all relevant information to attend to customer requests, which Architect consider?

Choose 2 answers

- A. Service reps will NOT able to access to Contact records because Account OWD is private
- B. Service reps will be able to access to Contact records if they are Controlled by Parent.
- C. Service reps will be able to access to Contact records due to Implicit Sharing
- D. Service reps will NOT able to access to Contact records if they are controlled by Parent.

Answer: B,C

Explanation:

Explanation

To make sure service reps have access to all relevant information to attend to customer requests, the architect should consider that service reps will be able to access contact records if they are controlled by parent or due to implicit sharing. If contact records are controlled by parent, their access level is determined by the access level of their parent account. If service reps have View All permission on Case object, they also have implicit Read access to the accounts and contacts associated with cases that they can access³. Service reps will not be able to access contact records if account OWD is private and contact records are not controlled by parent, as they will need explicit sharing or permission to access them. Service reps will not be able to access contact records if they are controlled by parent and they do not have access to the parent account.

NEW QUESTION # 67

Sales operations at Universal Containers (UC) has created Public Reports and Dashboards folders for sales managers. Sales operations and sales managers report to the VP of Sales. Sales operations currently spends a few hours each month updating users that should have access to edit reports and dashboards in these folders.

How should UC grant access to sales managers to automate access to these Public Reports and Dashboards folders?

- **A. Share the folders with a "Sales Managers" Public Group.**
- B. Share the folders with the lowest roles in the Role Hierarchy; superiors will get access automatically.
- C. Share the folders with the Sales Managers profile.

Answer: A

Explanation:

To efficiently manage access to public report and dashboard folders for a group of users (like sales managers), using a Public Group is the best practice. Public Groups can be used to define access centrally and avoid manual updates.

* Option A: Sharing via the Role Hierarchy provides hierarchical access but does not allow specific access control for folders.

* Option B: Sharing folders with a profile is not supported in Salesforce.

* Option C (Correct): Sharing folders with a Public Group ensures efficient and automated access management for sales managers.
