

Valid 300-415 Test Dumps - Practice 300-415 Exam Fee

BTW, DOWNLOAD part of Actual4test 300-415 dumps from Cloud Storage: <https://drive.google.com/open?id=1Z5LQwsKg4onoB0SQpL6FdOJnwF4AVc0U>

They work closely and check all Cisco 300-415 exam practice test questions step by step and ensure the top standard of 300-415 exam questions all the time. So rest assured that with the 300-415 exam dumps you will get everything that you need to prepare and pass the Cisco 300-415 Certification Exam with good scores. Countless Implementing Cisco SD-WAN Solutions exam candidates have passed their 300-415 exam and they all got help from real and updated Cisco 300-415 exam questions. You can also be the next successful candidate for the 300-415 certification exam.

Passing the Cisco 300-415 Exam requires a thorough understanding of SD-WAN technology and its application in enterprise networks. Candidates must be able to analyze complex network requirements and design and implement scalable, secure, and reliable SD-WAN solutions that meet the needs of their organizations.

Practice 300-415 Exam Fee - Dumps 300-415 Questions

When you know you will enjoy one year free update after purchase, you may consider how to get the latest Cisco 300-415 exam torrent. Here, we will tell you, the Actual4test system will send the update 300-415 exam dumps to you automatically. You can pay attention to your payment email. If you find there is update and do not find any update email, do not worry, you can check your spam. If there is still not, please contact us by email or online chat. Besides, if you have any questions about Cisco 300-415, please contact us at any time. Our 7/24 customer service will be always at your side and solve your problem at once.

Cisco Implementing Cisco SD-WAN Solutions Sample Questions (Q422-Q427):

NEW QUESTION # 422

Company ABC has decided to deploy the controllers using the On-Prem method. How does the administrator upload the WAN Edge list to the vManage?

- A.
- B.
- C.
- D.

Answer: B

Explanation:

Explanation

NEW QUESTION # 423

Refer to the exhibit. An engineer configured OMP with an overlay-as of 10666. What is the AS-PATH for prefix 104.104.104.104/32 on R1007?

- A. 100 10666
- B. 100 10666 20 104
- C. 100 10666 104
- D. 100 20 104

Answer: C

NEW QUESTION # 424

Exhibit.

The SD-WAN network is configured with a default full-mesh topology. An engineer wants Barcelona and Paris to communicate to each other through the London site using a control Which control policy configuration accomplishes the task?

- A.
- B.
- C.
- D.

Answer: A

Explanation:

To achieve communication between Barcelona and Paris through the London site, a control policy needs to be configured to force traffic from these two sites to pass through the London site. This setup involves manipulating the routing information such that London becomes a transit hub for traffic between Barcelona and Paris.

Understanding the Policy Requirements:

Centralized Policy: This type of policy is applied at the controller level and affects multiple devices in the SD-WAN fabric. It allows the control of routing behavior across the entire network.

Route Policy: Specifically, a route policy will be used to set the preferred path for traffic between sites, ensuring that it passes through London.

Option Analysis:

Option A: Shows the configuration of a centralized policy with a focus on route policy, which is necessary to achieve the desired traffic flow manipulation.

Other Options: Do not provide the necessary centralized policy or route policy configurations that are needed to control the routing paths between the sites.

Configuration Details:

Centralized Policy: Define the policy under the centralized policy section in the vManage GUI.

Route Policy: Create and apply a route policy that specifies the desired routing behavior for traffic between Barcelona and Paris, ensuring it routes through London.

NEW QUESTION # 425

Which data policy configuration influences BGP routing traffic flow from LAN to WAN?

- A.
- B.
- C.

Answer: A

NEW QUESTION # 426

Which attributes are configured to uniquely identify and represent a TLOC route?

- A. site ID, tag, and VPN
- B. firewall, IPS, and application optimization
- C. system IP address link color, and encapsulation
- D. origin, originator, and preference

Answer: C

Explanation:

Explanation

TLOC routes are the logical tunnel termination points on the vEdge routers that connect into a transport network. A TLOC route is uniquely identified and represented by a three-tuple, consisting of system IP address, link color, and encapsulation (Generic Routing Encapsulation [GRE] or IPSec). In addition to system IP address, color, and encapsulation, TLOC routes also carry attributes such as TLOC private and public IP addresses, carrier, preference, site ID, tag, and weight. For a TLOC to be considered in an active state on a particular vEdge, an active BFD session must be associated with that vEdge TLOC.
