ACD201 Valid Exam Materials, ACD201 Reliable Braindumps Free

ACD201 certification has great effect in this field and may affect your career even future. ACD201 real questions files are professional and has high passing rate so that users can pass exam at the first attempt. Many candidates compliment that ACD201 study guide materials are best assistant and useful for qualification exams, they have no need to purchase other training courses or books to study, and only by practicing our ACD201 Exam Braindumps several times before exam, they can pass exam in short time easily. What are you waiting for?

Appian Senior Developer Sample Questions (Q26-Q31):

NEW QUESTION # 26

You need to assign a user input task to three different groups of users: Group A, Group B, and Group C.

Each task form shares some common components with the following key differences:

Group B will receive a task that includes an additional section.

Group C will only view and enter data for one section.

What should you do?

- A. Configure the version setting on the user input task node to conditionally display the correct form.
- B. Utilize conditional logic on the form along with the showWhen parameter for interface components.**
- C. Within the process model, utilize an XOR gateway to conditionally select between the three different user input tasks.

Answer: B

Explanation:

Using conditional logic with the showWhen parameter on the form allows you to display or hide specific sections for each group within a single user input task, making the solution flexible and maintainable.

NEW QUESTION # 27

The synced record Task has a self-referential relationship defined in the column parentTaskId. There is a many-to-one record relationship between the id and parentTaskId called parentTask.

For a given task ID, you need to return the task name and the parent task name.

What should you do?

- A. Create a sync-time custom record field on the Task record called parentName. Specify this field to return in the query field selection.
- B. Use a!queryRecordType() with a filter on the task id, with fields specified to return recordType!Task.name and recordType!Task.parentTask.name.**
- C. Use a!queryRecordType() filtered on the task id once to return the task name and parent task ID. Query the record again to return the parent task name.

Answer: B

Explanation:

Using a!queryRecordType() with a filter on the task ID and specifying both recordType!Task.name and recordType!Task.parentTask.name in the fields will efficiently return both the task name and its parent task name in a single query.

NEW QUESTION # 28

You receive a warning about approaching the 2,000,000 row limit with synced records in your Production environment. What are two ways to efficiently address this warning to prevent reaching the limit? (Choose two.)

- A. Design the process to write data in batches of 1,000.
- B. **Keep only necessary data and plan to move the archived data to an audit table in a longer run.**
- C. Disable data sync immediately to prevent user facing-front end issues.
- D. **Apply one or more source filters to limit the number of rows synced in Appian.**

Answer: B,D

Explanation:

Keeping only necessary data and moving archived data to an audit table reduces the number of synced rows, addressing the limit efficiently.

Applying source filters limits the data that is synced, preventing the total row count from exceeding the limit.

NEW QUESTION # 29

You need to update an existing Appian application.

The application needs to be responsive and compatible with a variety of screen widths. For example: phone/tablet browser, Appian mobile app, desktop monitor.

Which two functions/parameters should you consider when updating the interfaces? (Choose two.)

- A. **stackWhen in Columns Layout and Side By Side Layout**
- B. Width of a page in the site object
- C. a!isPageWidth()
- D. **a!isNativeMobile()**

Answer: A,D

Explanation:

The stackWhen parameter in layout components helps interfaces adapt to different screen sizes by controlling when columns or side-by-side layouts stack vertically.

The a!isNativeMobile() function detects if the interface is being viewed on a native mobile app, allowing you to tailor the interface for mobile responsiveness.

NEW QUESTION # 30

You're developing a record view for a case management system that enables users to upload files to a specific location within an external records application.

Your requirements are:

In this record view, there should be a record action that allows the user to upload a file to the interface and configure the metadata (name, author, file size) before submitting.

If the file is larger than 250MB, the user will be notified that the file will be uploaded overnight.

Once the file has been successfully uploaded, the file will appear on the record view and the user can interact with the file.

Which two pieces of user-facing information must be captured from this business process so that you can develop this record view? (Choose two.)

- A. **The location of where the file will be uploaded to in the external records application.**
- B. **How the user wishes to interact with these files in the record view - as a grid or a series of card layouts.**
- C. The time of file upload if the file is less than 250MB.
- D. The email of the system administrator so that an email can be sent to them if the integration fails.

Answer: A,B

Explanation:

You need to know the target location in the external records application to properly upload the file.

Understanding how users want to interact with files (grid or card layout) is essential for designing the record view interface.

NEW QUESTION # 31

Dumpleader is a website you can completely believe in. In order to find more effective training materials, Dumpleader Appian experts have been committed to the research of Appian certification ACD201 exam, in consequence, develop many more exam materials. If you use Dumpleader dumps once, you will also want to use it again. Dumpleader can not only provide you with the best questions and answers, but also provide you with the most quality services. If you have any questions on our exam dumps, please to ask. Because we Dumpleader not only guarantee all candidates can pass the ACD201 Exam easily, also take the high quality, the superior service as an objective.
