## 2026 Excellent CCRN-Pediatric – 100% Free Knowledge Points | Reliable CCRN-Pediatric Dumps

If you are sure that you want to pass AACN certification CCRN-Pediatric exam, then your selecting to purchase the training

materials of RealVCE is very cost-effective. Because this is a small investment in exchange for a great harvest. Using RealVCE's test questions and exercises can ensure you pass AACN Certification CCRN-Pediatric Exam. RealVCE is a website which have very high reputation and specifically provide simulation questions, practice questions and answers for IT professionals to participate in the AACN certification CCRN-Pediatric exam.

## AACN Critical Care Nursing Exam Sample Questions (Q72-Q77):

### NEW QUESTION # 72

An inborn error of metabolism that causes premature destruction of RBC:

- A. Hemocystinuria
- B. G6PD
- C. Phenylketonuria
- D. Celiac Disease

**Answer: B**

Explanation:

Explanation: G6PD is the premature destruction of RBC when the blood is exposed to antioxidants, legumes and flava beans.

### NEW QUESTION # 73

A nurse managing a patient with carbon monoxide poisoning should consider the possibility of an inaccurate:

- A. pH
- B. EtCO<sub>2</sub>
- C. PaO<sub>2</sub>
- D. SpO<sub>2</sub>

**Answer: D**

Explanation:

Pulse oximetry (SpO<sub>2</sub>) is inaccurate in carbon monoxide (CO) poisoning because it cannot differentiate between oxyhemoglobin and carboxyhemoglobin. SpO<sub>2</sub> may appear falsely normal despite severe hypoxia.

Direct measurement with co-oximetry is required for accurate oxygen saturation.

"In CO poisoning, SpO<sub>2</sub> readings are falsely elevated due to inability to distinguish carboxyhemoglobin from oxyhemoglobin. Co-oximetry is needed to assess true oxygenation." (Referenced from CCRN Pediatric - Direct Care: Pulmonary, Toxic Inhalation and Oxygenation Monitoring)

### NEW QUESTION # 74

A nurse must be aware that infants with heart failure require immediate scheduling of:

- A. different treatment as that of an adult.
- B. same medications as that of an adult.
- C. operations during childhood.
- D. meticulous heart surgery.

**Answer: B**

Explanation:

Explanation: For a reason that mechanism of heart failure is exactly the same in pediatrics and geriatrics.

Same medications like cardiac glycosides and furosemide are utilized, although the dosage will be different. Other options are uncertain because there are other treatments which are successful other than surgeries.

### NEW QUESTION # 75

Dustin, a 3-year-old boy, was admitted to the hospital with nephritic syndrome. The nurse should assign a roommate who is:

- A. a 3-year-old boy with pneumonia
- B. a 3-year-old girl with conjunctivitis

- C. a 3-year-old boy with impetigo
- D. a 3-year-old girl with thalassemia

**Answer: D**

Explanation:

Explanation: A 3-year-old boy with nephritic syndrome could be assigned a roommate like a 3-year-old girl with thalassemia. A child with nephrotic syndrome is at high risk for infection due to the lowered resistance. The child with thalassemia will be a best roommate because it is not communicable.

**NEW QUESTION # 76**

The parents of a teenager with terminal neuroblastoma are preparing to withdraw life-sustaining treatment. The parent states, "I would like their sibling to be here, but I'm not sure if that is a good idea." Which of the following is the best response by a nurse?

- A. "Our child life therapist can help prepare the sibling for what will happen."
- B. "The medical team supports the presence of siblings during end of life."
- C. "We require siblings to be a certain age. How old is the sibling?"
- D. "What concerns do you have about having the sibling present?"

**Answer: D**

Explanation:

In end-of-life situations, especially involving pediatric patients, psychosocial support must extend to the entire family. When a parent expresses uncertainty or ambivalence, the nurse's role is to facilitate open communication and explore parental concerns without imposing judgment or directives.

"Effective psychosocial care requires assessment of family readiness and emotional state. Nurses should encourage family expression of feelings and help clarify concerns before offering direction or education." (Referenced from CCRN Pediatric - Direct Care: Psychosocial Support and Palliative Care) By asking about the parent's concerns, the nurse promotes a therapeutic relationship and gains insight into the family's emotional and cultural dynamics, allowing further support or child life referrals as needed.

**NEW QUESTION # 77**

.....

Similarly, RealVCE offers up to 1 year of free AACN CCRN-Pediatric exam questions updates if in any case, the content of Critical Care Nursing Exam (CCRN-Pediatric) certification test changes.
