APMG-International ISO-IEC-27001-Foundation Advanced Testing Engine - ISO-IEC-27001-Foundation Latest Braindumps Ebook

As one of the leading brand in the market, our ISO-IEC-27001-Foundation exam materials can be obtained on our website within five minutes. As long as you pay for our ISO-IEC-27001-Foundation study guide successfully, then you will receive it quickly. That is the expression of our efficiency. The amazing quality of our ISO-IEC-27001-Foundation learning questions can totally catch eyes of exam candidates with passing rate up to 98 to 100 percent.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

Which is a control title within Annex A of ISO/IEC 27001?

- A. Change control
- B. Responsibilities and procedures
- C. Protection of documents
- **D. Information security in supplier relationships**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

* "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.

* "Protection of documents" (C) relates to document control but is not a specific Annex A control.

* "Change control" (D) is relevant to ITIL/ITSM but not listed as a control title in Annex A.

Therefore, the correct Annex A control title is A: Information security in supplier relationships.

NEW QUESTION # 26

Which statement describes a requirement of an internal audit programme?

- A. All processes must be audited within a 3-year cycle
- B. Previous audit results are disregarded to ensure objectivity
- C. The programme must use third party auditors to ensure impartiality
- **D. The programme must consider the importance of the target processes**

Answer: D

Explanation:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to:

"Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor.

Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is

respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs. Thus, the correct verified answer is C.

NEW QUESTION # 27

What is required to be reported by the Information security event reporting control?

- A. Information disclosure
- **B. Observed or suspected events**
- C. Unauthorized access
- D. Asset disposal

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A, control 6.8 (Information security event reporting) specifies:

"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.

Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).

Therefore, the verified correct answer is D: Observed or suspected events.

NEW QUESTION # 28

Which trend in information security performance is required to be considered during a management review of the ISMS?

- A. Decisions related to continual improvement opportunities
- B. Relevant external and internal requirements changes
- **C. Achievement of information security objectives**
- D. Validity of information continuity controls

Answer: C

Explanation:

Clause 9.3.2 (Management Review Inputs) states that management reviews shall include:

"c) information on the information security performance, including trends in: (1) nonconformities and corrective actions; (2) monitoring and measurement results; (3) audit results; and (4) fulfilment of information security objectives." This makes achievement of information security objectives (option A) a required trend to be considered.

While external/internal requirements (C) and continual improvement opportunities (D) are also part of management review inputs, they are not specifically listed under "trends in performance." Option B is outside the direct requirement.

Thus, the verified answer is A.

NEW QUESTION # 29

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Neither 1 or 2 is true
- B. Only 2 is true
- C. Both 1 and 2 are true
- **D. Only 1 is true**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:
ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC 27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them. However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC 27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3). Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

NEW QUESTION # 30
